

STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES

CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION  
DISTRICT  
FOR A WATER SUPPLY FOR ZONE NO. 7

<Note: This contract, which was not available in the original, has been  
retyped for clarity and ease of reading.>

THIS CONTRACT, made this 20<sup>th</sup> day of November, 1961, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to the "State", and Alameda County Flood Control and Water Conservation District, a public agency in the State of California, duly organized, existing, and acting pursuant to the laws thereof with its principal place of business in Hayward, California, acting on behalf of Zone Seven of such District herein referred to as the "District".

WITNESSETH, That:

WHEREAS, the State is authorized to construct and operate facilities for the storage and conveyance of water, certain of which facilities will make water available to the District; and

WHEREAS, funds will be provided under the California Water Resources Development Bond Act for the construction of said facilities; and

WHEREAS, the District is desirous of obtaining a supply of water from the State  
for Zone Seven of its territory;

NOW THEREFORE, it is mutually agreed as follows:

## A. INTRODUCTORY PROVISIONS

1. Definitions. When used in this contract, the following terms shall have the meanings hereinafter set forth:

(a) “Bond Act” shall mean the California Water Resources Development Bond Act, comprising Chapter 8, commencing at Section 12930, of Part 6 of Division 6 of the Water Code, as enacted in Chapter 1762 of the Statutes of 1959.

(b) “System” shall mean the State Water Resources Development System as defined in section 12931 of the Water Code.

(c) “Delta” shall mean the Sacramento-San Joaquin Delta as defined in Section 12220 of the Water Code on November 8, 1960.

(d) “Contractor” shall mean any entity contracting with the State for a dependable supply of water made available by the System, except such water as is made available by the facilities specified in Section 12934(d)(6) of the Water Code.

(e) “Project facilities” shall mean those facilities of the System which will, in whole or in part, serve the purposes of this contract by conserving water and making it available for use in and above the Delta and for export from the Delta, and by conveying water to the District. Said project facilities shall consist specifically of “project conservation facilities” and “project transportation facilities”, as hereinafter defined.

(f) “Project conservation facilities” shall mean such project facilities as are presently included, or as may be added in the future, under (g) and (h) below.

(g) “Initial project conservation facilities” shall mean the following project facilities specified in Section 12934(d) of the Water Code:

(1) All those facilities specified in subparagraph (1) thereof.

(2) Those facilities specified in subparagraph (3) thereof to the extent that they serve the purposes of water conservation in the Delta, water supply in the Delta, and transfer of water across the Delta.

(3) A reservoir near Los Banos in Merced County as specified in subparagraph (2) thereof.

(4) The reach of the San Joaquin Valley-Southern California Aqueduct extending from the Delta to a reservoir near Los Banos in Merced County, to the extent required for water conservation through conveyance of water diverted from the Delta to offstream storage in said reservoir as determined by the State.

(5) Those facilities specified in subparagraph (5) thereof which are incidental to the facilities included under (1), (2), (3), and (4) above.

(6) Those facilities specified in subparagraph (7) thereof which are necessary and appurtenant to the facilities included under (1), (2), (3), (4), and (5) above.

(h) “Additional project conservation facilities” shall mean those project facilities provided for in Section 12938 of the Water Code which will serve the purpose of preventing any reduction in the minimum project yield, as hereinafter defined below the total of the maximum annual entitlements of all contractors.

(i) “Project transportation facilities” shall mean the following project facilities specified in Section 12934(d) of the Water Code:

(1) The following facilities specified in subparagraph (2) thereof: The reach of the San Joaquin Valley-Southern California Aqueduct extending from the Delta to a South Bay Pumping Plant, to the extent required for water transportation as determined by the State, and a South Bay Aqueduct extending to terminal reservoirs in the County of Alameda but not including any portion of Del Valle Reservoir which may be allocated to conservation of water from Arroyo Del Valle Watershed.

(2) Those facilities specified in subparagraph (5) thereof which are incidental to the facilities included under (1) above.

(3) Those facilities specified in subparagraph (7) thereof which are necessary and appurtenant to the facilities included under (1) and (2) above.

(j) “Project Water” shall mean water made available for delivery to the contractors by the project conservation facilities and by the transportation facilities included in the System.

(k) “Bureau – State Contract” shall mean any contract or contracts between the United States and the State providing for delivery of water by the Bureau of Reclamation into project transportation facilities for subsequent delivery to contractors.

(l) “Bureau water” shall mean water purchased by the State from the United States Bureau of Reclamation under the Bureau – State contract, and made available for delivery to the contractors by the transportation facilities included in the System.

(m) “Bureau agricultural water” shall mean Bureau water used primarily in the commercial production of plant crops or livestock.

(n) “Bureau municipal, industrial and domestic water” shall mean Bureau water other than Bureau agricultural water.

(o) “Minimum project yield” shall mean the dependable annual supply of project water to be made available, estimated to be 4,000,000 acre-feet per year, said amount to be determined by the State on the basis of coordinated operation studies of initial project conservation facilities and additional project conservation facilities, which studies shall be based upon:

(1) The estimated relative proportion of deliveries for agricultural use to deliveries for municipal use for the year 1990, and the characteristic distributions of demands for these two uses throughout the year.

(2) An allowable reduction in the agricultural use portion of the minimum project yield, due to drought, of not to exceed fifty percent (50%) in any one year, nor a total of one hundred percent (100%) of one year’s supply in any series of seven consecutive years.

(3) Agreements now in effect or as hereafter amended or supplemented between the State and the United States and others regarding the diversion or utilization of waters of the Delta or streams tributary thereto.

(p) “Annual entitlement” shall mean the amount of project water to be made available to a contractor during the respective year, at the delivery structures provided for such contractor, under the terms of its contract with the State.

(q) “Maximum annual entitlement” shall mean the maximum amount of project water to be made available to a contractor in any one year, at the delivery structures provided for such contractor, under the terms of its contract with the State.

(r) “Supplemental conservation facilities” shall mean those facilities provided for in Section 12938 of the Water Code which will serve the purpose of supplying water in addition to the total of the maximum annual entitlements of all contractors, or in addition to the minimum project yield, if greater than said total, and for meeting local needs.

(s) “Supplemental water” shall mean water made available by supplemental conservation facilities, in excess of the total of the maximum annual entitlements of all contractors, or in excess of the minimum project yield, if greater than said total.

(t) “Year” shall mean the 12-month period from January 1 through December 31, both dates inclusive.

(u) “Bureau water year” shall mean the 12-month period commencing March 1 of each year.

(v) “Year of initial project water delivery” shall mean the year when project water will first be available for delivery to a contractor pursuant to its contract with the State.

(w) “Project interest rate” shall mean the weighted average of the interest rates paid by the State on bonds issued under the Bond Act without regard to any premiums received on the sale thereof. Until bonds are issued and sold under the Bond Act, the project interest rate shall be four percent (4%) per annum, and after said bonds have been issued said rate shall be computed as a decimal fraction to five places.

(x) “Capital costs” shall mean all costs incurred subsequent to authorization of a facility for construction by the Legislature or by administrative action

pursuant to Section 11290 of the Water Code and to the Bond Act, including those so incurred prior to the beginning of the project repayment period as herein defined and any accrued unpaid interest charges thereon at the rates specified herein, which are properly chargeable to the construction of and the furnishing of equipment for the facilities of the System, including the costs of surveys, engineering studies, exploratory work, designs, preparation of construction plans and specifications, acquisition of lands, easements and rights-of-way, relocation work, and essential administrative work in connection therewith, all as shown upon the official records of the Department of Water Resources.

(y) “Project repayment period” shall mean that period of years commencing on the first day of the year which immediately follows the year in which the State, after November 8, 1960, first expends money for construction of any facility of the System, and extending until all bonds secured by the pledge of revenues provided for by the Bond Act have been repaid.

(z) “Municipal use” shall mean all those uses of water common to the municipal water supply of a city, town, or other similar population group, including uses for domestic purposes, uses for the purposes of commerce, trade or industry, and any there use incidental thereto for any beneficial purpose.

(aa) “Manufacturing use” shall mean any use of water primarily in the production of finished goods for market.

(bb) “Agricultural use” shall mean any use of water primarily in the production of plant crops or livestock for market, including any use incidental thereto for domestic or stock-watering purposes.

(cc) “Subject to approval by the State” shall mean subject to the determination and judgment of the State as to acceptability.

(dd) “Area of origin statutes” shall mean Section 10505 and Sections 11460 through 11463 of the Water Code as now existing or hereafter amended.

(ee) “Zone Seven” shall mean the area in eastern Alameda County designated as Zone No. 7 on the records of the Alameda County Flood Control and Water Conservation District.

2. Term of Contract. This contract shall become effective on the date first above written and shall remain in effect throughout the project repayment period, or for seventy-five (75) years, whichever period is longer.

3. Validation. Within one (1) year after the effective date of this contract, the District shall submit this contract to a court of competent jurisdiction for determination of its validity by a proceeding in mandamus or other appropriate proceeding or action, which proceeding or action shall be diligently prosecuted to final decree or judgment. In the event that this contract is determined to be invalid by such final decree or judgment, the State shall make all reasonable efforts to obtain validating legislation at the next session of the Legislature empowered to consider such legislation, and within six (6) months after the close of such session, if such legislation shall have been enacted, the District shall submit this contract to a court of competent jurisdiction for redetermination of its validity by appropriate proceeding or action which proceeding or action shall be diligently prosecuted to final decree or judgment.

4. Option for Continued Service. By written notice to the State at least six (6) months prior to the expiration of the term of this contract, the District may elect to

receive continued service after expiration of said term under the following conditions unless otherwise agreed to:

- (1) Service of water in annual amounts up to and including the District's maximum annual entitlement hereunder.
- (2) Service of water at no greater cost to the District than would have been the case had this contract continued in effect.
- (3) Service of water under the same physical conditions of service, including time, place, amount and rate of delivery, as are provided for hereunder.
- (4) Retention of the same chemical quality objective provision as is set forth herein.
- (5) Retention of the same options to utilize the project transportation facilities as are provided for in Articles 18(b) and 18(c), to the extent such options are then applicable.

Other terms and conditions of the continued service shall be reasonable and equitable and shall be mutually agreed upon. In the event that said terms and conditions provide for continued service for a limited number of years only, the District shall have the same option to receive continued service here provided for upon the expiration of that and each succeeding period of continued service.

5. Pledge of Revenues. This contract is entered into for the direct benefit of the holders and owners of all general obligation bonds issued under the Bond Act, and the income and revenues derived from this contract are pledged to the purposes and in the priority set forth in that act.

## B. WATER SERVICE PROVISIONS

### 6. Annual Entitlements; Interim Service of Bureau Water.

(a) The year of initial Bureau water delivery to the District is presently estimated to be 1962. The year of initial project water delivery is presently estimated to be 1967. To the extent practicable, the State shall notify the District of any change in this estimate.

(b) Each year prior to the year of initial project water delivery to the District and commencing in 1962, which year shall correspond to year “1” in Table A, included in subdivision (c) of this article, the State, to the extent Bureau water is available to the State, shall make Bureau water available for delivery to the District in the amounts designated in Table A for the respective years of delivery: Provided, That such service of Bureau water shall be subject to all applicable terms and conditions of this contract governing the service of project water, unless otherwise specifically provided; to all applicable terms and conditions of the Bureau-State Contract; and to the following special terms and conditions:

(1) In any year in which there may occur for any reason a shortage in the supply of Bureau water available for delivery to those contractors entitled to receive such water under their respective contracts, with the result that such supply is less than the total of the amounts of Bureau water to be made available to such contractors under their respective contracts in that year, the State shall, by amendment of Table A in the respective contract, reduce the amount of water to be made available for delivery to each such contractor under its contract in that year in an amount which bears the same proportion to the amount of the shortage in said Bureau water supply that the amount of

Bureau water otherwise to be made available for delivery to the contractor under its contract in that year bears to the total of the amounts of Bureau water otherwise to be made available for delivery to all such contractors under their respective contracts in that year, all as determined by the State: Provided, That the State may apportion the available supply of Bureau water on some other basis if such is required to meet minimum demands for domestic supply, fire protection, or sanitation during the year.

(2) Bureau agricultural water delivered to the District pursuant to this contract shall not be furnished by the District to any excess land as hereinafter defined. As used in this subdivision (b) of Article 6, but not as used in Article 30, the term “excess land” shall mean that part of the irrigable land within the district in excess of one hundred-sixty (160) acres held in the beneficial private ownership of any one person and the term “nonexcess land” means all irrigable land which is not excess land. As a condition precedent to the right to receive water made available pursuant to this contract each owner of excess land shall be required to select his nonexcess land and to file in the office of the district and with the State, in duplicate, one copy thereof to be furnished by the State to the United States, his written designation and description thereof. Upon the failure of the landowner to do so the State shall make such designation and mail a notice thereof to such landowner. In the event the State fails to act within a reasonable period of time, such designation may be made by the United States by notice to the State and the landowner. The landowner shall then be bound by such designation and the district shall furnish water provided under this contract only to the designated nonexcess land. A landowner may, with the consent of the United States, change the

designation provided that an equal acreage of land previously designated as nonexcess shall become excess.

(c) Service of Bureau water to the District pursuant to subdivision (b) of this article shall cease in the year preceding the year of initial project water delivery to the District, except as provided in subparagraph (3) of that subdivision. Commencing with the year of initial project water delivery to the District, the State each year shall make project water available for delivery to the District in the amounts designated in Table A for the respective years of delivery: Provided, That if the District receives service of Bureau water during the year of initial project water delivery to the District pursuant to subparagraph (3) of subdivision (b) of this article, the amount of project water made available for delivery to the District in said year shall be only that portion of the amount of water designated in Table A for said year which is not determined by the State to be Bureau water pursuant to subparagraph (3). The amount of water designated in Table A for the year of delivery corresponding to the year of initial project water delivery to the District, less any portion thereof which is determined by the State to be Bureau water pursuant to subparagraph (3) of subdivision (b) of this article, and the amounts of water designated in Table A for all succeeding years are referred to in this contract as the District's annual entitlements and shall be subject to change as provided in Article 7(a).

TABLE A  
ANNUAL AMOUNTS OF WATER TO BE  
MADE AVAILABLE FOR DELIVERY TO ZONE 7 OF  
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT

<u>Year</u>	<u>Total Annual Amount in Acre-feet</u>
1	1,000
2	2,500
3	4,000
4	4,500
5	5,000
6	6,200
7	7,500
8	8,800
9	10,000
10	11,200
11	12,400
12	13,600
13	14,800
14	16,000
15	17,200
16	18,400
17	19,600
18	20,800
19	22,000
20	23,000
21	24,000
22	25,000
23	26,000
24	27,000
25	28,000
26	29,000
27	30,000
28	31,000
29	32,000
30	34,000
31	36,000
32	38,000
33	40,000
And each succeeding year thereafter, for the term of this contract:	40,000

(d) Subject to the availability of funds, the State shall make all reasonable efforts consistent with sound fiscal policies, reasonable construction schedules, and proper operating procedures to complete the project facilities necessary for delivery of project water to the District in such manner and at such times that said delivery can commence in or before 1967, and can continue in the amounts designated in Table A.

7. Change in Annual Entitlements; Maximum Annual Entitlement.

(a) The District may, at any time or times during the term of this contract, by timely written notice furnished to the State, request that project water be made available to it thereafter in annual amounts greater or less than the annual entitlements designated in Table A, included in Article 6(c). Subject to approval by the State of any such request, the State's construction schedule shall be adjusted to the extent necessary to satisfy the request, and the requested increases or decreases in said annual entitlements shall be incorporated in Table A by amendment thereof: Provided, That no such change shall be approved if, in the judgment of the State, it would impair the financial feasibility of the project facilities.

(b) The maximum amount of project water to be made available to the District in any one year under this contract shall be 40,000 acre-feet, referred to in this contract as the District's maximum annual entitlement, and in no event shall such maximum amount of project water to be made available to the District be increased over this amount, except as is provided for in Articles 8 and 15(c).

8. Option to Increase Maximum Annual Entitlement.

(a) In the event that the maximum annual entitlements to water from the South Bay Aqueduct under all contracts executed by the State on or before November 30, 1961, do not aggregate 210,000 acre-feet per year, the State shall immediately notify all contractors

served by the South Bay Aqueduct, and each such contractor may request that it become entitled to any amount of the 210,000 acre-feet per year of water not contracted for. Such request shall be subject to approval by the State and shall be considered in the light of all similar request from other contractors. The State shall approve such request only to the extent that the water involved can be put to beneficial use within a reasonable period of time.

(b) In the event that the maximum annual entitlements under all contracts executed by the State on or before December 31, 1963, do not aggregate the amount of the minimum project yield as herein defined, the State shall immediately notify all contractors, and each contractor may elect to become entitled to the uncontracted for portion of the minimum project yield in or up to an amount which bears the same ratio to such uncontracted for portion as the contractor's maximum annual entitlement bears to the total of the maximum annual entitlements of all contractors as of that date: Provided, That such option may be exercised only to the extent that the water involved can be put to beneficial use within a reasonable period of time. Such option shall become effective on the date that the contractor receives said notice from the State and shall remain in effect through September 30, 1964. If the full amount of such uncontracted for portion of the minimum project yield is not preempted by the contractors under this option on or before September 30, 1964, each contractor may request that it become entitled to any amount of such water not so preempted. Such request shall be subject to approval by the State and shall be considered in the light of all similar requests from other contractors. The State shall approve such request only to the extent that the water involved can be put to beneficial use within a reasonable period of time.

(c) Upon the approval of a request or upon the exercise of an option provided for in this article, the District's maximum annual entitlement under Article 7(b) shall be

increased by the amount of the additional entitlement thereby obtained by amendment of that article, and the District shall become obligated and hereby agrees to pay to the State a proportionate share of the costs attributable to such increase in accordance with cost allocation principles and procedures set forth in this contract. The service of and payment for said increased entitlement shall in all respects be subject to the terms and conditions of this contract.

9. Obligation to Delivery Water Made Available

Project water made available to the District pursuant to Article 6 shall be delivered to the District by the State at the delivery structures established in accordance with Article 10. At any time or times the District may refuse to accept delivery of water made available to it: Provided, That in such event, the District shall remain obligated to make all payments required under this contract.

10. Delivery Structures.

(a) Project water made available to the District pursuant to this contract shall be delivered to the District at such locations and times and through delivery structures of such capacities as are requested by the District and approved by the State.

(b) Pursuant to subdivision (a) of this article, the District shall furnish to the State on or before December 31, 1961, its written requests as to:

(1) The location of delivery structures for delivery of project water to it.

(2) The time at which project water is first to be delivered through each such delivery structure.

(3) The maximum instantaneous flow capacity in cubic feet per second to be provided in each such delivery structure.

(4) The maximum amount of water in acre-feet to be delivered in any one month through each such delivery structure.

(5) The total combined maximum instantaneous flow capacity in cubic feet per second to be provided by all such delivery structures.

(6) The total maximum amount of water in acre-feet to be delivered in any one month through all such delivery structures.

(c) From time to time the District may request delivery structures in addition to those requested pursuant to subdivision (b) of this article.

(d) The District shall pay all of the costs of delivery structures for the delivery of project water to it, and shall deposit with the State, prior to the commencement of construction of any such delivery structure not yet constructed, or by March 1, 1962, for any delivery structure under construction, an amount of money estimated by the State to be sufficient to cover the costs thereof.

11. Measurement of Water Delivered.

(a) The State shall measure all project water delivered to the District and shall keep and maintain accurate and complete records thereof. For this purpose, the State shall install, operate, and maintain at all delivery structures for delivery of project water to the District such measuring devices and equipment as are satisfactory and acceptable to both parties. Said devices and equipment shall be examined, tested, and serviced regularly to insure their accuracy. At any time or times, the District or any other contractor may inspect such measuring devices and equipment, and the measurements and records taken therefrom.

(b) The District shall pay all of the costs of acquiring and installing the measuring devices and equipment provided for in subdivision (a) of this article, and shall deposit

with the State, prior to such acquisition and installation, or on March 1, 1962 for devices already under construction, an amount of money estimated by the State to be sufficient to cover such costs.

12. Amounts, Times, and Rates of Delivery.

(a) The amounts, times, and rates of delivery of project water to the District during any year shall be in accordance with a water delivery schedule for that year, such schedule to be determined in the following manner:

(1) On or before October 1 of each year, the District shall submit in writing to the State a preliminary water delivery schedule, subject to the provisions of this article and Articles 6(b), 6(c), 7(b), 10, and 17, indicating the amounts of water desired by the District during each month of the succeeding five (5) years.

(2) Upon receipt of a preliminary schedule the State shall review it and, after consultation with the District, shall make such modifications in it as are necessary to insure that the amounts, times, and rates of delivery to the District will be consistent with the State's overall delivery ability, considering the then current delivery schedules of all contractors. On or before December 1 of each year, the State shall determine and furnish to the District the water delivery schedule for the next succeeding year which shall show the amounts of water to be delivered to the District during each month of that year.

(3) A water delivery schedule may be amended by the State upon the District's written request. Proposed amendments shall be submitted by the District within a reasonable time before the desired change is to become effective, and shall be subject to review and modification by the State in like manner as the schedule itself.

(b) In no event shall the State contract to deliver to any contractor through all delivery structures provided for such contractor a total amount of project water in any year greater than the contractor's annual entitlement for that year; nor to deliver to any contractor from the project transportation facilities downstream from Pumping Plant VI in any one month of any year a total amount of project water greater than eleven percent (11%) of such contractor's annual entitlement for that year; nor to deliver to any contractor from the project transportation facilities upstream from said Pumping Plant VI in any one month of any year a total amount of project water greater than the sum of eighteen percent (18%) of that portion of such contractor's annual entitlement for that year to be put to agricultural use, as determined by the State, and eleven percent (11%) of that portion of such contractor's annual entitlement for that year to be put to municipal use, as determined by the State: Provided, That if the State delivers project water to any contractor through delivery structures both downstream and upstream from said Pumping Plant VI, the foregoing limitations shall be based on an appropriate apportionment of such contractor's annual entitlement for the respective year to the respective portions of such contractor's service area to which delivery is made from the project transportation facilities downstream from said Pumping Plant VI and from the project transportation facilities upstream therefrom: Provided further, That the respective percentages set forth hereinabove may be revised for a particular contractor by amendment of this subdivision after submission to the State of that contractor's requests with respect to maximum monthly deliveries, such revision being subject to approval by the State and subject to advancement to the State by the contractor of funds sufficient to cover any additional costs of the project transportation facilities occasioned thereby, the amount of such funds to be determined pursuant to Article 24(d).

(c) In no event shall the State be obligated to deliver water to the District through all delivery structures at a total combined instantaneous rate of flow exceeding eighty (80) cubic feet per second, except as this rate of flow may be revised by amendment of this article after submission to the State of the District's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

(d) If in any year the State, as a result of causes beyond its control, is unable to deliver any portion of the District's annual entitlement for such year under Table A, included in Article 6(c), as provided for in the delivery schedule established for that year, the District may elect to receive the amount of water which otherwise would have been delivered to it during such period at other times during the year or the next succeeding year, to the extent that such water is then available and such election is consistent with the State's overall delivery ability, considering the then current delivery schedules of all contractors.

13. Responsibilities for Delivery and Distribution of Water.

(a) Neither the State nor any of its officers, agents, or employees shall be liable for the control, carriage, handling, use, disposal, or distribution of project water supplied to the District after such water has passed the delivery structures established in accordance with Article 10; nor for claim of damage of any nature whatsoever, including but not limited to property damage, personal injury or death, arising out of or connected with the control, carriage, handling, use, disposal or distribution of such water beyond said delivery structures; and the District shall indemnify and hold harmless the State and its officers, agents, and employees from any such damages or claims of damage.

(b) Neither the district nor any of its officers, agents, or employees shall be liable for the control, carriage, handling, use, disposal, or distribution of project water before

such water has passed the delivery structures established in accordance with Article 10; nor for claim of damage of any nature whatsoever, including but not limited to property damage, personal injury or death, arising out of or connected with the control, carriage, handling, use, disposal, or distribution of such water before it has passed said delivery structures.

14. Temporary Discontinuance or Reduction of Delivery.

(a) The State may temporarily discontinue or reduce the delivery of project water to the District hereunder for the purposes of necessary investigation, inspection, maintenance, repair, or replacement of any of the project facilities necessary for the delivery of project water to the District. The State shall notice the District as far in advance as possible of any such discontinuance or reduction, except in cases of emergency, in which case notice need not be given.

(b) In the event of any discontinuance or reduction of delivery of project water pursuant to subdivision (a) of this article, the District may elect to receive the amount of water which otherwise would have been delivered to it during such period under the water delivery schedule for that year at other times during the year or the next succeeding year, to the extent that such water is then available and such election is consistent with the State's overall delivery ability considering the then current delivery schedules of all contractors.

15. Use of Water.

(a) No sale or other disposal of project water delivered to the District pursuant to this contract shall be made by the District for use of such water outside of Zone Seven which would, in the judgment of the State, materially impair the District's capacity to make payments to the State as provided for in this contract. Except insofar as such water is sold by the District to the United States, the State of California, or to purchasers for use within areas which are outside

the areas proposed to be served by the State with water made available by the System, project water delivered to the District pursuant to this contract shall not be sold or otherwise disposed of by the District for use outside of Zone Seven without the prior written consent of the State. The District shall notify the State as promptly as feasible of all sales or other disposals of project water made or proposed to be made by the District for use outside of Zone Seven.

(b) While this contract is in effect, no change shall be made in the organization of the District or the boundaries of Zone Seven which would materially impair the District's capacity to make payments to the State as provided for herein. The District shall notify the State as promptly as feasible of any change or proposed change in the boundaries of Zone Seven.

(c) In the event of annexation to Zone Seven of territory lying within an area served or to be served by the State with project water pursuant to a contract between the State and another contractor, and subject to the consummation of appropriate agreements between the State, the District, and such other contractor, the District's annual entitlements and maximum annual entitlement under this contract shall be increased by the amounts of the annual entitlements and maximum annual entitlement, respectively, contracted for by said contractor for use in said annexed territory. In the event of annexation to Zone Seven of territory lying within an area proposed to be served by the State with project water, but for which no contract has been executed by the State for service of project water for use in such annexed territory, the District's annual entitlements and maximum annual entitlement under this contract, at the request of either the State or the District, shall be increased by the amounts of the prospective annual entitlements and maximum annual entitlement, respectively, allocated or assigned by the State for use in said annexed territory. Upon any increase in the District's annual entitlements and maximum annual

entitlement pursuant to this subdivision, Table A included in Article 6(c), and Article 7(b) shall be amended accordingly and the District shall become obligated and hereby agrees to pay to the State a proportionate share of the costs attributable to such increase in accordance with cost allocation principles and procedures set forth in this contract. The service of and payment for such increased annual entitlements and maximum annual entitlements shall in all respects be subject to the terms and conditions of this contract.

(d) The State shall make no other contract to supply project water or Bureau water for use within the boundaries of Zone Seven without the consent of the Board of Directors of Zone Seven.

16. Continuity and Dependability of Water Supply.

(a) The District's maximum annual entitlement hereunder, together with the maximum annual entitlements of all other contractors, shall aggregate no more than the minimum project yield as defined herein and in no event more than 4,000,000 acre-feet of project water.

(b) The State shall make all reasonable efforts to perfect and protect water rights necessary for the System and for the satisfaction of water supply commitments under this contract.

(c) Commencing within two (2) years from the year of initial project water delivery to the District, the State shall submit to the District at not more than five-year intervals a report on the State's ability to meet future demands for project water and for supplemental water, and on the State's plans for constructing additional project conservation facilities and supplemental conservation facilities. Such reports shall include all estimates, projections, and other data which the State deems relevant thereto.

(d) Bond funds required to be expended for the construction of additional facilities of the System under the provisions of Section 12938 of the Water Code shall be expended only for construction of additional project conservation facilities as defined herein, and related, appurtenant facilities necessary and desirable to meet local needs: Provided, That if at any time after 1985 the State finds that a part or all of such bond funds are not then required for the above purpose, and will not be so required within the next succeeding ten (10) years, such bond funds may be used, to the extent permitted in the Bond Act, to construct supplemental conservation facilities as defined herein.

(e) In planning and designing supplemental conservation facilities the State shall give consideration to the requirements and demands for supplemental water of the District and others who have contracted for project water. Entitlements to supplemental water shall be obtained, and repayment therefore shall be arranged, in contracts separate from contracts for project water.

17. Construction of Project Facilities.

(a) Subject to the rights of the District under subdivision (b) of this article and the other provisions of this contract, the State shall provide in each aqueduct reach of the project transportation facilities such maximum monthly delivery capability for the transport and delivery of project water to the District as, in the judgment of the State, will best serve the interests of the District and all other contractors entitled to delivery of project water from or through said facilities: Provided, That prior to December 31, 1961, the District shall furnish to the State a written request specifying such maximum monthly delivery capabilities, and the State shall give full consideration to such request in planning and designing said facilities.

(b) The State shall design and construct the project transportation facilities so as to provide in each reach thereof, including reservoirs, the capacity necessary to enable delivery of project water in each year to the District and to other contractors in the maximum monthly amounts and at the locations, times, and maximum rates specified or provided for in their respective contracts for such year, and shall include in each such reach such capacity as is economically justified in the judgment of the State to compensate for scheduled outages for purposes of necessary investigation, inspection, maintenance, repair or replacement of project facilities, and for losses of water due to evaporation, leakage, seepage, or other causes. Subject to Articles 6(a), 7(b), 12(b), and 12(c), the capacity so to be provided by the State for each reach of the project transportation facilities necessary for transporting water to the District shall be sufficient to enable delivery to the District in each month of any year of an amount of water up to but not exceeding the sum of eleven percent (11%) of that portion of the District's annual entitlement for the respective year to be put to municipal use and eighteen percent (18%) of that portion of the District's annual entitlement for the respective year to be put to agricultural use, all as determined by the State, and, upon completion of the project facilities, to enable delivery to the District in each month of any year of an amount of water up to but not exceeding the sum of eleven percent (11%) of that portion of the District's maximum annual entitlement to be put to municipal use in the respective year and eighteen percent (18%) of that portion of the District's maximum annual entitlement to be put to agricultural use in the respective year, all as determined by the State: Provided, That regulatory storage reservoirs included in the project transportation facilities may be utilized in conjunction with conveyance capacity provided in said facilities for delivery to the District of the foregoing monthly amounts, subject to the retention at all times, except during periods of emergency, in each such reservoir of an amount of stored

water reasonably sufficient to meet emergency requirements of the District for project water during the respective year.

(c) The District shall have a reasonable opportunity to inspect and study the State's plans and specifications for all project facilities and may make comments and recommendations thereon to the State. Such privilege shall also extend to any plans and specifications or proposed agreements for the use by the State, in conjunction with the project facilities, of facilities owned by an entity other than the State. The State shall not enter into any such agreement which would impair the State's ability to perform fully its obligations under this contract.

(d) No bonds shall be sold nor funds expended under the authority of the Bond Act for the construction of any aqueduct or appurtenance thereto included in the System unless and until contracts are executed which will insure the recovery by the State of at least seventy-five percent (75%) of those capital costs of the particular aqueduct and any appurtenances thereto which shall be reimbursable by the contractors as determined by the State; nor shall any bonds be sold or funds expended under the authority of the Bond Act for the construction of any project conservation facility or supplemental conservation facility, unless and until contracts are executed which, together with estimated revenues from the sale or other disposal of electrical energy generated in connection with operation of project conservation facilities and supplemental conservation facilities, will insure the recovery by the State of at least seventy-five percent (75%) of those capital costs of the particular facility which shall be reimbursable by the contractors as determined by the State: Provided, That the foregoing limitations shall not apply with respect to: (1) surveys, engineering studies, exploratory work, designs, preparation of construction plans and specifications, acquisition of lands, easements and

rights of way, relocation work, and essential administrative work in connection therewith; (2) construction for which appropriations had been made prior to approval of the Bond Act by the voters of the State of California; and (3) construction of facilities pursuant to an agreement between the State and the United States.

(e) In the event that the State fails or is unable to complete construction of any portion or portions of the project transportation facilities necessary to deliver water to the District as provided in this contract, and gives the District written notice thereof the District, if it be not then in default and without exclusion of such other rights as it may have under this contract, may exercise the following options:

(1) The District may provide funds to the State in such amounts and at such times as may be necessary to enable the State to complete construction of such incompletd portion or portions of the project transportation facilities to the extent necessary for the transport and delivery of water to the District as provided for in this contract: Provided, That the State shall be and remain the owner of such project transportation facilities or portions thereof constructed in whole or in part with funds provided by the District, and shall be and remain obligated to operate, maintain, repair and replace such facilities to the full extent contemplated in this contract: Provided further, That the amount of any funds so provided by the District shall be credited by the State against the District's payment obligation under the capital cost component of the Transportation Charge, but the District shall be and remain obligated to pay its share of any capital costs of the above-described facilities not paid for with such funds, together with its proportionate share of the operation, maintenance, power and replacement costs of such facilities.

(2) The District may at its own expense, and on a joint venture basis if such an arrangement is made with other contractors having similar options, connect to the project transportation facilities constructed by the State for the purpose of receiving project water to which it is entitled under this contract. In such event and notwithstanding any other provisions of this contract, the structures for delivery of project water to the District pursuant hereto shall thereafter be deemed to be located at such point of connection. Specific arrangements for acquiring, constructing, operating, maintaining, and replacing the District's facilities at the point of connection thereof with the State's facilities shall be in accordance with terms and conditions mutually agreed upon by the parties: Provided, That the State shall be and remain the owner of all facilities constructed by it to said point of connection, and the District shall be and remain obligated to pay its proportionate share of the costs thereof.

(f) Each aqueduct reach shall have at least the capacity specified in Article 23.

18. Shortage in Water Supply.

(a) In any year in which there may occur a shortage due to drought or other temporary cause in the supply of project water available for delivery to the contractors, with the result that such supply is less than the total of the annual entitlements of all contractors for that year, the State shall, before reducing deliveries of project water to all contractors, reduce the delivery of project water to each contractor using such water for agricultural purposes by a percentage, not to exceed fifty percent (50%) in any one year or a total of one hundred percent (100%) in any series of seven consecutive years, of that portion of the contractor's annual entitlement for the respective year which is to be put to agricultural use as determined by the State; Provided, That such percentage shall be the same for all such contractors. The maximum

total reduction in deliveries allowable under the above provision shall be made before any reduction is made in project water deliveries for other uses. Any necessary reduction in deliveries of project water beyond said maximum total reduction allowable under the foregoing provision shall be apportioned among all contractors irrespective of the uses to which such water is to be put. In such event, the State shall reduce deliveries to each contractor in an amount which bears the same proportion to the total amount of such necessary further reduction that the contractor's annual entitlement bears to the total of the annual entitlements of all contractors for that year, all as determined by the State: Provided, That the State may apportion on some other basis if such is required to meet minimum demands for domestic supply, fire protection, or sanitation during the year. The foregoing provisions of this subdivision shall be inoperative to the extent that a contractor's annual entitlement for the respective year reflects established rights under the area of origin statutes precluding a reduction in deliveries to such contractor.

(b) In the event that the State is unable to construct sufficient additional conservation facilities to prevent a reduction in the minimum project yield below the total of the maximum annual entitlements of all contractors, or if for any other reason there is such reduction in the minimum project yield, which, notwithstanding preventive or remedial measures taken or to be taken by the State, threatens a permanent shortage in the supply of project water to be made available to the contractors:

(1) The annual entitlements and the maximum annual entitlements of all contractors, except to the extent such entitlements may reflect established rights under the area of origin statutes, shall, by amendment of Table A, included in Article 6(c) and of Article 7(b), respectively, be reduced proportionately by the State to the extent necessary so that the sum of the revised maximum annual entitlements of all contractors will then equal such reduced

minimum project yield: Provided, That appropriate adjustment in the contractors' respective financial obligations to the State under the Transportation Charge shall be made in accordance with such reduced entitlements if such reductions have not been strictly proportionate throughout.

(2) The District, at its option, shall have the right to use any of the project transportation facilities which by reason of such reduction in the minimum project yield are not required for delivery of project water to the District, to transport water procured by it from any other source: Provided, That such use shall be within the limits of the capacities provided in this project transportation facilities for service to the District under this contract: Provided further, That except to the extent such limitation in Section 12931 of the Water Code be changed, the District shall not use the project transportation facilities under this option to transport water the right to which was secured by the District through eminent domain unless such use be approved by the Legislature by concurrent resolution with a majority of members elected to each house voting in favor thereof.

(c) In the event that the State, because of the establishment by a party of a prior right to water under the provisions of Sections 11460 through 11463 of the Water Code, enters into a contract with such party for a dependable supply of project water, which contract will cause a permanent shortage in the supply of project water to be made available to the District hereunder:

(1) The State shall: (i) equitably redistribute the costs of all transportation facilities included in the System among all contractors for project water, taking into account the diminution of the supply to the District and other prior contractors and the payments theretofore made by the District and other prior contractors in accordance with the

terms of their contracts, and (ii) revise the District's annual entitlements and maximum annual entitlement, by amendment of Table A, included in Article 6(c), and of Article 7(b), respectively, to correspond to the reduced supply of project water to be made available to the District:

Provided, That such redistribution of costs of transportation facilities shall not be made until there has been reasonable opportunity for the District to exercise the option provided for in (2) below, and for other prior contractors to exercise similar options.

(2) The District, at its option, shall have the right to use any of the project transportation facilities which by reason of such permanent shortage in the supply of project water to be made available to the District are not required for delivery of project water to the District, to transport water procured by it from any other source: Provided, That such use shall be within the limits of the capacities provided in the project transportation facilities for service to the District under this contract: Provided further, That, except to the extent such limitation in Section 12931 of the Water Code be changed, the District shall not use the project transportation facilities under this option to transport water the right to which was secured by the District through eminent domain unless such use be approved by the Legislature by concurrent resolution with a majority of the members elected to each house voting in favor thereof. This option shall terminate upon a redistribution of costs of transportation facilities by the State pursuant to (1) above. In the event that this option is exercised, the State shall take such fact into account in making such redistribution of costs, and shall offset such use as is made of the project transportation facilities pursuant thereto against any reduction in the District's payment obligation hereunder resulting from such redistribution of costs.

(d) If after any revision of annual entitlements and maximum annual entitlements pursuant to subdivisions (b) or (c) of this article, circumstances arise which, in the

judgment of the State, justify a revision upward of the same, the State shall, with the consent of the affected contractor, reinstate proportionately the previously reduced entitlements of such contractor to the extent deemed justified, and shall equitably redistribute the costs of the project transportation facilities if inequities would otherwise occur as a result of such reinstatement of entitlements.

(e) The State shall give the District written notice as far in advance as possible of any reduction in deliveries to it under subdivision (a) of this article and, to the extent possible, shall give the District written notice five (5) years in advance of any reduction in its annual entitlements and maximum annual entitlement under subdivisions (b) or (c) of this article. Reports submitted to the District pursuant to Article 16(c) may constitute such notices.

(f) Neither the State nor any of its officers, agents, or employees shall be liable for any damage, direct or indirect, arising from shortages in the amount of water to be made available for delivery to the District under this contract caused by drought, operation of area of origin statutes, or any other cause beyond its control.

(g) The provisions of this article, with the exception of subdivision (f) hereof, shall not apply to shortages in the supply of Bureau water available for delivery to the contractors.

19. Water Quality.

(a) It shall be the objective of the State and the State shall take all reasonable measures to make available, at all delivery structures for delivery of project water to the District, project water of such quality that the following constituents do not exceed the concentrations stated as follows:

WATER QUALITY OBJECTIVES FOR ALAMEDA COUNTY  
FLOOD CONTROL AND WATER CONSERVATION DISTRICT

<u>Constituent</u>	<u>Unit</u>	<u>Monthly Average</u>	<u>Average for any 10-year Period</u>	<u>Maximum</u>
Total Dissolved Solids	ppm.	440	220	-
Total Hardness	ppm.	180	110	-
Chlorides	ppm.	110	55	-
Sulfates	ppm.	110	20	-
Sodium Percentage	%	50	40	-
Fluoride	ppm.	-	-	1.5
Lead	ppm.	-	-	0.1
Selenium	ppm.	-	-	0.05
Hexavalent Chromium	ppm.	-	-	0.05
Arsenic	ppm.	-	-	0.05
Iron and Manganese together	ppm.	-	-	0.3
Magnesium	ppm.	-	-	125.0
Copper	ppm.	-	-	3.0
Zinc	ppm.	-	-	15.0
Phenol	ppm.	-	-	0.001

(b) The State shall regularly take samples of water at each delivery structure for delivery of project water to the District, and shall make chemical and physical analyses and tests of such samples. The State shall keep accurate and complete records of all such analyses and tests, which records shall be available for inspection by the District at any time or times.

(c) If through no negligence of the State or its officers, agents, or employees, the State is unable to attain the quality objectives set forth in subdivision (a) of this article, neither the State nor any of its officers, agents, or employees shall be liable in any manner whatsoever for such deviation from said quality objectives.

(d) The provisions of this article shall not apply to Bureau water made available for delivery to the District.

20. Suspension of Service. In the event of any default by the District in the payment of any money required to be paid to the State hereunder, the State may, upon not less than six months' notice to the District, suspend deliveries of water under this contract for so long as such default continues: Provided, That during such period that District shall remain obligated to make all payments required under this contract: Provided further, That notwithstanding the above notice provision, no Bureau water shall be furnished to the District pursuant to Article 6(b) if the District is in arrears in the payment to the State of any charges of the State levied or established by the State hereunder and necessary for the purpose of raising revenues to meet the payment by the State to the United States of the State's obligation under the Bureau-State contract. Action taken pursuant to this article shall not deprive the State of or limit any remedy provided by this contract or by law for the recovery of money due or which may become due under this contract.

21. Sale of Surplus Water. If during any year the supply of project water, after appropriate allowance for holdover storage, exceeds the total of annual entitlements of all

contractors for that year, the State shall offer to sell and deliver such surplus water for periods expiring not later than the end of such year, without right of renewal, and in a manner and at prices which will return to the State the largest net revenues practicable, and at the minimum, revenues equal to the variable operation, maintenance and power costs incurred in such service of surplus water: Provided, That such service of surplus water shall not interfere with the delivery of their respective annual entitlements to those contractors which do not receive surplus water in such year: Provided further, That not until a contractor accepts delivery during such year of its annual entitlement for that year and either pays or incurs a payment obligation for such annual entitlement in accordance with the payment provisions of its contract, shall surplus water be sold to such contractor at prices less than those which would result under the application of the payment provisions of its contract: Provided further, That if, in the judgment of the State, the annual entitlement of a contractor desiring to purchase surplus water is unrealistically low for the year in which such purchase is to be made, the State shall, for the purpose of pricing such water in accordance with the second proviso above, consider such annual entitlement to be an increased amount determined by the State to accurately correspond to such contractor's actual requirements for project water in that year. All net revenues from the service of surplus water shall be applied in such manner that all contractors which contribute to the payment of the costs of any System facilities by which surplus water was conserved and transported in connection with such service will receive credit for a share of such net revenues in the proportion that each such contractor contributes to payment of such costs. The service of surplus water shall, in every case, be subject to the paramount right and obligation of the State to discontinue the same, in whole or in part, when required for service of project water to contractors.

## C. PAYMENT PROVISIONS

### 21.5 Bureau Water Charge.

(a) The payments to be made by each contractor receiving service of Bureau water shall include an annual charge, during the period of such service, designated as the Bureau Water Charge. This charge shall return to the State during such period all amounts paid to the Bureau by the State to obtain water for the contractor under the Bureau-State contract. For each contractor, the Bureau Water Charge shall be the sum of the following: (1) the product of \$3.50 and that portion of the amount of water to be made available for delivery to the contractor in the respective Bureau water year under its contract which is Bureau agricultural water as determined by the State; (2) the product of \$10.00 and that portion of the amount of water to be made available for delivery to the contractor in the respective Bureau water year under its contract which is Bureau municipal, industrial and domestic water as determined by the State; and (3) the cost of the pro-rata share of water lost from the project transportation facilities due to evaporation, leakage, seepage, or other causes, taking into account the quantities of Bureau agricultural water and Bureau municipal, industrial and domestic water made available for delivery to the contractor in the respective Bureau water year under its contract: Provided, That if in any year the amount of Bureau water to be made available for delivery to the contractor under its contract is reduced by reason of shortage as provided in Article 6(b)(1), the Bureau Water Charge shall be computed on the basis of such reduced amount. In computing the charge, the State shall determine the amounts of Bureau agricultural water and Bureau municipal, industrial, and domestic water to be made available for delivery to the contractor on the basis of estimates of Bureau water use, taking into account measurements of past surface use of such water made pursuant to subdivision (c) of this article: Provided, That seventy-five percent (75%)

of all Bureau water delivered to the District under this contract and used for ground water recharge or storage shall be deemed to be Bureau agricultural water and the remainder Bureau municipal, industrial, and domestic water: Provided further, That seventy-five percent (75%) of the amount of Bureau water made available for delivery to the District under this contract in the first year of such delivery shall be deemed to be Bureau agricultural water and the remainder Bureau municipal, industrial, and domestic water.

(b) The District's failure or refusal to accept delivery of Bureau water made available for delivery to it under Article 6(b) and Table A included in Article 6(c) shall not affect the computation of the Bureau Water Charge as provided for in subdivision (a) of this article and shall in no way relieve the District of its obligation to make payment of the charge, as so computed, pursuant to Article 29.

(c) The District shall measure separately, with equipment satisfactory to the State, Bureau water delivered to it for ground water recharge, Bureau agricultural water delivered to it for surface use, and Bureau municipal, industrial, and domestic water delivered to it for surface use, and shall keep and maintain accurate and complete records thereof. At any time or times, the State may inspect such measuring equipment, and the measurements and records taken therefrom.

(d) Obligations of the District arising out of, pursuant, or incidental to the Bureau-State contract shall constitute a general obligation of the District notwithstanding the default in the payment to the District by individual water users of assessments, tolls, or other charges levied by or owing to the District and the District agrees to use all powers and resources available to it under the laws of the State of California to collect the funds necessary to meet such obligations.

22. Delta Water Charge.

(a) The payments to be made by each contractor for project water shall include an annual charge designated as the Delta Water Charge. This charge, together with the total revenues derived during the project repayment period from the sale or other disposal of electrical energy generated in connection with operation of project conservation facilities, shall return to the State during the project repayment period all costs of the project conservation facilities, including capital, operation, maintenance, power, and replacement costs, which are allocated to the purpose of water conservation in, above, and below the Delta pursuant to subdivision (e) of this article during the project repayment period. Wherever reference is made, in connection with the computation or determination of the Delta Water Charge, to the costs of any facility or facilities included in the System, such reference shall be only to those costs of such facility or facilities which are reimbursable by the contractors as determined by the State.

(b) For each contractor receiving project water in any year through December 31, 1969, the Delta Water Charge shall be the product of \$3.50 and the contractor's annual entitlement to project water for the respective year. After that date, the Delta Water Charge shall consist and be the sum of the following components as these are computed in accordance with subdivisions (c) and (d) of this article: a capital cost component; a minimum operation, maintenance, power, and replacement component; and a variable operation, maintenance, power, and replacement component.

(c) The capital cost, the minimum operation, maintenance, power, and replacement, and the variable operation, maintenance, power, and replacement components of the Delta Water Charge, together with that portion of the revenues derived during the project repayment period from the sale or other disposal of electrical energy generated in connection

with operation of project conservation facilities which is allocated by the State to repayment of the respective category of costs, shall return to the State during the project repayment period, respectively, the following categories of the costs allocated to the purpose of water conservation in, above, and below the Delta pursuant to subdivision (e) of this article: (1) capital costs; (2) operation, maintenance, power, and replacement costs incurred irrespective of the amount of project water delivered to the contractors; and (3) operation, maintenance, power, and replacement costs incurred in an amount which is dependent upon and varies with the amount of project water delivered to the contractors: Provided, That each of the above categories of costs shall be inclusive of the appropriate costs properly chargeable to the generation and transmission of electrical energy in connection with operation of project conservation facilities. Each component of the Delta Water Charge shall be computed on the basis of a rate which, when charged during the project repayment period for each acre-foot of the sum of the yearly totals of annual entitlements of all contractors, will be sufficient, together with that portion of the revenues derived during the project repayment period from the sale or other disposal of electrical energy generated in connection with operation of project conservation facilities which is allocated by the State to repayment of the respective category of costs, to return to the State during the project repayment period all costs included in the respective category of costs covered by that component. Each such rate shall be computed in accordance with the following formula:

$$\frac{(c_1 - r_1)(1+i)^{-1} + (c_2 - r_2)(1+i)^{-2} + \dots + (c_n - r_n)(1+i)^{-n}}{e_1(1+i)^{-1} + e_2(1+i)^{-2} + \dots + e_n(1+i)^{-n}}$$

Where:

- $i$  = The project interest rate.
- $c$  = The total costs included in the respective category of costs for the respective year of the project repayment period.
- $r$  = That portion of the revenues derived from the sale or other disposal of electrical energy allocated by the State to repayment of the costs included in the respective category for the respective year of the project repayment period.

1, 2, and  $n$   
appearing  
below  $c$  and

- $r =$  The respective year of the project repayment period for which costs are included in the respective category,  $n$  being the last year of the project repayment period.
- $e =$  With respect to the capital cost and minimum operation, maintenance, power, and replacement components; the total of annual entitlements to project water of all contractors for the respective year of the project repayment period.
- $e =$  With respect to the variable operation, maintenance, power, and replacement component, the total of the amounts of project water delivered to all contractors for the respective year of the expired portion of the project repayment period, together with the total of annual entitlements to project water of all contractors for the respective year of the unexpired portion of the project repayment period.

1, 2, and  $n$   
appearing  
below

- $e =$  The respective year of the project repayment period in which the annual entitlements or project water deliveries occur,  $n$  being the last year of the project repayment period.

$n$  used  
as an  
exponent =

The number of years in the project repayment period.

(d) The capital cost and minimum operation, maintenance, power, and replacement components of the Delta Water Charge shall be the product of the appropriate rate computed under subdivision (c) of this article, and the contractor's annual entitlement to project water for the respective year. The variable operation, maintenance, power, and replacement component of the charge shall be the product of the appropriate rate computed under subdivision (c) of this article and the number of acre-feet of project water delivered to the contractor during the respective year: Provided, That when project water has been requested by a contractor and delivery thereof has been commenced by the State, and, through no fault of the State, such water is wasted as a result of failure or refusal by the contractor to accept delivery thereof, said variable component during such period shall be the product of said rate per acre-foot and the sum of the

number of acre-feet of project water delivered to the contractor and the number of acre-feet wasted.

(e) Prior to the time that additional project conservation facilities or supplemental conservation facilities are constructed, the Delta Water Charge shall be determined on the basis of an allocation to project purposes, by the separable costs-remaining benefits method, of all projected costs of all those initial project conservation facilities located in and above the Delta, and upon an allocation to the purposes of water conservation and water transportation, by the proportionate use of facilities method, of all projected costs of the following project facilities located below the Delta: The aqueduct intake facilities at the Delta, Pumping Plant I, the aqueduct from the Delta to San Luis Forebay, San Luis Forebay, and San Luis Reservoir: Provided, That all of the projected costs properly chargeable to the generation and transmission of electrical energy in connection with operation of project conservation facilities shall be allocated to the purpose of water conservation in, above, and below the Delta: Provided further, That allocations to purposes the costs of which are to be paid by the United States shall be as determined by the United States. Commencing in the year in which the State first incurs capital costs for construction of additional project conservation facilities, the Delta Water Charge shall be determined on the basis of the foregoing allocations and upon an allocation to project purposes, by the separable costs-remaining benefits method and subject to the foregoing provisos, of all projected costs of such additional project conservation facilities.

(f) The rates to be used in determining the components of the Delta Water Charge pursuant to subdivision (d) of this article and to become effective on January 1, 1970, shall be computed by the State in accordance with subdivision (c) of this article prior to that date. Such computation shall include an adjustment which shall account for the difference, if any,

between revenues received by the State under the Delta Water Charge prior to January 1, 1970, and revenues which would have been received under the charge prior to that date had it been computed and charged in accordance with subdivision (c) and (d) of this article. Upon such computation, a document establishing such rates shall be prepared by the State and attached to this contract as an amendment of this article. The State shall recompute such rates each year thereafter, and each such recomputation shall take account of and reflect increases or decreases from year to year in projected costs, outstanding reimbursable indebtedness of the State incurred to construct the project conservation facilities described in subdivision (e) of this article, annual entitlements, deliveries of project water, project interest rate, revenues from the sale or other disposal of electrical energy, and all other factors which are determinative of such rates. In addition, each such recomputation shall include an adjustment of the rates for succeeding years which shall account for the differences, if any, between projections of costs used by the State in determining said rates for all preceding years, and actual costs incurred by the State during such years. Upon each such recomputation, an appropriately revised copy of the document establishing such rates shall be prepared by the State and attached to this contract as an amendment of this article.

(g) Upon the construction of supplemental conservation facilities, the Delta Water Charge shall be paid by all contractors for supplemental water, as well as by contractors for project water, and, together with revenues derived from the sale or other disposal of electrical energy generated in connection with operation of project conservation facilities and supplemental conservation facilities, shall return to the State, in addition to those costs of the project conservation facilities allocated to the purpose of water conservation in, above, and below the Delta pursuant to subdivision (e) of this article, all costs of such supplemental

conservation facilities, including capital, operation, maintenance, power, and replacement costs, which are allocated to the purpose of water conservation in, above, and below the Delta pursuant hereto. Commencing in the year in which the State first incurs capital costs for construction of supplemental conservation facilities, the Delta Water Charge shall be determined on the basis of the allocations made pursuant to subdivision (e) of this article, and upon an allocation to project purposes, by the separable costs-remaining benefits method and subject to provisos corresponding to those contained in said subdivision (e), of all projected costs of such supplemental conservation facilities. Commencing in the same year, the computation of the rates to be used in determining the components of the Delta Water Charge shall include the annual entitlements to water under all contracts for supplemental water. If the repayment period of any bonds sold to construct supplemental conservation facilities extends beyond the project repayment period, the Delta Water Charge shall be determined and redetermined on the basis of such extended repayment period as the State determines to be appropriate.

23. Transportation Charge. The payments to be made by each contractor entitled to delivery of project water from the project transportation facilities shall include an annual charge under the designation Transportation Charge. This charge shall return to the State during the project repayment period those costs of all project transportation facilities necessary to deliver project water to the contractor, including capital, operation, maintenance, power, and replacement costs, which are allocated to the contractor during the project repayment period in accordance with the cost allocation principles and procedures hereinafter set forth. Wherever reference is made, in connection with the computation, determination, or payment of the Transportation Charge, to the costs of any facility or facilities included in the System, such reference shall be only to those costs of such facility or facilities which are reimbursable by the

contractors as determined by the State. The Transportation Charge shall consist of a capital cost component; a minimum operation, maintenance, power, and replacement component; and a variable operation, maintenance, power, and replacement component, as these components are defined in and determined under Articles 24, 25, and 26, respectively. For the purpose of allocations of costs pursuant to said articles, the project transportation facilities shall be segregated into such aqueduct reaches as are determined by the State to be necessary for such allocations of costs. Subject to such modifications as are determined by the State to be required by reason of any request furnished by the District to the State pursuant to Article 17 (a) of this contract, or by reason of contracts entered into by the State with other contractors, the aqueduct reaches of the project transportation facilities are established as follows: Provided, That those costs of the aqueduct reaches from the Delta through the outlet of San Luis Reservoir which are allocated to the purpose of water conservation in, above, and below the Delta for the purpose of determining the Delta Water Charge, as hereinbefore set forth, shall not be included in the Transportation Charge.

Aqueduct Reach	Major Features of Reach
Delta to Bethany Forebay:	Intake Canal Fish Protective Facilities Aqueduct Pumping Plant I Aqueduct (Including Interim Intake Canal and Interim Pumping Plant)
Bethany Forebay to Doolan-Livermore Junction	South Bay Pumping Plant Aqueduct – min. capacity 300 cfs
Patterson Reservoir to Del Valle turnout:	Aqueduct – min. capacity 265 cfs
Del Valle Branch:	Del Valle Reservoir Del Valle Pumping Plant Aqueduct – min. capacity 108 cfs

24. Transportation Charge – Capital Cost Component.

(a) The capital cost component of the Transportation Charge shall be sufficient to return to the State those capital costs of the project transportation facilities necessary to deliver water to the contractor which are allocated to the contractor pursuant to subdivision (b) of this article. The amount of this component shall be determined in two steps as follows: (1) an allocation of capital costs to the contractor, and (2) a computation of annual payment of such allocated capital costs and interest thereon, computed at the project interest rate and compounded annually, to be made by the contractor.

(b) In the first step, the total amount of capital costs of each aqueduct reach to be returned to the State shall be allocated among all contractors entitled to delivery of project water from or through the reach by the proportionate use of facilities method of cost allocation and in accordance with (1) and (2) below. The measure of the proportionate use of each contractor of each reach shall be the average of the following two ratios: (1) the ratio of the contractor's maximum annual entitlement to be delivered from or through the reach to the total of the maximum annual entitlements of all contractors to be delivered from or through the reach, and (ii) the ratio of the capacity provided in the reach for the transport and delivery of project water to the contractor to the total capacity provided in the reach for the transport and delivery of project water to all contractors served from or through the reach. Allocations of capital costs to the District pursuant hereto shall be on the basis of relevant values which will be set forth in Table B by the State as soon as designs and cost estimates are prepared by it subsequent

**BLANK PAGE FOR TABLE B**

<Published as Tables B-1 and B-2 in Bulletin 132>

to receipt of requests from the District as to the maximum monthly delivery capability to be provided in each aqueduct reach of the project transportation facilities for the transport and delivery of project water to the District, pursuant to Article 17(a): Provided, That these values shall be subject to redetermination by the State in accordance with Article 28: Provided further, That the principles and procedures set forth in this subdivision shall be controlling as to allocations of capital costs to the District.

(1) The total amount of capital costs allocated to a contractor shall be the sum of the products obtained when there is multiplied, for each aqueduct reach necessary to deliver water to the contractor, the total amount of the capital costs of the reach to be returned to the State under the Transportation Charge by the average of the two foregoing ratios for such reach as said average is set forth in the appropriate table included in its contract.

(2) In the event that excess capacity is provided in any aqueduct reach for the purpose of making project water available in the future to an agency or agencies with which the State has not executed contracts at the time of any allocation of costs pursuant to this subdivision, the prospective maximum annual entitlement or entitlements to be supplied by such excess capacity, as determined by the State, shall be deemed to be contracted for by said agency or agencies for the purpose of such allocation of costs, to the end that the capital costs of providing such excess capacity are not charged to any contractor entitled by virtue of an executed contract to the delivery of project water from or through that aqueduct reach at the time of such allocation. Where additional capacity is provided in any aqueduct reach to compensate for loss of water due to evaporation, leakage, seepage, or other causes, or to compensate for scheduled outages for purposes of necessary investigation, inspection, maintenance, repair or replacement of the facilities of the project facilities, then, for the purpose of any allocation of

costs pursuant to this subdivision: (i) the maximum annual entitlement to be delivered from or through the reach of each contractor entitled to delivery of project water from or through the reach shall be increased by an amount which bears the same proportion to the maximum annual delivery capability provided by such additional capacity that the contractor's maximum annual entitlement to be delivered from or through the reach bears to the total of the maximum annual entitlements to be delivered from or through the reach under all contracts; and (ii) the capacity provided in the reach for each contractor entitled to delivery of project water from or through the reach shall be increased in the same proportion that the contractor's maximum annual entitlement to be delivered from or through the reach is increased pursuant to (i) above.

(3) The projected amounts of capital costs to be allocated annually to the District under the capital cost component of the Transportation Charge shall be determined by the State in accordance with the cost allocation principles and procedures set forth in this subdivision, which principles and procedures shall be controlling as to allocations of capital costs to the District. Such amounts will be set forth in Table C by the State as soon as designs and cost estimates are prepared by it subsequent to receipt of requests from the District as to the maximum monthly delivery capability to be provided in each aqueduct reach for transport and delivery of project water to the District, pursuant to Article 17(a): Provided, That these amounts shall be subject to redetermination by the State in accordance with Article 28.

\* Year in which State commenced construction of project transportation facilities, 1959.

<Table C is published as Table B-14 in Bulletin 132.>

(c) In the second step, the District's annual payment of its allocated capital costs and interest thereon, computed at the project interest rate and compounded annually, shall be determined in accordance with a payment schedule established by the State and determined in accordance with the principles set forth in (1), (2), and (3) below, which principles shall be controlling as to the District's payment of its allocated capital costs. The district's payment schedule will be set forth in Table D by the State as soon as designs and cost estimates are prepared by it subsequent to receipt of requests from the District as to the maximum monthly delivery capability to be provided in each aqueduct reach for transport and delivery of project water to the District, pursuant to Article 17(a): Provided, That the amounts set forth in Table D shall be subject to redetermination by the State, pursuant to Article 28.

(1) The District's annual payment shall be the sum of the amounts due from the District on the District's allocated capital costs for the then current year and for each previous year where each such amount will pay, in not more than fifty (50) equal annual installments of principal and interest, the District's allocated capital costs for the respective year and interest thereon, computed at the project interest rate and compounded annually.

(2) The District may make payments at a more rapid rate if approved by the State.

(3) Such annual payments shall cease when all allocated capital costs and interest thereon, computed at the project interest rate and compounded annually, are repaid.

\* Year in which State commenced construction of project transportation facilities, 1959.

\*\* Year of first payment.

(d) In the event that any contractor, pursuant to Article 12(b), requests delivery capacity in any aqueduct reach which will permit maximum monthly deliveries to such contractor in excess of the percentage amount specified in said Article 12(b) for the uses designated therein, such contractor shall furnish to the State, in advance of the construction of such aqueduct reach, funds sufficient to cover the costs of providing such excess capacity, which funds shall be in an amount which bears the same proportion to the total capital costs of such reach, including the costs of providing such excess capacity, as such excess capacity bears to the total capacity of such reach, including such excess capacity. For the purpose of any allocation of costs pursuant to subdivision (b) of this article, the total capital costs of such aqueduct reach shall be allocated among all contractors entitled to delivery of project water from or through the reach in the following manner: (1) The costs which would have been incurred for such reach had no such excess capacity been provided shall be estimated by the State and allocated among all such contractors in the manner provided in said subdivision (b); and (2) the amount of the difference between said estimated costs and the projected actual costs of such reach shall be allocated to the contractor or contractors for which such excess capacity is provided. Where such excess capacity is provided for more than one contractor, the costs allocated to them under (2) above shall be further allocated between or among them in amounts which bear the same proportion to the total of said allocated costs as the amount of such excess capacity provided for the respective contractor bears to the total of such excess capacity provided in such reach. In the event that the funds advanced by a contractor pursuant to this subdivision are more or less than the costs so allocated to such contractor under (2) above, the account of such contractor shall be credited or debited accordingly.

(e) The District's allocated capital costs for the year 1962, pursuant to subdivision (c) of this article shall consist of the sum of the District's allocated capital costs for each year through December 31, 1962, and interest thereon, computed at the project interest rate and compounded annually.

25. Transportation Charge – Minimum Operation, Maintenance, Power, and Replacement Component.

(a) The minimum operation, maintenance, power, and replacement component of the Transportation Charge shall return to the State those costs of the project transportation facilities necessary to deliver water to the contractor which constitute operation, maintenance, power, and replacement costs incurred irrespective of the amount of project water delivered to the contractor and which are allocated to the contractor pursuant to (b) below:

Provided, That to the extent permitted by law, the State may establish reserve funds to meet anticipated minimum replacement costs; and deposits in such reserve funds by the State: (1) shall be made in such amounts that such reserve funds will be adequate to meet such anticipated costs as they are incurred, and (2) shall be deemed to be a part of the minimum replacement costs for the year in which such deposits are made.

(b) The total projected minimum operation, maintenance, power, and replacement costs of each aqueduct reach of the project transportation facilities for the respective year shall be allocated among all contractors entitled to delivery of project water from said facilities by the proportionate use of facilities method of cost allocation, in the same manner and upon the same bases as are set forth for the allocation of capital costs in Article 24: Provided, That such minimum operation, maintenance, power, and replacement costs as are incurred generally for the project transportation facilities first shall be allocated to each aqueduct reach in an amount which bears the same proportion to the total amount of such general costs that the amount of the costs incurred directly for the reach bears to the total of all direct costs for all aqueduct reaches.

(c) The amount to be paid each year by the District under the minimum operation, maintenance, power, and replacement component of the Transportation Charge shall be determined in accordance with subdivision (b) of this article on the basis of the relevant values to be set forth for the respective aqueduct reaches in Table B, included in Article 24: Provided, That these values shall be subject to redetermination by the State in accordance with Article 28. Such amounts and any interest thereon shall be set forth by the State in Table E as soon as designed and cost estimates have been prepared by it subsequent to receipt of requests from the District as to the maximum monthly delivery capability to be provided in each aqueduct reach for transport and delivery of project water to the District, pursuant to Article 17(a): Provided, That the amounts set forth in Table E shall be subject to redetermination by the State in accordance with Article 28.

and each succeeding year thereafter, for the term of this contract.	

\* Payment shall start with respect to each aqueduct reach in the year following the year in which the State completes construction of the respective reach.

\*\* Year in which the State commenced construction of the project transportation facilities, 1959.

26. Transportation Charge – Variable Operation, Maintenance, Power, and Replacement Component.

(a) The variable operation, maintenance, power, and replacement component of the Transportation Charge shall return to the State those costs of the project transportation facilities necessary to deliver water to the contractor which constitute operation, maintenance, power and replacement costs incurred in an amount which is dependent upon and varies with the amount of project water delivered to the contractor and which are allocated to the contractor pursuant to (1) and (2) below: Provided, That to the extent permitted by law, the State may establish reserve funds to meet anticipated variable replacement costs; and deposits in such reserve funds by the State: (1) shall be made in such amounts that such reserve funds will be adequate to meet such anticipated costs as they are incurred, and (2) shall be deemed to be a part of the variable replacement costs for the year in which such deposits are made. The amount of this component shall be determined as follows:

(1) There shall be computed for each aqueduct reach of the project transportation facilities a charge per acre-foot of water which will return to the State the total projected variable operation, maintenance, power, and replacement costs of the reach for the respective year. This computation shall be made by dividing said total by the number of acre-feet of project water estimated to be delivered from or through the reach to all contractors during the year.

(2) The amount of the variable component shall be the product of the sum of the charges per acre-foot of water, determined under (1) above, for each aqueduct reach necessary to deliver water to the contractor, and the number of acre-feet of project water delivered to the contractor during the year: Provided, That when project water has been

requested by a contractor and delivery thereof has been commenced by the State, and, through no fault of the State, such water is wasted as a result of failure or refusal by the contractor to accept delivery thereof, the amount of said variable component to be paid by such contractor during such period shall be the product of the above sum and the sum of the number of acre-feet of project water delivered to the contractor and the number of acre-feet wasted.

(b) There shall be credited against the amount of the variable component to be paid by each contractor, as determined pursuant to subdivision (a) of this article, a portion of the projected net value of any power recovered during the respective year at project aqueduct power recovery plants located upstream on the particular aqueduct from the delivery structures for delivery of project water to the contractor. Such portion shall be in an amount which bears the same proportion to said projected net value that the number of acre-feet of project water delivered to the contractor through said plants during the year bears to the number of acre feet of project water delivered to all contractors through said plants during the year.

(c) The amount to be paid each year by the District under the variable operation, maintenance, power, and replacement component of the Transportation Charge shall be determined in accordance with subdivision (a) of this article for the respective aqueduct reaches in Table B, included in Article 24. Such amounts and any interest thereon shall be set forth by the State in Table F as soon as designs and cost estimates are prepared by it subsequent to receipt of requests from the District as to the maximum monthly delivery capability to be provided in each aqueduct reach for transport and delivery of project water to the District, pursuant to Article 17(a): Provided, That the amounts set forth in Table F shall be subject to redetermination by the State in accordance with Article 28.

---

\* Year in which State commenced construction of project transportation facilities, 1959.

\*\* Year of first payment.

28. Transportation Charge – Redetermination. The State shall redetermine the values and amounts set forth in the tables included in Articles 24 through 27 of this contract in 1962 and each year thereafter in order that the Transportation Charge to the District and the components thereof may accurately reflect increases or decreases from year to year in projected costs, outstanding reimbursable indebtedness of the State incurred to construct the project transportation facilities described in Article 23, annual entitlements, estimated deliveries, project interest rate, and all other factors which are determinative of such charges. In addition, each such redetermination shall include an adjustment of the components of the Transportation Charge to be paid by the District for succeeding years which shall account for the differences, if any, between projections of costs used by the State in determining the amounts of said components for all preceding years and actual costs incurred by the State during such years. Upon each such redetermination, appropriately revised copies of the tables included in Articles 24 through 27 shall be prepared by the State and attached to this contract as amendments of those articles respectively.

29. Time and Method of Payment.

(a) Payments by the District under the Bureau Water Charge shall commence in the year when Bureau water is first made available for delivery to the District pursuant to Article 6(b).

(b) Payments by the District under the Delta Water Charge shall commence in the year of initial project water delivery to the District.

(c) Payments by the District under the capital cost component of the Transportation Charge shall commence in 1963.

(d) Payments by the District under the minimum operation, maintenance, power, and replacement component of the Transportation Charge shall commence for each aqueduct reach in the year following the year in which construction of that reach is completed, or in the year of initial water delivery, whichever is earlier.

(e) Payments by the District under the variable operation, maintenance, power, and replacement component of the Transportation Charge shall commence in the year of initial water delivery to the District.

(f) The State shall, on or before July 1 of each year, commencing with the year preceding the year in which payment of the respective charge is to commence pursuant to this article, furnish the District with a written statement of: (1) The Bureau Water Charge to the District for the next succeeding Bureau water year; (2) the charges to the District for the next succeeding year under the capital cost and minimum operation, maintenance, power, and replacement components of the Delta Water Charge and Transportation Charge; (3) the unit charges to the District for the next succeeding year under the variable operation, maintenance, power, and replacement components of said Delta Water Charge and Transportation Charge; and (4) the total charges to the District for the preceding year under the variable operation, maintenance, power, and replacement components of said Delta Water Charge and Transportation Charge: Provided, That through December 31, 1969, the Delta Water Charge shall be based upon a unit rate of \$3.50 per acre-foot and shall be paid by the contractors on the basis of their respective annual entitlements to project water, as provided in Article 22(b): Provided Further, that the first such statement shall be provided by the State as soon after the execution of this contract as is feasible. All such statements shall be accompanied by the latest revised copies of the document amendatory to Article 22 and of the tables included in Articles 24

through 27 of this contract, together with such other data and computations used by the State in determining the amounts of the above charges as the State deems appropriate. The State shall, on or before the fifteenth day of each month of each year, commencing with the year of initial water delivery to the District, furnish the District with a statement of the charges to the District for the preceding month under the variable operation, maintenance, power, and replacement components of the Delta Water Charge and Transportation Charge. Such charges shall be determined by the State in accordance with the relevant provisions of Articles 22 and 26 of this contract, upon the basis of metered deliveries of project water to the District, except as otherwise provided in those articles.

(g) The District shall pay to the State, on or before February 1 of each year, commencing as provided in subdivision (a) of this article, one-half (1/2) of the Bureau Water Charge to the District for the Bureau water year as stated pursuant to subdivision (f) of this article, and shall pay the remainder of said charge prior to the time that the amount of Bureau water made available for delivery to the District under its water delivery schedule for that 12-month period, established pursuant to Article 12, equals the amount for which payment has been made, but in any event not later than July 1 of that year.

(h) The District shall pay to the State, on or before January 1 of each year, commencing with the year in which payment of the respective charge is to commence pursuant to this article, one-half (1/2) of the charge to the District for the year under the capital cost component of the Delta Water Charge and one-half (1/2) of the charge to the District for the year under the capital cost component of the Transportation Charge, as such charges are stated pursuant to subdivision (f) of this article; and shall pay the remaining one-half (1/2) of each of said charges on or before July 1 of that year.

(i) The District shall pay to the State, on or before the first day of each month of each year, commencing with the year of initial water delivery to the District, one-twelfth (1/12) of the sum of the charges to the District for the year under the minimum operation, maintenance, power, and replacement components of the Delta Water Charge and Transportation Charge, respectively, as such charges are stated pursuant to subdivision (f) of this article.

(j) The District shall pay to the State on or before the fifteenth day of each month of each year, commencing with the year of initial water delivery to the District, the charges to the District under the variable operation, maintenance, power, and replacement components of the Delta Water Charge and Transportation Charge, respectively, for which a statement was received by the District during the preceding month pursuant to subdivision (f) of this article, as such charges as stated in such statement.

(k) In the event that the District in good faith contests the accuracy of any statement submitted to it pursuant to subdivision (f) of this article, it shall give the State notice thereof at least ten (10) days prior to the day upon which payment of the stated amounts is due. To the extent that the State finds the District's contentions regarding the statement to be correct, it shall revise the statement accordingly, and the District shall make payment of the revised amounts on or before the due date. To the extent that the State does not find the District's contentions to be correct, or where time is not available for a review of such contentions prior to the due date, the District shall make payment of the stated amounts on or before the due date, but may make the contested part of such payment under protest and seek to recover the amount thereof from the State.

30. Surcharge for Excess Use of Project Water.

(a) As used herein the term “surcharge” shall mean an amount equivalent to the power credit per acre-foot of water, as such credit is determined under and established by subdivision (b) of this article, to be charged to water users other than the United States or the State of California, as hereinafter provided and to the extent permitted by law, for each acre-foot of project water put to agricultural or manufacturing use on excess land. As used herein the term “excess land” shall mean that part of any land held in single beneficial ownership within a contractor’s boundaries, or, where project water is delivered to water users by a retail agency as hereinafter defined, that part of any such land within the service area of such retail agency, which is in excess of 160 acres; or in the case of joint ownership by husband and wife that part of any such land which is in excess of 320 acres.

(b) As used herein, the term “power credit” shall mean the net value accruing to the State from revenues derived from the sale or other disposal of electrical energy generated in connection with operation of initial project conservation facilities after deducting from side revenues the amount necessary to pay capital costs properly chargeable to energy generation and the costs of operation, maintenance, and replacement of the electrical generation facilities. The power credit per acre-foot of water shall be computed in accordance with the following formula:

$$c_1 (1 + i)^{-1} + c_2 (1 + i)^{-2} + \dots + c_n (1 + i)^{-n}$$

---

$$e_1 (1 + i)^{-1} + e_2 (1 + i)^{-2} + \dots + e_n (1 + i)^{-n}$$

where:

- $i$  = The project interest rate.
- $c$  = The projected annual power credit accrued during the respective year of the project repayment.

1, 2, and  $n$   
appearing

below  $c$  = The respective year of the project repayment period during which the power credit is accrued,  $n$  being the last year of the project .

- $e$  = the total of annual entitlements to project water of all contractors for the respective year of the project repayment period.

1, 2, and  $n$   
appearing

below  $e$  = The respective year of the project repayment period in which the annual entitlements occur,  $n$  being the last year of the project repayment period.

$n$  used  
as an

exponent = The number of years in the project repayment period.

The power credit per acre-foot of water is hereby established as \$2.00 until all of the facilities for generation of electrical energy in connection with operation of initial project conservation facilities are installed and in operation. The state shall redetermine the power credit per acre-foot of water each year thereafter in order that it may accurately reflect increases or decreases from year to year in the power credit as defined herein. Each such redetermination shall be in accordance with the method of computation set forth in this subdivision, and upon each such redetermination, a document showing the revised amount of the power credit per acre-foot of water shall be attached to this contract as an amendment of this subdivision.

(c) As used herein the term “retail agency” shall mean any agency which delivers directly to the users thereof, project water made available by, through, or under a contractor.

(d) Each contractor, to the extent that it delivers project water directly to the users thereof, shall require on behalf of the State that each such user on or before June 1 of each year, commencing with the year following the year of initial project water delivery: (1) certify in writing to the contractor on forms prescribed and furnished by the State the description of the excess land owned by such user upon which project water is put to agricultural or manufacturing use, and the amount of project water put to agricultural or manufacturing use on such land during the preceding year; and (2) pay to the contractor for the account of the State a surcharge for the amount of water so certified. Each contractor, to the extent that it delivers project water to a retail agency or to another agency by, through, or under which such water is delivered to a retail agency, shall require on behalf of the State that each water user served by such retail agency be required to, on or before May 1 of each year, commencing with the year following the year of initial project water delivery: (1) certify in writing to the retail agency on forms prescribed and furnished by the State the description of the excess land owned by such user upon which project water is put to agricultural or manufacturing use and the amount of project water put to agricultural or manufacturing use on such land during the preceding year; and (2) pay to the retail agency for the account of the State a surcharge for the amount of project water so certified. Each contractor and retail agency shall be entitled to rely upon the certifications furnished them by water users pursuant to this subdivision, unless notified by the State as to the inaccuracy of any such certification. Payments made to a retail agency pursuant to this subdivision, together with the certifications supporting such payments, shall on behalf of the State be required to be

forwarded to the contractor, which shall in turn forward them to the State on or before July 1 of the year in which they are received; except that where project water has been delivered to the retail agency by, through, or under an agency or agencies other than the contractor, such payments and certifications shall on behalf of the State be required to be forwarded by the retail agency to the agency from which it received project water and by that agency, et seq., to the contractor, which shall forward them to the State on or before July 1 of the year in which they are received.

(e) In the event that a contractor, retail agency, or water user commingles project water with water from another source in a common distribution system, the contractor shall, in complying with the provisions of this article, adhere to the following rules, and, where project water is delivered by it to a retail agency or to another agency by, through, or under which project water is delivered to a retail agency, as contemplated in subdivision (d) of this article, shall require on behalf of the State that such retail agency adhere or be required to adhere to the same rules.

(1) If the amount of nonproject water applied in any year within the area served with project water by the contractor or retail agency is equal to or greater than the amount of water put to agricultural or manufacturing use on all excess land within that area during such year, it shall be presumed that the water put to agricultural or manufacturing use on such excess land is nonproject water, and there shall be no surcharge to water users in that area.

(2) If the amount of nonproject water applied in any year within the area served with project water by the contractor or retail agency is less than the amount of water put to agricultural or manufacturing use on all excess land within that area during such year, it shall be presumed, for the purpose of determining the payments to be made under the surcharge

by water users in that area, that the amount of project water put to agricultural or manufacturing use on excess land of a particular ownership within that area during such year bears the same proportion to the total amount of water so used on that excess land during such year as the total amount of water applied within that area during such year, less that total amount of nonproject water so applied during such year, bears to the former amount.

(3) Project water which reaches the underground prior to delivery to or pumping by a water user shall not be subject to a surcharge under this article.

(f) Subject to subdivision (g) of this article, a contractor shall not be liable for the failure of any retail agency or other agency to perform the obligations imposed upon it in accordance with subdivision (d) of this article.

(g) In the event that any retail agency or other agency by, through, or under which project water is delivered to a retail agency, fails to perform the obligations imposed upon it in accordance with subdivision (e) of this article, the State may take such action in a court of competent jurisdiction, in the name of the contractor and/or agency or agencies by, through, or under which project water is delivered to such retail agency, as it deems necessary to compel the performance of such obligations, and in such action the State shall be subrogated to the rights of such contractor and/or such other agency or agencies against such retail agency or other agency. In the event that any certification furnished by a water user in accordance with subdivision (e) of this article is found by the State to inaccurately represent facts of water use or land ownership, with the result that such user is avoiding payment under the surcharge provided for herein, the State may take such action in a court of competent jurisdiction, in the name of the contractor and/or the retail agency and/or any other agency or agencies by, through, or under which project water is delivered to such water user, as it deems necessary to collect full payment under the

surcharge from such water user and to compel the performance of all obligations imposed upon such water user in accordance with said subdivision (d), and in such action the State shall be subrogated to the rights of such contractor and/or such retail agency and/or such other agency or agencies against such water user. Where project water is delivered by a contractor to a retail agency or to another agency by, through, or under which project water is delivered to a retail agency, as contemplated in subdivision (d) of this article, the contractor shall require on behalf of the State that such retail agency or other agency and all agencies by, through, or under which project water is delivered to a retail agency permit or be required to permit the State to bring the foregoing actions in their respective names and be subrogated to their respective rights as set forth above.

(h) Should the application of any of the provisions of this article in the manner provided for herein result in claims of any nature against a contractor, retail agency, or other agency by, through, or under which project water is delivered to a retail agency, the State shall defend the contractor, retail agency, or other agency, the State shall defend the contractor, retail agency, or other agency against such claims, and shall indemnify them for any liability with respect thereto arising from activities required by the State under this article.

(i) This article shall be separable from all other provisions in this contract, and in the event that any or all of the provisions of this article are in any manner or to any extent held to be invalid by final judgment or decree of a court of competent jurisdiction, such holding and such invalidity shall in no way affect the validity of, or make invalid, any other provision of this contract.

(j) The provisions of this article shall not apply to Bureau water as defined in Article 1(l).

31. Adjustment for Overpayment or Underpayment. If in any year, by reason of errors in computation or other causes, there is an overpayment or underpayment to the State by the District of the charges provided for herein, which overpayment or underpayment is not accounted for and corrected in the annual redetermination of said charges, the amount of such overpayment or underpayment shall be credited or debited, as the case may be, to the District's account for the next succeeding year and the State shall notify the District thereof in writing.

32. Delinquency in Payment.

(a) The governing body of the District shall provide for the punctual payment to the State of payments which become due under this contract.

(b) Upon every amount of money required to be paid by the District to the State pursuant to this contract which remains unpaid after it becomes due and payable, interest shall accrue to the rate of one-half (1/2) of one (1) percent per month of the amount of such delinquent payment from and after the due date until it is paid, and the District hereby agrees to pay such interest: Provided, That no interest shall be charged to or be paid by the District unless such delinquency continues for more than thirty (30) days.

33. Obligation of District to Make Payments.

The District's failure or refusal to accept delivery of project water to which it is entitled under Article 6(c) shall in no way relieve the District of its obligation to make payments to the State as provided for in this contract. The State, however, shall make reasonable efforts to dispose of any water made available to but not required by the District, and any net revenues from such disposal shall be credited to the District's account hereunder.

34. Obligation of District to Levy Taxes and Assessments.

(a) Taxes or assessments levied by the governing body of the District for the purpose of meeting the obligations of this contract shall be enforced and collected by all officers of the District or Zone Seven charged with the duty of enforcing and collecting taxes or assessments levied by the District.

(b) All money collected for taxes or assessments under this article shall be kept in a separate fund by the treasurer or other officer of the District charged with the safekeeping and disbursement of funds of the District, and, upon the written demand of the State, the treasurer or other officer shall pay over to the State all such money in his possession or control then due the State under this contract, which money shall be applied by the State to the satisfaction of the amount due under this contract.

(c) In the event of failure, neglect, or refusal of any officer of the District or Zone Seven to levy any tax or assessment necessary to provide payment by the District under this contract, to enforce or to collect the tax or assessment, or to pay over to the State any money then due the State collected on the tax or assessment, the State may take such action in a court of competent jurisdiction as it deems necessary to compel the performance in their proper sequence of all such duties. Action taken pursuant hereto shall not deprive the State of or limit any remedy provided by this contract or by law for the recovery of money due or which may become due or which may become due under this contract.

#### D. GENERAL PROVISIONS

35. Remedies Not Exclusive. The use by either party of any remedy specified herein for the enforcement of this contract is not exclusive and shall not deprive the party using such remedy of, or limit the application of, any other remedy provided by law.

36. Amendments. This contract may be amended at any time by mutual agreement of the parties, except insofar as any proposed amendments are in any way contrary to applicable law. Such amendments may provide for deferred payment of the capital cost component of the transportation charge subject to the provisions of Article 45 of this contract. The State shall promptly furnish the District with copies of all other contracts now or hereafter executed by the State for a dependable supply of project water, and of any amendments thereof.

37. Reservation With Respect to stat Laws. Nothing herein contained shall be construed as estopping or otherwise preventing the District or any person, firm, association, corporation, or public body or agency claiming by, through, or under the District from contesting by litigation or other lawful means the validity, constitutionality, construction or application of any law of this State, including laws referred to in the Bond Act, or as preventing or prejudicing the amendment or repeal of any such law, and each contract executed by the State for a dependable supply of project water shall contain a similar reservation with respect to State laws.

38. Opinions and Determinations. Where the terms of this contract provide for action to be based upon the opinion, judgment, approval, review, or determination of either party hereto, such terms are not intended to be and shall never be

construed as permitting such opinion, judgment, approval, review, or determination to be arbitrary, capricious, or unreasonable.

39. Contracting Officer of the State. The contracting officer of the State shall be the Director of Water Resources of the State of California and his successors, or their duly authorized representatives. The contracting officer shall be responsible for all discretionary acts, opinions, judgments, approvals, reviews, and determinations required of the State under the terms of this contract.

40. Successors and Assigns Obligated. This contract and all of its provisions shall apply to and bind the successors and assigns of the parties hereto.

41. Assignment. No assignment or transfer of this contract or any part hereof, rights hereunder, or interest herein by the District shall be valid unless and until it is approved by the State and made subject to such reasonable terms and conditions as the State may impose. No assignment or transfer of this contract or any part hereof, rights hereunder, or interest herein by the State shall be valid except as such assignment or transfer is made pursuant to and in conformity with applicable law.

42. Waiver of Rights. Any waiver at any time by either party hereto of its rights with respect to a default or any other matter arising in connection with this contract, shall not be deemed to be a waiver with respect to any other default or matter.

43. Notices. All notices that are required either expressly or by implication to be given by one party to the other under this contract shall be signed for the State by its contracting officer, and for the District by its General Manager and his successors or their duly authorized representatives. All such notices shall be deemed to

have been given if delivered personally or if enclosed in a properly addressed envelope and deposited in a United States Post Office for delivery by registered or certified mail. Unless and until formally notified otherwise, the District shall address all notices to the State as follows:

Director of Water Resources

P.O. Box 388

Sacramento 2, California

And the State shall address all notices to the District as follows:

Alameda County Flood Control and Water Conservation District

224 West Winton Avenue

Hayward, California

44. Maintenance and Inspection of Books, Records, and Reports.

(a) During regular office hours, each of the parties hereto and their duly authorized representatives shall have the right to inspect and make copies of any books, records, or reports of the other party pertaining to this contract or matters related hereto. Each of the parties hereto shall maintain and make available for such inspection accurate records of all of its costs, disbursements and receipts with respect to its activities under this contract and the Bond Act.

(b) The district shall furnish to the Bureau of Reclamation a report on crops raised and agricultural and livestock products produced on the land within Zone Seven. This report shall be furnished to the Regional Director, Region 2, Bureau of Reclamation, Sacramento, annually on or before December 31 for each year in which Bureau water is received, and a copy shall be provided to the State.

45. (a) Contracts executed by the State for a dependable supply of project water from the South bay Aqueduct shall be substantially uniform with respect to basic terms and conditions.

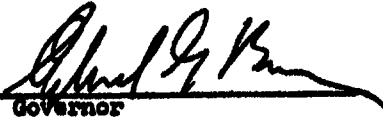

(b) Contracts executed by the State for a dependable supply of project water shall be in substantial conformity with the provisions of the water supply contract between the State and The Metropolitan Water District of Southern California dated November 4, 1960, except as variations are permitted by Article 45 of that contract.

46. Suit on Contract. Each of the parties hereto may sue and be sued with respect to this contract.

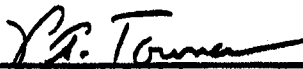

IN WITNESS WHEREOF, the parties hereto have executed this contract on the date first above written.

---

AMENDMENT NO. 1 TO  
CONTRACT BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION  
DISTRICT FOR A WATER SUPPLY FOR ZONE NO. 7

THIS CONTRACT, made this 30th day of December, 1963, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State," and Alameda County Flood Control and Water Conservation District, a public agency in the State of California, duly organized, existing, and acting pursuant to the laws thereof with its principal place of business in Hayward, California, herein referred to as the "District,"

WITNESSETH, That:

WHEREAS, The State is authorized to construct and operate facilities for the storage and conveyance of water, certain of which facilities will make water available to the District; and

WHEREAS, The State and the District have entered into a water supply contract, dated November 20, 1961, providing that the State shall supply certain quantities of water to the District, and providing that the District shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payments; and

WHEREAS, The State and the District are desirous of making certain changes and additions to the above-mentioned contract, while otherwise continuing the contract in full force and effect;

NOW, THEREFORE, It is mutually agreed that the following changes and additions are hereby made to the District's water supply contract with the State:

1. Article 6 is amended by addition of subparagraph (3) at the end of subsection (b) to read as follows:

(3) Service of Bureau water to the District shall extend into the year of initial project water delivery to the District for any portion thereof in which project water is not available for delivery to the District: Provided, That an appropriate portion of the amount of water designated in Table A for said year shall be determined by the State to be Bureau water for the purposes of this contract, in accordance with the District's delivery schedule for that year established pursuant to Article 12.

2. Table A entitled "Annual Amounts of Water to be Made Available For Delivery of Zone 7 of Alameda County Flood Control and Water Conservation District" as set forth in Article 6 is amended to read as follows: See Attached Sheet.

3. Article 7 is amended by amending subdivision (b) and adding subdivisions (c), (d), (e) and (f) as follows:

(b) The maximum amount of project water to be made available to the District in any one year under this contract shall be 46,000 acre-feet, referred to in this contract as the District's maximum annual entitlement, and in no event shall such maximum amount of project water to be made available to the District be increased over this amount, except as is provided for in Articles 8 and 15(c).

(c) Subject to approval by the State and similar rights of other contractors, the District may increase its annual entitlement for any year in which local water supplies available to the District are deficient due to climatic conditions up to the amount of its maximum annual entitlement: Provided, That such increase in delivery of water shall not interfere with the delivery

of their respective annual entitlements to other contractors.

(d) In a year in which the District is unable to accept an amount of project water equal to its annual entitlement for that year because of above-average local water supply available to the District due to climatic conditions which occur subsequent to a year in which the District has increased its annual entitlement pursuant to subdivision (c) of this article, the District may make a reduction in its annual entitlement which shall not exceed the sum of all prior increases in annual entitlement made under subdivision (c) of this article less the sum of all prior decreases in annual entitlement made under this subdivision.

(e) In the event that, due to conditions of above-average local water supply available to the District because of favorable climatic conditions, the District in any year is unable to accept an amount of project water equal to its annual entitlement for said year as set forth in Table A, included in Article 6(c), the District shall remain obligated to make all payments required under this contract, as set forth in Article 9, including the capital cost component and the minimum operation, maintenance, power and replacement component of the Delta Water Charge: Provided, That the District's annual entitlement for said year is not reduced under the provision of subdivision (d) of this article.

(f) In a year in which local water supplies available to the District are deficient because of climatic conditions which occur subsequent to a year in which deliveries to the District have been decreased under subdivision (e) of this article the District may request and the State shall, consistent with similar rights of other contractors, deliver project water in amount greater than the annual entitlement set forth for that year in Table A included in Article 6(c) but not to exceed the sum of all prior amounts of

project water not delivered to the District, but for which the District has paid the capital cost component and the minimum operation, maintenance, power and replacement component of the Delta Water Charge under subdivision (e) of this article, less the sum of all prior deliveries of project water to the District under the provisions of this subdivision: Provided, That the sum of annual entitlement of the District for that year and the amount of water delivered to the District in excess of its annual entitlement under this subdivision shall not exceed the maximum annual entitlement of the District: Provided further, That such increase in delivery of water shall not interfere with the delivery to other contractors of their respective annual entitlements, but shall be paramount to the right of any contractor to receive surplus water.

4. Subdivisions (c) and (d) of Article 12 are amended to read as follows:

(c) In no event shall the State be obligated to deliver water to the District through all delivery structures at a total combined instantaneous rate of flow exceeding Ninety-two (92) cubic feet per second, except as this rate of flow may be revised by amendment of this article after submission to the State of the District's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

(d) If in any year the State, as a result of causes beyond its control, is unable to deliver any portion of the District's annual entitlement for such year under Table A, included in Article 6(c), as provided for in the delivery schedule established for that year, the District may elect to receive the amount of water which otherwise would have been delivered to it during such period at other times during the year or succeeding years, to the extent that such water is then available and such election is consistent with

the State's overall delivery ability considering the then current delivery schedules of all contractors.

5. Article 14(b) is amended to read as follows:

(b) In the event of any discontinuance or reduction of delivery of project water pursuant to subdivision (a) of this article, the District may elect to receive the amount of water which otherwise would have been delivered to it during such period under the water delivery schedule for that year at other times during the year or succeeding years to the extent that such water is then available and such election is consistent with the State's overall delivery ability considering the then current delivery schedules of all contractors.

6. Article 21.5(a) is amended to read as follows:

(a) The payments to be made by each contractor receiving service of Bureau water shall include an annual charge, during the period of such service, designated as the Bureau Water Charge. This charge shall return to the State during such period all amounts paid to the Bureau by the State to obtain water for the contractor under the Bureau-State contract. Payments of this charge shall be made in advance so as to provide the State with sufficient funds to make payments to the Bureau as required under the Bureau-State contract. For each contractor, the Bureau Water Charge shall be the sum of the following: (1) the product of \$3.50 and that portion of the amount of water to be made available for delivery to the contractor in the respective Bureau water year under its contract which is Bureau agricultural water as determined by the State; (2) the product of \$10.00 and that portion of the amount of water to be made available for delivery to the contractor in the respective Bureau water year under its contract which is Bureau municipal, industrial and domestic water as determined by the State; and (3) the cost of the pro-rata share of water lost from the project transportation facilities due to evaporation, leakage, seepage, or other causes, taking into account the quantities of

Bureau agricultural water and Bureau municipal, industrial and domestic water made available for delivery to the contractor in the respective Bureau water year under its contract: Provided, That if in any year the amount of Bureau water to be made available for delivery to the contractor under its contract is reduced by reason of shortage as provided in Article 6(b)(1), the Bureau Water Charge shall be adjusted on the basis of such reduced amount. In computing the charge, the State shall determine the amounts of Bureau agricultural water and Bureau municipal, industrial and domestic water to be made available for delivery to the contractor on the basis of estimates of Bureau water use of such water made pursuant to subdivision (e) of this article: Provided, That seventy-five percent (75%) of all Bureau water delivered to the District under this contract and used for ground water recharge or storage shall be deemed to be Bureau agricultural water and the remainder Bureau municipal, industrial and domestic water: Provided further, That for purposes of the first year's advance payment seventy-five percent (75%) of the amount of Bureau water made available for delivery to the District under this contract shall be estimated to be Bureau agricultural water and the remainder Bureau municipal, industrial and domestic water: Provided further, That an adjustment in the following year's bill shall be made to the extent that the proportion between Bureau agricultural water and Bureau municipal, industrial and domestic water as determined pursuant to this subdivision differs from the estimate.

7. Article 22 is amended by addition of subdivision (h) to read as follows:

(h) Payments by the District pursuant to Articles 7(d) and 7(f) shall be such that the total payments to the State for the capital cost and minimum operation, maintenance, power and replacement components of the Delta Water Charge during the project repayment period shall be the same as if no change in annual entitlement had been made under Article 7(c) and no decrease

in water delivery had been made under Article 7(e).

(1) In the event of a decreased annual entitlement to the District under Article 7(d), the District shall, in addition to the Delta Water Charge computed pursuant to subdivision (d) of this article, pay an amount which shall be the product of the amount of the decrease in the annual entitlement and the difference in the capital cost and minimum operation, maintenance, power and replacement components of the Delta Water Charge for that year and the same components of the Delta Water Charge for the appropriate year in which the annual entitlement was increased under Article 7(e). The appropriate year for which the annual entitlement was so increased shall be the earliest year not offset by a decrease of annual entitlement pursuant to Article 7(d).

(2) In a year in which an increased quantity of water is furnished under Article 7(f), the Delta Water Charge shall be computed pursuant to subdivision (d) of this article, and in addition the District shall pay an amount which shall be the product of such increase in quantity and the difference in the capital costs and minimum operation, maintenance, power and replacement components of the Delta Water Charge for that year and the same components of the Delta Water Charge for the appropriate previous year in which the delivery was less than the annual entitlement as provided under Article 7(e). The appropriate previous year shall be the earliest year in which such water was not delivered under Article 7(e) which has not been offset by increased delivery under Article 7(f).

(3) For the purposes of this subdivision, the capital cost and minimum operation, maintenance, power and replacement components of the Delta Water Charge prior to December 31, 1969, shall be deemed to be three dollars and fifty cents (\$3.50) per acre-foot of water less the variable operation, maintenance, power and replacement component rate computed under subdivision (c) of this article.

8. The table of aqueduct reach descriptions at the end of Article 23 is amended to read as follows:

<u>Aqueduct Reach</u>	<u>Major Features of Reach</u>
Delta through Bethany Forebay:	Intake Canal Fish Protective Facilities Aqueduct Pumping Plant I Aqueduct (Including Interim Intake Canal and Interim Pumping Plant)
Bethany Forebay to Doolan- Livermore Junction:	South Bay Pumping Plant Aqueduct - min. capacity 300 cfs.
Doolan-Livermore Junction through Patterson Reservoir:	Aqueduct - min. capacity 300 cfs. Patterson Reservoir
Patterson Reservoir to Del Valle Branch:	Aqueduct - min. capacity 265 cfs.
Del Valle Branch:	Del Valle Reservoir Del Valle Pumping Plant Aqueduct - min. capacity 108 cfs.
Del Valle Branch to South Livermore Turnout:	Aqueduct - min. capacity 265 cfs.

9. The aqueduct reach descriptions in Table B in Article 24 are amended to read as follows:

<u>Aqueduct Reach</u>
Delta through Bethany Forebay <sup>3</sup> / <sub>1</sub>
Bethany Forebay to Doolan-Livermore Junction
Doolan-Livermore Junction through Patterson Reservoir
Patterson Reservoir to Del Valle Branch
Del Valle Branch
Del Valle Branch to South Livermore Turnout

10. Article 24 is amended by addition of subsection (f) to read as follows:

(f) Notwithstanding any conflicting provisions of Article 24(c) of this contract, payments to be made by the District in the years 1964 through 1971 under the capital cost component of the Transportation Charge shall be the amount of annual interest on the capital costs allocated to the District computed in accordance with this contract. Outstanding capital costs allocated to the District for 1970 and prior years shall be paid by the District, commencing in 1972 so that such capital costs for each such year and interest thereon computed at the project interest rate and compounded annually shall be paid in equal annual installments ending in the fiftieth year following the year for which such costs were allocated to the District. Payment of capital costs allocated to the District in 1971 and subsequent years shall be as provided in Article 24(c).

11. Article 29(g) is amended to read as follows:

(g) The District shall pay to the State, on or before February 1 of each year, commencing as provided in subdivision (a) of this article, one-half (1/2) of the Bureau Water Charge to the District for the Bureau water year as stated pursuant to subdivision (f) of this article, and shall pay the remainder of said charge prior to the time that the amount of Bureau water made available for delivery to the District under its water delivery schedule for the 12-month period, established pursuant to Article 12, equals the amount for which payment has been made, but in any event not later than June 1 of that year.

12. Article 47 is added to the contract to read as follows:

47. Amendatory Provisions

a. Surplus Water

Notwithstanding other provisions of this contract, surplus water for agricultural and ground water replenishment use shall be offered to contractors on the following basis. Before surplus water is sold for other than agricultural and ground water replenishment use, each contractor shall have the right, subject to the ability of the State to deliver such water, to contract for agricultural and ground water replenishment use for a portion of the total amount of surplus water available in any year, in an amount which bears the same ratio to the total amount of surplus water available in that year as the sum of the annual entitlements delivered to the contractor for agricultural and ground water replenishment use during the preceding three years bears to the total amount of the annual entitlements delivered for agricultural and ground water replenishment use during the preceding three years of all contractors requesting surplus water: Provided, That if its proportion of such surplus water is not required by or cannot be delivered to any contractor, such amount of additional surplus water shall be offered to other contractors for agricultural and ground water replenishment use. During the first three years in which project water is delivered to a contractor, the State shall determine the amount of surplus water which the contractor may obtain based on the contractor's maximum annual entitlement and the estimated percentage of its annual entitlement to be delivered for agricultural and ground water replenishment use; but quantities so determined shall not exceed the contractor's annual entitlement for that year. For the purpose of computing the portion of the surplus water for agricultural and ground water replenishment use to which each contractor is entitled, the State shall determine the amounts of water used for agricultural and ground water replenishment use by each contractor in each year: Provided, That each contractor shall furnish certified copies of such records and data concerning the use of water within its boundaries as the State may request.

Surplus water for agricultural and ground water replenishment use

shall be furnished at prices which will return to the State the variable operation, maintenance, power, and replacement components of the Delta Water Charge and Transportation Charge incurred in such service of surplus water as determined by the State. A surcharge shall be added to the rate for surplus water furnished to excess land in an amount and under the conditions specified in Article 30 of this contract. Contracts made pursuant to this subdivision may exceed one year in duration but any such contract shall be subject to the rights of all contractors to increase annual entitlements by amendment to Table A included in Article 6(c).

Except as herein modified, the provisions of Article 21 of this contract are hereby confirmed, and all surplus water not specifically allocated pursuant to this subdivision shall be sold under the provisions of Article 21.

As used in this subdivision "ground water replenishment use" shall mean the use of project water exclusively by direct application to spreading basins, streambeds, or through other means of direct artificial recharge for the purpose of replenishing overdrawn ground water basins.

IN WITNESS WHEREOF, the parties hereto have executed this contract on the date first above written.

STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES

AMENDMENT NO. 2 TO THE WATER SUPPLY  
CONTRACT BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION  
DISTRICT FOR A WATER SUPPLY FOR ZONE NO. 7

THIS CONTRACT, made this 20th day of November 1964, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State," and Alameda County Flood Control and Water Conservation District, a public agency in the State of California, duly organized, existing, and acting pursuant to the laws thereof with its principal place of business in Hayward, California, herein referred to as the "District,"

WITNESSETH, That:

WHEREAS, the State is authorized to construct and operate facilities for the storage and conveyance of water, certain of which facilities will make water available to the District; and

WHEREAS, the State and the District have entered into a water supply contract, dated November 20, 1961, as amended December 30, 1963, providing that the State shall supply certain quantities of water to the District, and providing that the District shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment; and

WHEREAS, the State and the District are desirous of making certain changes and additions to such contract, while otherwise continuing the contract in full force and effect;

NOW THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the District's water supply contract with the State:

1. Subdivision (o) of Article 1 is amended to read as follows:

(o) "Minimum project yield" shall mean the dependable annual supply of project water to be made available, estimated to be 4,230,000 acre-feet per year, said amount to be determined by the State on the basis of coordinated operation studies of initial project conservation facilities and additional project conservation facilities, which studies shall be based upon:

(1) The estimated relative proportion of deliveries for agricultural use to deliveries for municipal use for the year 1990, and the characteristic distributions of demands for these two uses throughout the year.

(2) An allowable reduction in the agricultural use portion of the minimum project yield, due to drought, of not to exceed fifty percent (50%) in any one year, nor a total of one hundred percent (100%) of one year's supply in any series of seven consecutive years.

(3) Agreements now in effect or as hereafter amended or supplemented between the State and the United States and others regarding the diversion or utilization of waters of the Delta or streams tributary thereto.

2. Subdivision (a) of Article 16 is amended to read as follows:

(a) The District's maximum annual entitlement hereunder, together with the maximum annual entitlements of all other contractors, shall aggregate no more than the minimum project yield as defined herein and in no event more than 4,230,000 acre-feet of project water.

3. Subdivision (a) of Article 47 is amended to read as follows:

(a) Surplus Water

Notwithstanding other provisions of this contract, surplus water for agricultural and ground water replenishment use shall be offered to contractors on the following basis. Before surplus water is sold for other than agricultural and ground water replenishment use, each contractor shall have the right, subject to the ability of the State to deliver such water, to contract for agricultural and ground water replenishment use for a portion of the total amount of surplus water available in any year, in an amount which bears the same ratio to the total amount of surplus water available in that year as the sum of the annual entitlements, set forth in Table A of this contract, delivered to the contractor for agricultural and ground water replenishment use during the preceding three years bears to the total amount of such annual entitlements delivered for agricultural and ground water replenishment use during the preceding three years of all contractors requesting surplus water: Provided, That if its proportion of such surplus water is not required by or cannot be delivered to

any contractor, such amount of additional surplus water shall be offered to other contractors for agricultural and ground water replenishment use. During the first three years in which project water is delivered to a contractor, the State shall determine the amount of surplus water which the contractor may obtain based on the contractor's maximum annual entitlement and the estimated percentage of its annual entitlement to be delivered for agricultural and ground water replenishment use; but quantities so determined shall not exceed the contractor's annual entitlement for that year. For the purpose of computing the portion of the surplus water for agricultural and ground water replenishment use to which each contractor is entitled, the State shall determine the amounts of water used for agricultural and ground water replenishment use by each contractor in each year: Provided, That each contractor shall furnish certified copies of such records and data concerning the use of water within its boundaries as the State may request.

The provision of this paragraph shall be applicable only to a contractor to which the delivery of project water for municipal use as of 1990 is estimated by the State to be in excess of fifty percent (50%) of such contractor's maximum annual entitlement. For the purpose of fixing such contractor's right to delivery of surplus water, water from a watershed not tributary to the contractor's area which is delivered within the contractor's boundaries for agricultural or ground water replenishment use shall be deemed to be part of the contractor's annual entitlement delivered for such use in computing the quantity of surplus water

to which the contractor is entitled under this subdivision:

Provided, That the contractor shall not be deemed to have used more than its annual entitlement, as set forth in Table A, for such use. Surplus water shall be deemed to be used by the contractor for agricultural or ground water replenishment use if an equal quantity of water imported from a watershed not tributary to the contractor's area is delivered within the contractor's boundaries for such use.

In providing for the delivery of surplus water to contractors pursuant to this subdivision, the State shall refuse to deliver such surplus water to any contractor to the extent that the State determines that such delivery would tend to encourage the development of an economy within the area served by such contractor which would be dependent upon the sustained delivery of water in excess of the contractor's maximum annual entitlement. In no event shall the quantity of surplus water made available in any year prior to 1986 to any contractor under this subdivision exceed the difference between its annual entitlement for that year and its maximum annual entitlement, except that, subject to provisions of the immediately preceding sentence, with respect to any contractor which under Table A of its contract is scheduled to receive its maximum annual entitlement prior to 1978, the quantity of surplus water made available in any year prior to 1986 under this subdivision may exceed such difference by not more than 3,000 acre-feet.

Surplus water for agricultural and ground water replenishment use shall be furnished at prices which will return to the

State the variable operation, maintenance, power and replacement components of the Delta Water Charge and Transportation Charge incurred in such service of surplus water as determined by the State. Surplus water delivered under this subdivision shall be limited to the quantity of water which can be delivered without adversely affecting the reliability, or increasing the cost, of service to meet annual entitlements. A surcharge shall be added to the rate for surplus water furnished to excess land in an amount and under the conditions specified in Article 30 of this contract. Contracts made pursuant to this subdivision may exceed one year in duration.

Except as herein modified, the provisions of Article 21 of this contract are hereby confirmed, and all surplus water not specifically allocated pursuant to this subdivision shall be sold under the provisions of Article 21. Nothing in this subdivision shall limit the right of the District to increase its annual entitlements as otherwise provided in this contract.

As used in this subdivision "ground water replenishment use" shall mean the use of project water exclusively by direct application to spreading basins, streambeds, or through other means of direct artificial recharge for the purpose of replenishing overdrawn ground water basins.

4. Subdivision (b) is added to Article 47 to read as follows:

(b) Surcharge Credit

Notwithstanding other provisions of this contract, the State may allow a credit to each contractor not to exceed the surcharge paid by such contractor.

For the purpose of this contract, the surcharge credit shall be determined and applied in the following manner:

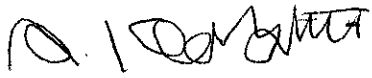

(1) The State shall, in each year after the year of initial water delivery, allow a credit to the District in the amount of the surcharge forwarded by the District to the State in the preceding year.

(2) The District shall not establish water rates, or tax or assessment rates, so as to cause the surcharge credit to be passed on to water users in a manner which will bring about a greater reduction in the cost per acre-foot of project water put to use on excess land than such cost of project water put to use on other than excess land.

This subdivision 47(b) shall be separable from all other provisions in this contract, and in the event that any or all of the provisions of this subdivision are in any manner or to any extent held to be invalid by final judgment or decree of a court of competent jurisdiction, such holding and such invalidity shall in no way affect the validity of, or make invalid, any other provision of this contract.

IN WITNESS WHEREOF, the parties hereto have executed  
this contract on the date first above written.

AMENDMENT NO. 3 TO THE WATER SUPPLY  
CONTRACT BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT  
FOR A WATER SUPPLY FOR ZONE 7

632.514-131-1  
Amended date 11/1/64

THIS CONTRACT, made this 24th day of March, 1969,  
pursuant to the provisions of the California Water Resources Development Bond Act,  
the State Central Valley Project Act, and other applicable laws of the State of  
California, between the State of California, acting by and through its Department  
of Water Resources, herein referred to as the "State", and Alameda County Flood  
Control and Water Conservation District, a public agency in the State of California,  
duly organized, existing, and acting pursuant to the laws thereof with its principal  
place of business in Hayward, California, herein referred to as the "District",

WITNESSETH, That:

WHEREAS, the State is authorized to construct and operate facilities for  
the storage and conveyance of water, certain of which facilities will make water  
available to the District; and

WHEREAS, the State and the District have entered into a water supply  
contract, dated November 20, 1961, as amended December 30, 1963, and November 20,  
1964, providing that the State shall supply certain quantities of water to the  
District, and providing that the District shall make certain payments to the State,  
as setting forth the terms and conditions of such supply and such payment; and

WHEREAS, the State and the District are desirous of making certain changes  
and additions to such contract, while otherwise continuing the contract in full  
force and effect;

10/1/64

NOW, THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the District's water supply contract with the State:

Subdivision (c) is added to Article 47 of the contract to read as follows:

(c) Turnouts and Measuring Devices

(1) Notwithstanding the provisions of Article 10(d), any delivery structure requested by the District, if in the opinion of the State the construction of the structure will not interfere with or adversely affect any project facilities or the construction or operation thereof, may be designed and constructed by the District subject to the prior written approval by the State of plans and specifications for such structure and subject to construction supervision by the State: Provided, that the District shall pay all design and other costs incurred by the State which in the opinion of the State are properly chargeable to any such turnout designed and constructed by the District: Provided, further, that the provisions of Article 10(d) shall apply to all delivery structures constructed by the State.

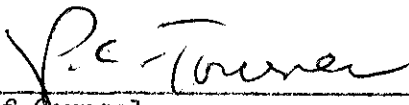

(2) Notwithstanding the provisions of Article 11, measuring devices and equipment to be installed in any delivery structure constructed by the District, pursuant to subdivision (c)(1) of this Article, may be acquired and installed by the District but shall be maintained and operated by the State: Provided, that such measuring devices and equipment as may be acquired and installed by the District shall be satisfactory and acceptable to the State, and shall be installed under the supervision of the State: Provided, further, that such devices and equipment shall be examined, tested and serviced regularly by the State to insure their accuracy, and that at any time or times the District or any other contractor may inspect such devices and equipment, and the measurements and records taken therefrom: Provided, further, that the provisions of Article 11 shall apply to all measuring devices and equipment acquired and installed by the State.

IN WITNESS WHEREOF, the parties hereto have executed this contract on  
the date first above written.

## CHANGE IN ANNUAL ENTITLEMENTS

Table A, entitled, "ANNUAL AMOUNTS OF WATER TO BE MADE AVAILABLE FOR DELIVERY TO ZONE 7 OF ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT", is requested to be amended as follows:

TABLE A  
ANNUAL ENTITLEMENTS

Year	Total Annual Amount in acre-feet
1968	6,900
69	8,200
1970	10,000
71	11,200
72	12,400
73	13,600
74	14,800
75	16,000
76	17,200
77	18,400
78	19,600
79	20,800
1980	22,000
81	23,000
82	24,000
83	25,000
84	26,000
85	27,000
86	28,000
87	29,000
88	30,000
89	31,000
1990	32,000
91	34,000
92	36,000
93	38,000
94	40,000
95	42,000
96	44,000
1997	46,000

And each succeeding year thereafter,  
for the term of this contract:

DEPARTMENT OF WATER RESOURCES

---

AMENDMENT TO WATER SUPPLY  
CONTRACT BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL  
AND WATER CONSERVATION DISTRICT, ZONE 7

---

THIS CONTRACT, made this 20th day of June 1968,  
pursuant to the provisions of the California Water Resources  
Development Bond Act, the State Central Valley Project Act, and  
other applicable laws of the State of California, between the State  
of California, acting by and through its Department of Water  
Resources, herein referred to as the "State", and Alameda County  
Flood Control and Water Conservation District, Zone 7, a public  
agency in the State of California, duly organized, existing, and  
acting pursuant to the laws thereof with its principal place of  
business in Hayward, California, herein referred to as the  
"District",

WITNESSETH, That:

WHEREAS, the State and the District have entered into and  
subsequently amended a water supply contract, dated November 20,  
1961, (herein referred to as the "Amended Contract") providing that  
the State shall supply certain quantities of water to the District,  
and that the District shall make certain payments to the State, and  
setting forth the terms and conditions of such supply and such  
payment; and

*Another orig in Vault*

WHEREAS, the Amended Contract provides for a surcharge equivalent to the power credit per acre-foot of water to be charged to water users, other than the United States or the State of California, for each acre-foot of project water determined to have been put to agricultural or manufacturing uses on excess land, for collection by the District either itself or through a retail agency or another agency, for payment to the State of such surcharge, and for the application, on specified terms and conditions, of the amount of such surcharge as a credit against certain payments by certain water users and by the District to the State; and

WHEREAS, the Amended Contract establishes the power credit per acre-foot of water as two dollars until all of the facilities for generation of electrical energy in connection with operation of initial project conservation facilities are installed and in operation, and provides for a redetermination of such credit thereafter to reflect accurately increases or decreases from year to year in the power credit; and

WHEREAS, all of such facilities are not installed and in operation; and

WHEREAS, the power credit of two dollars appears to be grossly excessive, in light of presently estimated power costs and revenues incurred and received and to be incurred and received attributable to initial project conservation facilities, but no accurate redetermination of the power credit can be made at this time;

NOW, THEREFORE, it is mutually agreed as follows:

The provisions of the Amended Contract providing for or related to the power credit, surcharge and surcharge credit shall not be effective as to water deliveries during the years ending December 31, 1967, 1968 and 1969. Prior to March 1, 1970, the State shall determine the power credit to be used for water deliveries during the year ending December 31, 1970, which credit shall be determined in accordance with the formula set forth in Article 30(b) of the Amended Contract.

IN WITNESS WHEREOF, the parties hereto have executed this contract on the day first above written.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

AMENDMENT NO. 6 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
**ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7**

THIS CONTRACT, made this 31 day of December 1969,  
pursuant to the provisions of the California Water Resources  
Development Bond Act, the State Central Valley Project Act, and  
other applicable laws of the State of California, between the State  
of California, acting by and through its Department of Water  
Resources, herein referred to as the "State", and **Alameda County Flood  
Control and Water Conservation District, Zone 7**,  
herein referred to as the "Agency";

WITNESSETH, That

WHEREAS, the State and the Agency have entered into and  
subsequently amended a water supply contract providing that the  
State will supply certain quantities of water to the Agency, and  
providing that the Agency shall make certain payments to the State,  
and setting forth the terms and conditions of such supply and such  
payment; and

WHEREAS, Article 22(b) of such water supply contract pro-  
vides that for each year through the year 1969 the Delta Water  
Charge shall be the product of \$3.50 and the Agency's annual entitle-  
ment for the respective year and that beginning in the year 1970, the  
Delta Water Charge shall be the sum of the capital cost component,  
minimum operation, maintenance, power and replacement component, and

variable operation, maintenance, power and replacement component computed in accordance with Articles 22(c) and (d) of the water supply contract; and

WHEREAS, Articles 22(e) and (g) of such water supply contract provide that the Delta Water Charge as computed in accordance with Articles 22(c) and (d) shall include all projected costs of additional project and supplemental conservation facilities commencing in the years in which the State first incurs capital costs for such facilities after the facilities are authorized; and

WHEREAS, the parties desire that all water supply contracts be amended to postpone inclusion of the projected costs of any authorized additional project and supplemental conservation facilities in the computation of the Delta Water Charge until after the year 1970 and to fix the rate for computing the Delta Water Charge for the year 1970 at \$6.65; and

WHEREAS, the payments to be made by the Agency to the State include interest calculated at the "project interest rate" defined in Article 1 (w) of such water supply contract to mean the weighted average of the interest rates paid by the State on bonds issued under the Water Resources Development Bond Act (Bond Act) disregarding premiums received on the sale of such bonds; and

WHEREAS, the underlying assumption upon which the "project interest rate" was established was that all of the initial facilities of the State Water Resources Development System (Project) would be financed principally with proceeds of bonds issued under the Bond Act or from other sources on which the interest rate would not exceed that of the bonds issued under the Bond Act; and

WHEREAS, the State already has financed the Oroville-

Thermalito power facilities through Central Valley Project Revenue Bonds and may finance other portions of the project facilities through additional revenue bond issues, bonds issued under other authority granted by the Legislature or the voters, bonds issued by other state agencies, advances from contractors, and other methods under which the financing costs relate to interest rates that may exceed the interest rate of the bonds issued under the Bond Act; and

WHEREAS, either the State or contractors making advances to the State may be subject to interest rates, or other financing costs that relate to interest rates, which will be greater than the "project interest rate" as presently defined in the contracts; and

WHEREAS, the parties desire that (1) the interest costs hereafter incurred by or on behalf of the State in financing the construction of project facilities by means other than the use of moneys provided under the Bond Act will be reflected in appropriate adjustments of the "project interest rate" (excepting the interest costs incurred for the Central Valley Project Revenue Bonds issued prior to the date of this amendment); (2) appropriate credit will be given to any contractor having made an advance of funds to the State corresponding to the bond service obligation payable by such contractor by reason of such advance or if bonds were not used to obtain funds for such advance, then to the net interest cost which would have resulted if the contractor had sold bonds for the purpose of funding the advance; and (3) if any sources of funds other than those provided under the Bond Act are employed to finance the construction of specific project facilities and the interest or other costs of such financing are greater than the cost would have been if bonds issued under the Bond Act had been used, appropriate

adjustments to the charges to contractors will be made with respect to such facilities so that the charges to contractors taking water through reaches which include such facilities will be the same after such adjustments as such charges would have been if such facilities had been financed by the use of proceeds of bonds issued under the Bond Act, except insofar as the "project interest rate" has been adjusted pursuant to (1) in this recital:

NOW THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the Agency's water supply contract with the State:

1. Subdivision (b) of Article 22 is amended to read as follows:

For each contractor receiving project water in any year through December 31, 1969, the Delta Water Charge shall be the product of \$3.50 and the contractor's annual entitlement to project water for the respective year. For each contractor receiving project water in the year 1970, the Delta Water Charge shall be the product of \$6.65 and the contractor's annual entitlement to project water for that year. The \$6.65 rate for the year 1970 shall consist of a capital cost component of \$5.04 and a minimum operation, maintenance, power and replacement component of \$1.61. After December 31, 1970, the Delta Water Charge shall consist and be the sum of the following components as these are computed in accordance with subdivisions (c) and (d) of this article: a capital cost component; a minimum operation, maintenance, power and replacement component; and a variable operation, maintenance, power and replacement component.

2. Subdivision (w) of Article 1 is amended to read as follows:

"Project interest rate" shall mean the weighted average interest rate of (1) through (6) below computed by dividing (i) the total interest cost required to be paid or credited by the State during the life of the indebtedness or advance by (ii) the total of the products of the various principal amounts and the respective terms in years of all such amounts:

- (1) general obligation bonds issued by the State under the Bond Act,
- (2) revenue bonds issued by the State under the Central Valley Project Act after May 1, 1969,
- (3) bonds issued by the State under any other authority granted by the Legislature or the voters,
- (4) bonds issued by any agency, district, political subdivision, public corporation, or non-profit corporation of this State,
- (5) funds advanced by any contractor without the actual incurring of bonded debt therefor, for which the net interest cost and terms shall be those which would have resulted if the contractor had sold bonds for the purpose of funding the advance, as determined by the State, and
- (6) funds borrowed from the General Fund or other funds in the Treasury of the State of California, for which the total interest cost shall be computed at the interest rate earned over the period of such borrowing

by moneys in the Pooled Money Investment  
Account of such Treasury invested in  
securities,

to the extent the proceeds of any such bonds, advances or loans are for construction of the State Water Facilities defined in Section 12934(d) of the Water Code, the additional project conservation facilities, and the supplemental conservation facilities (except advances for delivery structures, measuring devices and excess capacity) and without regard to any premiums received on the sale of bonds under item (1) above. The "project interest rate" shall be computed as a decimal fraction to five places.

3. Subdivision (g) of Article 17 is added to the contract to read as follows:

(g) Adjustments Due to Supplemental Financing Costs

(1) If a contractor, with approval of the State, advances funds to the State to assist the State in financing construction of project facilities ( not including delivery structures, measuring devices and excess capacity), such advance shall be amortized by means of annual credits to the contractor having made such advance of funds to the State, with such credits being equal to the actual bond service obligations payable by such contractor by reason of such advance or, if no bonded debt was incurred, then such credits shall be sufficient to cover the repayment of principal and interest costs which would have resulted if the contractor had sold bonds for the purpose of funding the advance as determined by the State.

(2) If, after May 1, 1969, any source of funds other than those provided by the Bond Act is employed to finance

construction of specific project facilities, any additional costs incurred because of such financing will not be charged to the contractors, except for adjustments to the "project interest rate".

ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

THIS CONTRACT, made this 25th day of January, 1971, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State", and Alameda County Flood Control and Water Conservation District, Zone 7, a public agency in the State of California, duly organized, existing, and acting pursuant to the laws thereof with its principal place of business in Hayward, California, herein referred to as the "Agency",

WITNESSETH, That:

WHEREAS, the State and the Agency have entered into and subsequently amended a water supply contract, dated November 20, 1961 (herein referred to as the "Amended Contract"), providing that the State shall supply certain quantities of water to the Agency, and that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment; and

WHEREAS, the Amended Contract provides for a surcharge equivalent to the power credit per acre-foot of water to be charged to water users, other than the United States or the State of California, for each acre-foot of project water determined to have been put to agricultural or manufacturing uses on excess land, for collection by the Agency either itself or through a retail agency or another agency, for payment to the State of such surcharge, and for the application, on specified terms and conditions, of the amount of such surcharge as a credit against certain payments by certain water users and by the Agency to the State; and

WHEREAS, the Amended Contract establishes the power credit per acre-foot of water as two dollars until all of the facilities for generation of electrical energy in connection with operation of initial project conservation facilities are installed and in operation, and provides for a redetermination of such credit thereafter to reflect accurately increases or decreases from year to year in the power credit; and

WHEREAS, the provisions of the Amended Contract providing for or related to the power credit, surcharge and surcharge credit were suspended as to water deliveries during the years ending not later than December 31, 1969 pending the first redetermination of the power credit; and

WHEREAS, the power credit of two dollars is and will be grossly excessive for the year 1970 and thereafter, the estimated surcharge payments and surcharge credits, based on a redetermination of the power credit, would be relatively small

and the associated administrative costs of the State and its contractors would be large; and

WHEREAS, the State and water contractors are in the process of reevaluating the power credit and such surcharge and surcharge credit provisions;

NOW, THEREFORE, it is mutually agreed as follows:

The provisions of the Amended Contract providing for or related to the surcharge and surcharge credit shall not be effective as to water deliveries during the year ending December 31, 1970.

IN WITNESS WHEREOF, the parties hereto have executed this contract amendment on the date first above written.

---

AMENDMENT NO. 8 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
**ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7**

THIS CONTRACT, made this 31st day of December , 1970,  
pursuant to the provisions of the California Water Resources  
Development Bond Act, the State Central Valley Project Act, and  
other applicable laws of the State of California, between the State  
of California, acting by and through its Department of Water  
Resources, herein referred to as the "State", and **Alameda County  
Flood Control and Water Conservation District, Zone 7**,  
herein referred to as the "Agency";

WITNESSETH, That

WHEREAS, the State and the Agency have entered into and  
subsequently amended a water supply contract providing that the  
State will supply certain quantities of water to the Agency, and  
providing that the Agency shall make certain payments to the State,  
and setting forth the terms and conditions of such supply and such  
payment; and

WHEREAS, Article 22(b) of such water supply contract, as  
amended, provides that for each year through the year 1969 the  
Delta Water Charge shall be the product of \$3.50 and the Agency's  
annual entitlement for the respective year, that for the year 1970  
the Delta Water Charge shall be the product of \$6.65 and the Agency's  
annual entitlement for that year, and that beginning in the year

*to 1970 (revised)*

1971 the Delta Water Charge shall be the sum of the capital cost component, minimum operation, maintenance, power and replacement component, and variable operation, maintenance, power and replacement component computed in accordance with Articles 22(c) and (d) of the water supply contract; and

WHEREAS, Articles 22(e) and (g) of such water supply contract provide that the Delta Water Charge as computed in accordance with Articles 22(c) and (d) shall include all projected costs of additional project and supplemental conservation facilities commencing in the years in which the State first incurs capital costs for such facilities after the facilities are authorized; and

WHEREAS, the parties desire that all water supply contracts be amended to postpone inclusion of the projected costs of any authorized additional project and supplemental conservation facilities in the computation of the Delta Water Charge until after the year 1971 and to fix the rate for computing the Delta Water Charge for the year 1971 at \$7.24;

NOW, THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the Agency's water supply contract with the State:

1. Subdivision (b) of Article 22 is amended to read as follows:

For each contractor receiving project water in any year through December 31, 1969, the Delta Water Charge shall be the product of \$3.50 and the contractor's annual entitlement to project water for the respective year. For each contractor receiving project water in the year 1970, the Delta Water Charge shall be the

product of \$6.65 and the contractor's annual entitlement to project water for that year. The \$6.65 rate for the year 1970 shall consist of a capital cost component of \$5.04 and a minimum operation, maintenance, power and replacement component of \$1.61. For each contractor receiving project water in the year 1971, the Delta Water Charge shall be the product of \$7.24 and the contractor's annual entitlement to project water for that year. The \$7.24 rate for the year 1971 shall consist of a capital cost component of \$5.44 and a minimum operation, maintenance, power and replacement component of \$1.80. After December 31, 1971, the Delta Water Charge shall consist and be the sum of the following components as these are computed in accordance with subdivisions (c) and (d) of this article: a capital cost component; a minimum operation, maintenance, power and replacement component; and a variable operation, maintenance, power and replacement component.

AMENDMENT NO. 9 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

---

THIS CONTRACT, made this 27th day of December, 1971, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State", and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as the "Agency";

WITNESSETH, That:

WHEREAS, the State and the Agency have entered into and subsequently amended a water supply contract providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment; and

WHEREAS, Article 22(b) of such water supply contract, as amended, provides that for each year through the year 1969 the Delta Water Charge shall be the product of \$3.50 and the Agency's annual entitlement for the respective year, that for the year 1970 the Delta Water Charge shall be the product of \$6.65 and the

Agency's annual entitlement for that year, that for the year 1971 the Delta Water Charge shall be the product of \$7.24 and the Agency's annual entitlement for that year, and that beginning in the year 1972 the Delta Water Charge shall be the sum of the capital cost component, minimum operation, maintenance, power and replacement component, and variable operation, maintenance, power and replacement component computed in accordance with Articles 22(c) and (d) of the water supply contract; and

WHEREAS, Articles 22(e) and (g) of such water supply contract provide that the Delta Water Charge as computed in accordance with Articles 22(c) and (d) shall include all projected costs of additional project and supplemental conservation facilities commencing in the years in which the State first incurs capital costs for such facilities after the facilities are authorized; and

WHEREAS, the parties desire that all water supply contracts be amended to postpone inclusion of the projected costs of any authorized additional project and supplemental conservation facilities in the computation of the Delta Water Charge until the happening of certain events;

NOW, THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the Agency's water supply contract with the State:

1. Subdivision (e) of Article 22 is amended to read as follows:

Prior to the time that additional project conservation facilities or supplemental conservation facilities are constructed,

the Delta Water Charge shall be determined on the basis of an allocation to project purposes, by the separable cost-remaining benefits method, of all actual and projected costs of all those initial project conservation facilities located in and above the Delta, and upon an allocation to the purposes of water conservation and water transportation, by the proportionate use of facilities method, of all actual and projected costs of the following project facilities located below the Delta: The aqueduct intake facilities at the Delta, Pumping Plant I (Delta Pumping Plant), the aqueduct from the Delta to San Luis Forebay (O'Neill Forebay), San Luis Forebay (O'Neill Forebay), and San Luis Reservoir: Provided, That all of the actual and projected costs properly chargeable to the generation and transmission of electrical energy in connection with operation of project conservation facilities shall be allocated to the purpose of water conservation in, above, and below the Delta: Provided further, That allocations to purposes the cost of which are to be paid by the United States shall be as determined by the United States.

Commencing in the year in which the State first awards a major construction contract for construction of a major feature of additional project conservation facilities, or first commences payments under a contract with a federal agency in the event a major feature of additional project conservation facilities is constructed by such federal agency under an agreement requiring the State to pay all or part of the costs of such construction, the Delta Water Charge shall be determined on the basis of the

foregoing allocations and upon an allocation to project purposes, by the separable costs-remaining benefits method and subject to the foregoing provisos, of all projected costs of such feature of the additional project conservation facilities: Provided, That if the agreement with such federal agency allows repayment of costs of a portion of a facility to be deferred, the associated costs of such portion shall be excluded from the Delta Water Charge computations until repayment of such deferred costs or interest thereon is commenced by the State: Provided further, That all costs of additional project conservation facilities incurred prior to the award of a major construction contract, shall be included in the Delta Water Charge computations in the year in which they are incurred.

2. Subdivision (g) of Article 22 is amended to read as follows:

Upon the construction of the supplemental conservation facilities, the Delta Water Charge shall be paid by all contractors for supplemental water, as well as by contractors for project water, and, together with revenues derived from the sale or other disposal of electrical energy generated in connection with operation of project conservation facilities and supplemental conservation facilities, shall return to the State, in addition to those costs of the project conservation facilities allocated to the purpose of water conservation, in, above, and below the Delta pursuant to subdivision (e) of this article, all costs of such supplemental conservation facilities, including capital, operation, maintenance, power, and replacement costs

which are allocated to the purpose of water conservation, in, above, and below the Delta pursuant hereto. Commencing in the year in which the State first awards a major construction contract for construction of a major feature of any supplemental conservation facilities, or first commences payments under a contract with a federal agency in the event a major feature of supplemental conservation facilities is constructed by such federal agency under an agreement requiring the State to pay all or part of the costs of such construction, the Delta Water Charge shall be determined on the basis of the allocations made pursuant to subdivision (e) of this article, and upon an allocation to project purposes, by the separable costs-remaining benefits method and subject to provisos corresponding to those contained in said subdivision (e), of all projected costs of such feature of the supplemental conservation facilities. Commencing in the same year, the computation of the rates to be used in determining the components of the Delta Water Charge shall include the annual entitlements to water under all contracts for supplemental water. If the repayment period of any bonds sold to construct supplemental conservation facilities or the repayment period under any agreement with a federal agency for repayment of the costs of supplemental conservation facilities constructed by such federal agency extends beyond the repayment period of the contract, the Delta Water Charge shall be determined and redetermined on the basis of such extended repayment period as the State determines to be appropriate: Provided, That if the agreement with such federal agency allows repayment of costs

of a portion of a facility to be deferred, the associated costs of such portion shall be excluded from the Delta Water Charge computations until repayment of such deferred costs or interest thereon is commenced by the State.

IN WITNESS WHEREOF, the parties hereto have executed this contract on the date first above written.

AMENDMENT NO. 10 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

THIS CONTRACT, made this *3rd* day of *February*, 1972, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State", and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as the "Agency";

WITNESSETH, That:

WHEREAS, the State and the Agency have entered into and subsequently amended a water supply contract providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment; and

WHEREAS, the Amended Contract provides for a surcharge equivalent to the power credit per acre-foot of water to be charged to water users, other than the United States or the State of California, for each acre-foot of project water determined to have been put to agricultural or manufacturing uses on excess land, for collection by the Agency either itself or through a retail agency or another agency, for payment to the State of such surcharge, and for the application, on specified terms and conditions, of the amount of such surcharge as a credit against certain payments by certain water users and by the Agency to the State; and

*Wm. J. ...*

WHEREAS, the provisions of the Amended Contract providing for or related to the power credit, surcharge and surcharge credit have been suspended as to water deliveries during the years ending December 31, 1970; and

WHEREAS, the State and water contractors are still in the process of reevaluating the power credit and such surcharge and surcharge credit provisions;

NOW, THEREFORE, it is mutually agreed as follows:

The provisions of the Amended Contract providing for or related to the power credit, surcharge and surcharge credit shall not be effective as to water deliveries during the year ending December 31, 1971.

IN WITNESS WHEREOF, the parties hereto have executed this contract amendment on the date first above written.

DEPARTMENT OF WATER RESOURCES

AMENDMENT NO. 11 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

THIS CONTRACT, made as of the 15th day of October, 1972, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State", and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as the "Agency";

WITNESSETH, That

WHEREAS, the State and the Agency have entered into and subsequently amended a water supply contract, dated November 20, 1961 (herein referred to as the "Amended Contract") providing that the State shall supply certain quantities of water to the Agency, and that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payments; and

WHEREAS, the Amended Contract provides for a surcharge equivalent to the power credit per acre-foot of water to be charged to water users, other than the United States or the State of California, for each acre-foot of project water determined to have been put to agricultural or manufacturing uses on excess

land, for collection by the Agency either itself or through a retail agency or another agency, for payment to the State of such surcharge, and for the allowance, on specified terms and conditions, of the amount of such surcharge as a credit to the Agency; and

WHEREAS, the Amended Contract establishes the power credit per acre-foot of water as two dollars until all of the facilities for generation of electrical energy in connection with operation of initial project conservation facilities are installed and in operation, and provides for a redetermination of such credit thereafter to reflect accurately increases or decreases from year to year in the power credit; and

WHEREAS, the provisions of the Amended Contract providing for or related to the power credit, surcharge and surcharge credit have been suspended as to water deliveries during the years prior to 1972 pending redetermination of the power credit and a reevaluation of the merits of such contract provisions; and

WHEREAS, estimates indicate that the power credit will be relatively negligible in amount and that administrative costs associated with the power credit, surcharge and surcharge credit provisions will be excessively burdensome to the Agency and its water users; and

WHEREAS, the power credit, surcharge and surcharge credit provisions rest on unclear, confused or mistaken premises and are not now justifiable;

NOW, THEREFORE, it is mutually agreed as follows:

There are hereby deleted from the Amended Contract the following:

1. Article 30 entitled "Surcharge for Excess Use of Project Water".

2. The next-to-the-last sentence of the fourth paragraph of subdivision (a) of Article 47, entitled "Surplus Water", which sentence reads as follows:

"A surcharge shall be added to the rate for surplus water furnished to excess land in an amount and under the conditions specified in Article 30 of this contract."

3. Subdivision (b) of Article 47 entitled "Surcharge Credit".

IN WITNESS WHEREOF, the parties hereto have executed this contract amendment as of the date first above written.

AMENDMENT NO. 12 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

THIS CONTRACT, made as of the 21st day of November, 1974, pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State", and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as the "Agency";

WITNESSETH, That:

WHEREAS, the State and the Agency entered into a contract whereby the State will deliver and the Agency will purchase a supply of water to be made available from project facilities constructed by the State; and

WHEREAS, the State and the Agency included in such contract a subarticle, hereinafter referred to as the agricultural and ground water replenishment provision, which entitles the Agency to obtain from the State a supply of surplus water for agricultural and ground water replenishment use when available; and

WHEREAS, Article 21 of such contract also provides for the sale by the State of a supply of surplus water when available; and

WHEREAS, the State and the Agency desire to amend the provisions of such contract related to the sale and purchase of surplus water;

NOW THEREFORE, it is mutually agreed as follows:

1. Subdivision (a) of Article 47 of the Agency's water supply contract is deleted.

2. Article 21 of the Agency's water supply contract is amended to read as follows:

21. Sale of Surplus Water.

(a) Definitions. When used in this article:

(1) "Noncontractor" shall mean a person or entity that is not a contractor as that term is defined in Article 1 of this contract.

(2) "Surplus water" shall mean water which can be furnished to contractors and noncontractors, subject to the provisions of Article 14(a) of this contract, without interfering with:

(i) The delivery of annual entitlements of all contractors as specified in Table A and the meeting of the quality criteria of Article 19 of their respective water supply contracts including any modifications of Table A pursuant to Articles 7(a), 12(d), 14(b), 18(b), or 18(c) of the water supply contracts or to any other provisions in such contracts which permit changes in the delivery of annual entitlements;

(ii) The furnishing of water required for use in construction of the System or in exchange for local water used in construction of the System;

(iii) Operational requirements regarding recreation and fish and wildlife uses;

(iv) Generation of power by the System or furnishing of project water required by power contracts;

(v) The exchange of water and the filling, retention, and release of storage in System reservoirs necessary for operational flexibility and to meet the requirements of paragraphs (i) through (iv) of this subdivision.

(vi) Losses of water due to evaporation, leakage, seepage, or other causes to meet the requirements of paragraphs (i) through (v) of this subdivision.

(3) "Ground water replenishment use" shall mean the use of project water exclusively for recharge of ground water basins by direct application to spreading basins, streambeds, or through other means of direct artificial recharge.

(4) "Contractors in the San Joaquin Service Area" shall mean those contractors which are furnished water through delivery structures from the California Aqueduct between Dos Amigos Pumping Plant and the South Portal of the Carley V. Porter Tunnel and from the Coastal Branch, California Aqueduct, from its junction with the California Aqueduct to the site for Devil's Den Pumping Plant.

(5) "Contractors in the Southern California Service Area" shall mean contractors for which water is delivered from the California Aqueduct downstream from the South Portal of the Carley V. Porter Tunnel.

(6) "Contractors in the Central Coastal Service Area" shall mean contractors for which water is delivered from the Coastal Branch, California Aqueduct, downstream from the site for Devil's Den Pumping Plant.

(7) "Deferred entitlement" shall mean those portions of annual entitlements to project water deferred in accordance with Article 7(e) of the contract with Alameda County Flood Control and Water Conservation District, Zone 7, Article 7(e) of the contract with Alameda County Water District, Article 7(e) of the contract with Santa Clara Valley Water District, Article 45(f) of the contract with Empire West Side Irrigation District, Article 45(e) of the contract with Hacienda Water District, Article 45(f) of the contract with County of Kings, Article 45(e) of the contract with Oak Flat Water District, and Article 45(e) of the contract with Tulare Lake Basin Water Storage District.

(b) Priorities. The State shall furnish surplus water in accordance with the following priorities:

(1) First, to contractors for agricultural use or for ground water replenishment use.

(2) Second, to contractors for other uses.

(3) Third, to noncontractors for any beneficial use.

These priority groups shall be referred to as first priority, second priority, and thir priority respectively.

(c) Reductions in Requested Deliveries. If requests for surplus water cannot be met, the following reductions in requested deliveries shall be made:

(1) First, the quantity of surplus water to be delivered to noncontractors shall be limited to the quantity available in excess of the requests under the first priority and the second priority.

(2) Second, if there is not sufficient surplus water in excess of the requests under the first priority to meet the requests of contractors under the second priority, the quantity of water to be delivered under the second priority shall be limited to the quantity available in excess of the requests under the first priority and that quantity shall be apportioned in proportion to the amounts of the contractors' current annual entitlements that are to be used for purposes other than agricultural and ground water replenishment uses as determined by the State. If any contractor decides not to use the surplus water available to it under this provision, such surplus water shall be offered on a similar basis to other contractors for such uses.

(3) If there is not sufficient surplus water to meet the requests of contractors under the first priority, the quantity of water to be delivered under that priority shall be limited to the quantity available, and such quantity shall be apportioned to areas upstream and downstream from Dos Amigos Pumping Plant in proportion to the contractors' current annual entitlements that are to be used in such areas for agricultural and ground water replenishment purposes as determined by the State. The quantity of such water available upstream from Dos Amigos Pumping Plant shall be apportioned to contractors upstream from Dos Amigos Pumping Plant in proportion to the amounts of the contractors' current annual entitlements that are to be used for agricultural and ground water

replenishment purposes as determined by the State. If any such contractor decides not to use the surplus water available to it, such surplus water shall first be offered on a similar basis to other contractors upstream from Dos Amigos Pumping Plant and second offered to contractors downstream from Dos Amigos Pumping Plant. The quantity of surplus water available at Dos Amigos Pumping Plant for delivery to contractors downstream from that plant shall be apportioned 69 percent to the San Joaquin Service Area, 29 percent to the Southern California Service Area, and 2 percent to the Central Coastal Service Area. Within each such service area, surplus water shall be apportioned to contractors in proportion to the amounts of the contractors' current annual entitlements that are to be used for agricultural and ground water replenishment purposes as determined by the State. If any such contractor decides not to use the surplus water available to it, such surplus water, on a similar basis, shall first be offered to other contractors in such service area and second offered to contractors in the other such service areas.

(d) Schedules. On or before October 1 of each year, concurrently with the schedule submitted pursuant to the provisions of Article 12, the contractor shall submit in writing to the State a preliminary water delivery schedule, indicating the desired amounts of surplus water for each month of the subsequent six-year period beginning January 1 of the next succeeding year. The last five years of this preliminary surplus water delivery schedule shall be used by the State for planning and operations studies. If a contractor commits itself in writing at the time it submits its October 1 schedule to guarantee payment of the cost of power required

in the judgment of the State to furnish surplus water to it, the contractor shall have a prior right to have such power utilized for furnishing surplus water otherwise available to it pursuant to this article at a cost no higher than that which the State is obligated to pay at the time it orders such power, but it shall have no greater right or priority to receive surplus water. A contractor's commitment may be for any part of the six-year period of its schedule, and the contractor will become bound by such commitment and become entitled to the prior right provided for in the preceding sentence only when the State, after consultation with the contractor, notifies the contractor in writing that it has ordered power based on the contractor's commitment.

(e) Rates.

(1) Surplus water (except further surplus water as described in subdivision (e)(4) of this article) shall be furnished to a contractor for agricultural use and for ground water replenishment use at rates which will return to the State all power costs as defined in subdivision (f) of this article and all incremental operation, maintenance, and replacement costs, and any other incremental costs, incurred in the conservation and transportation of such surplus water as determined by the State, which rates shall include an administrative charge to be determined by the State for each acre-foot of surplus water scheduled for delivery during the year. The amount of such administrative charge shall be credited to general operating costs of the System prior to the allocation of such costs. Incremental costs shall mean those costs which would not be incurred if surplus water were not scheduled for or delivered to the contractor.

(2) Surplus water furnished to a contractor for purposes other than agricultural use or ground water replenishment use shall be sold at rates determined on the same basis as those charged for surplus water for agricultural use and for ground water replenishment use plus an amount equal to one-half of the current Delta water rate.

(3) Surplus water furnished to a noncontractor shall be at rates, as determined by the State, which will return to the State not less than the charges specified for a contractor for surplus water for agricultural use and for ground water replenishment use plus an amount equal to the current Delta water rate plus an appropriate share of the capital and the minimum operation, maintenance, power and replacement costs of the transportation facilities of the System utilized in conveying such surplus water to the noncontractor.

(4) To the extent that the combined volume of entitlement water and surplus water furnished to a contractor in any year for agricultural use and for ground water replenishment use exceeds 150 percent of such contractor's maximum annual entitlement, such further surplus water shall be sold to the contractor at a rate equal to the rate for surplus water sold for agricultural use and for ground water replenishment use specified in subdivision (e)(1) of this article plus an amount equal to one-quarter of the current Delta water rate.

For years prior to 1990, notwithstanding the provisions of the preceding sentence, an amount up to 3,000 acre-feet of further surplus water may be delivered in any year at the charges provided for in subdivisions (e)(1) and (2) of this

article to any contractor which, under Table A of its contract, is scheduled to receive its maximum annual entitlement prior to 1978 and every year thereafter.

(5) Any revenues in excess of operation, maintenance, power and replacement costs and the administrative charge derived from sales of surplus water shall be credited as follows: The Delta water rate or portion thereof paid in accordance with subdivisions (e)(2), (e)(3), or (e)(4) of this article shall be credited to the cost of project conservation facilities, and the balance of such excess revenues, if any, shall be apportioned and credited, as appropriate, to the capital and to the minimum operation, maintenance, power and replacement costs of reaches of the transportation facilities of the System utilized for conveying such water to the purchasers.

(6) The rates and charges for surplus water shall be subject to redetermination by the State to reflect actual costs incurred and the difference shall be promptly credited or debited to the contractor that purchased such surplus water.

(f) Power Costs. Power costs for pumping surplus water shall consist of the cost of capacity, energy and additional transmission service required for the delivery of surplus water, including but not limited to the following:

(1) To the extent utilized for pumping surplus water:

(i) The cost of power purchased for pumping entitlement water,

(ii) The value of project recovery plant generation scheduled for pumping entitlement water, and

(111) The value of project recovery plant generation not scheduled for pumping entitlement water; and

(2) Power purchased specifically for pumping surplus water including power ordered pursuant to subdivision (d) of this article.

The cost and value of power in (1)(1) and (11) of this subdivision shall be credited to the pumping plant power cost attributable to annual entitlement water; the value of power in (1)(111) that is generated by entitlement water shall be added to the net value of power attributable to such entitlement water; and the value of power in (1)(111) that is generated by surplus water shall be credited to the costs incurred in pumping such surplus water.

The State shall determine the cost of power for pumping surplus water so that sufficient revenue will be available to the State to cover both the cost of purchased power and the value of recovery plant generation.

(g) Restrictions on Deliveries.

(1) In providing for the delivery of surplus water pursuant to this article, the State shall refuse to deliver such surplus water to any contractor or noncontractor to the extent that the State determines that such delivery would tend to encourage the development of an economy within the area served by such contractor or noncontractor which would be dependent upon the sustained delivery of surplus water.

(2) Surplus water shall not be scheduled to a contractor in a year unless an amount of project water equal to its annual entitlement set forth for that year in Table A of its

contract (disregarding any amendments reducing such Table A executed after July 1, 1974) is first scheduled and unless all of its deferred entitlements are first scheduled: Provided, That at the request of the contractor surplus water may be scheduled in lieu of deferred entitlements and the right to receive such deferred entitlements shall be reduced accordingly. If at the end of any year delivery of scheduled surplus water has prevented any annual entitlement or deferred entitlement from being delivered during that year, then for the purpose of charging for water delivered, deliveries during the year shall be considered first as annual entitlement water to the extent of the annual entitlement, and the balance as deferred entitlement or surplus water in accordance with the option of the contractor previously exercised pursuant to the first sentence of this subdivision.

(3) Before a contractor can receive surplus water under its contract in an amount greater than its annual entitlement for the year as shown in its Table A, it shall first increase its annual entitlement for such year to an amount equivalent to the surplus water scheduled, but it shall not be required to increase its annual entitlement to an amount in excess of 75 percent of its maximum annual entitlement.

(4) The State shall not sell surplus water to a contractor or noncontractor for use directly or indirectly within the boundaries of any other contractor without the written consent of such other contractor, nor shall the State authorize any contractor to supply surplus water for use outside such contractor's boundaries and within the boundaries of any other contractor without the written consent of such other contractor: Provided, That where

a contractor's boundaries include an area within the boundaries of another contractor, only the written consent of the contractor that serves the overlapping area with water under its annual entitlements need be obtained.

(h) Water from Nontributary Source. The provisions of this subdivision shall be applicable only to a contractor to which the delivery of project water for municipal use as of 1990 is estimated by the State to be in excess of 50 percent of such contractor's maximum annual entitlement. For the purpose of fixing such contractor's right to delivery of surplus water, water from a watershed not tributary to the contractor's area which is delivered within the contractor's boundaries for agricultural or ground water replenishment use shall be deemed to be part of the contractor's annual entitlement delivered for such use in computing the quantity of surplus water to which the contractor is entitled under this article: Provided, That the contractor shall not be deemed to have used more than its annual entitlement, as set forth in Table A, for such use. Surplus water shall be deemed to be used by the contractor for agricultural or ground water replenishment use if an equal quantity of water imported from a watershed not tributary to the contractor's area is delivered within the contractor's boundaries for such use.

(i) Determination of Use. For the purpose of computing the portion of the surplus water to which each contractor is entitled, the State shall determine the quantities of annual entitlement used for agricultural use and for ground water replenishment use and for other uses by each contractor in each year: Provided, That each contractor shall furnish certified copies of such records

and data concerning the use of water within its boundaries as the State may request.

(j) Contracts.

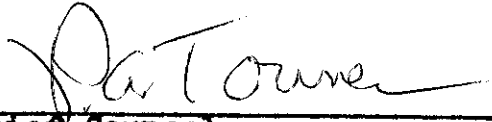

(1) To obtain a supply of surplus water, any contractor or noncontractor shall execute a further contract with the State which shall be in conformity with this article and will include at least the following: Further provisions concerning the scheduling of surplus water and provisions as to times and methods of payment.

(2) The State shall not contract to sell surplus water to noncontractors for periods in excess of five years.

IN WITNESS WHEREOF, the parties hereto have executed this contract amendment as of the date first above written.

AMENDMENT NO. 13 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

632 SEP 81  
ASFC W

THIS CONTRACT, made this 29<sup>th</sup> day of February, 1980,  
pursuant to the provisions of the California Water Resources  
Development Bond Act, the State Central Valley Project Act, and  
other applicable laws of the State of California, between the  
State of California, acting by and through its Department of Water  
Resources, herein referred to as the "State", and Alameda County  
Flood Control and Water Conservation District, Zone 7, herein  
referred to as the "Agency";

WHEREAS, the State and the Agency have entered into and  
subsequently amended a water supply contract providing that the  
State will supply certain quantities of water to the Agency, and  
providing that the Agency shall make certain payments to the  
State, and setting forth the terms and conditions of such supply  
and such payment; and

WHEREAS, the State and the Agency desire to make certain  
changes and additions to such contract, while otherwise continuing  
the contract in full force and effect;

NOW, THEREFORE, it is mutually agreed that the following  
changes and additions are hereby made to the Agency's water supply  
contract with the State;

1. Subdivision y of Article 1 of the Agency's Water Supply Contract with the State is amended to read as follows:

(Y) Project Repayment Period

"Project repayment period" shall mean that period of years commencing on January 1, 1961, and extending until December 31, 2035; Provided, that whenever construction of any project facilities is financed by a bond issue with maturity dates later than December 31, 2035, whether the bonds are issued pursuant to the Bond Act or other authority, repayment of the costs of such facilities shall be extended to end on the date of the latest maturities of the bonds with which construction of such facilities financed.

2. Article 2 of the Agency's Water Supply Contract with the State is amended to read as follows:

(2) Term of Contract

This contract shall become effective on the date first above written and shall remain in effect for the longest of the following:

1. The project repayment period
2. 75 years
3. The period ending with the latest maturity date of any bond issue used to finance the construction costs of project facilities.

IN WITNESS WHEREOF, the parties hereto have executed  
this contract amendment on the date first above written.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

AMENDMENT NO. 14 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND THE  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

THIS CONTRACT, made this 15<sup>th</sup> day of December,  
1962, pursuant to the provisions of the California Water Resources  
Development Bond Act, the State Central Valley Project Act, and  
other applicable laws of the State of California, between the  
State of California, acting by and through its Department of Water  
Resources, herein referred to as the "State", and Alameda County  
Flood Control and Water Conservation District, Zone 7, herein  
referred to as the "District";

WHEREAS, the State and the District have entered into  
and subsequently amended a water supply contract providing that  
the State will supply certain quantities of water to the District,  
and providing that the District shall make certain payments to the  
State, and setting forth the terms and conditions of such supply  
and such payment; and

WHEREAS, the State and the District desire to make  
certain changes and additions to such contract, while otherwise  
continuing the contract in full force and effect;

NOW, THEREFORE, it is mutually agreed that the following  
changes and additions are hereby made to the District's water  
supply contract with the State:

1. Article 1(e) is amended to read:

(e) "Project facilities" shall mean those facilities of the system which will, in whole or in part, serve the purposes of this contract by conserving water and making it available for use in and above the Delta and for export from the Delta and from such additional facilities as are defined in Article 1(h)(2) herein, and by conveying water to the District. Said project facilities shall consist specifically of "project conservation facilities" and "project transportation facilities", as hereinafter defined.

2. Article 1(h) is amended to read:

(h) "Additional project conservation facilities" shall mean the following facilities and programs which will serve the purpose of preventing any reduction in the minimum project yield as hereinafter defined:

(1) Those project facilities specified in Section 12938 of the Water Code;

(2) Those facilities and programs described in (A), (B), (C), (D), and (E) below which, in the State's determination, are engineeringly feasible and capable of producing project water which is economically competitive with alternative new water supply sources, provided that, in the State's determination, the construction and operation of such facilities and programs will not interfere with the requested deliveries of annual entitlement to any contractor other than the sponsoring contractor, and will not result in any greater annual charges to any contractor other than the sponsoring contractor than would have occurred with the construction at the same time of alternative new water supply

sources which are either reservoirs located north of the Delta or off-Aqueduct storage reservoirs located south or west of the Delta designed to supply water to the California Aqueduct. The following facilities and programs shall hereinafter be referred to as "Local Projects":

(A) On-stream and off-stream surface storage reservoirs not provided for in Section 12938 of the Water Code, that will produce project water for the System for a period of time agreed to by the sponsoring contractor;

(B) Ground water storage facilities that will produce project water for the System for a period of time agreed to by the sponsoring contractor;

(C) Waste water reclamation facilities that will produce project water for the System for a period of time agreed to by the sponsoring contractor;

(D) Water and facilities for delivering water purchased by the State for the System for a period of time agreed to by the sponsoring contractor; provided that the economic test specified herein shall be applied to the cost of these facilities together with the cost of the purchased water; and

(E) Future water conservation programs and facilities that will reduce demands by the sponsoring contractor for project water from the System for a period of time agreed to by the sponsoring contractor and will thereby have the effect of increasing project water available in the Delta for distribution.

(3) Whether a Local Project described in (2) above shall be considered economically competitive shall be determined

by the State by comparing, in an engineering and economic analysis, such Local Project with alternative new water supply sources which are either reservoirs located north of the Delta or off-Aqueduct storage reservoirs located south or west of the Delta designed to supply water to the California Aqueduct. The analysis for such alternative new water supply sources shall use the average cost per acre-foot of yield in the latest studies made for such sources by the State and shall compare those facilities with the proposed Local Project using commonly accepted engineering economics. In the case of a Local Project to be funded in part by the State as part of the System and in part from other sources, the economic analysis specified herein shall be applied only to the portion to be funded by the State as part of the System.

(4) The Local Projects in (2) above shall not be constructed or implemented unless or until:

(A) The sponsoring contractor signs a written agreement with the State which:

(i) Contains the sponsoring contractor's approval of such facility or program.

(ii) Specifies the yield and the period of time during which the water from the Local Project shall constitute project water; and

(iii) Specifies the disposition of such Local Project or of the yield from such Local Project upon the expiration of such period of time; and

(B) All contractors within whose boundaries any portion of such Local Project is located, and who are not

sponsoring contractors for such Local Project give their written approval of such Local Project.

(5) "Sponsoring contractor" as used in this Article 1(h) shall mean the contractor or contractors who either will receive the yield from facilities described in 2(A), (B), (C), or (D) above, or agree to reduce demands for project water from the system pursuant to 2(E) above.

(6) In the event of a shortage in water supply within the meaning of Article 18(a), the determination of whether to count, in whole or in part, the yield from facilities described in 2(A), (B), (C), or (D) above, or the reduced demand from future conservation programs described in 2(E) above in the allocation of deficiencies among contractors will be based on a project-by-project evaluation taking into consideration such factors as any limitation on the use of the water from such facilities and whether the sponsoring contractor has access to project water from the Delta as an alternate to such facilities.

3. Article 1(i) is amended to read:

(i) "Project transportation facilities" shall mean the following project facilities:

(1) The following facilities specified in subparagraph (2) of Section 12934(d) of the Water Code: The reach of the San Joaquin Valley-Southern California Aqueduct extending from the Delta to a South Bay Pumping Plant, to the extent required for water transportation as determined by the State, and a South Bay Aqueduct extending to terminal reservoirs in the County of Alameda but not including any portion of Del Valle

Reservoir which may be allocated to conservation of water from Arroyo Del Valle Watershed.

(2) Facilities for the generation and transmission of electrical energy of the following types:

(A) Hydroelectric generating and transmission facilities, whose operation is dependent on the transportation of project water, or on releases to channels downstream of project facilities defined under (1) above. Such facilities shall be called "project aqueduct power recovery plants."

(B) All other generating and associated transmission facilities, except those dependent on water from project conservation facilities, for the generation of power. These facilities shall be called "off-aqueduct power facilities" and shall consist of the State's interest in the Reid-Gardner and any other generating and associated transmission facilities, constructed or financed in whole or in part by the State, which are economically competitive with alternative power supply sources as determined by the State.

(3) Those facilities specified in subparagraph (7) of Section 12934(d) of the Water Code which are necessary and appurtenant to the facilities included under (1) and (2) above.

4. Article 1(w) is amended to read:

(w) "Project interest rate" shall mean the weighted average interest rate of (1) through (6) below computed by dividing (i) the total interest cost required to be paid or credited by the State during the life of the indebtedness or

advance by (ii) the total of the products of the various principal amounts and the respective terms in years of all such amounts:

(1) general obligation bonds issued by the State under the Bond Act,

(2) revenue bonds issued by the State under the Central Valley Project Act after May 1, 1969,

(3) bonds issued by the State under any other authority granted by the Legislature or the voters,

(4) bonds issued by any agency, district, political subdivision, public corporation, or nonprofit corporation of this State,

(5) funds advanced by any contractor without the actual incurring of bonded debt therefor, for which the net interest cost and terms shall be those which would have resulted if the contractor had sold bonds for the purpose of funding the advance, as determined by the State, and

(6) funds borrowed from the General Fund or other funds in the Treasury of the State of California, for which the total interest cost shall be computed at the interest rate earned over the period of such borrowing by moneys in the Pooled Money Investment Account of such Treasury invested in securities,

to the extent the proceeds of any such bonds, advances or loans are for construction of the State Water Facilities defined in Section 12934(d) of the Water Code, the additional project conservation facilities, and the supplemental conservation facilities, (except off-aqueduct power facilities and advances for

delivery structures, measuring devices and excess capacity) and without regard to any premiums received on the sale of bonds under item (1) above. The "project interest rate" shall be computed as a decimal fraction to five places.

5. Subdivision (h) is added to Article 22 to read:

(h) The determination of the rate for water under the Delta Water Charge shall be made by including the appropriate costs and quantities of water, calculated in accordance with subdivisions (c), (d) and (e) above, for all additional project conservation facilities as defined in Article 1(h) hereinabove. In the event a Local Project as defined in Article 1(h)(2) will, pursuant to written agreement between the State and the sponsoring contractor, be considered and treated as an additional project conservation facility for less than the estimated life of the facility, the rate under the Delta Water Charge will be determined on the basis of that portion of the appropriate cost and water supply associated with such facility as the period of time during which such facility shall be considered as an additional project conservation facility bears to the estimated life of such facility. No costs for the construction or implementation of any Local Project are to be included in the Delta Water Charge unless and until the written agreement required by Article 1(h) has been entered into.

6. Subdivision (i) is added to Article 22 to read:

(i) In calculating the rate for project water to be paid by each contractor for the Delta Water Charge under subdivisions (c), (d) and (e) above, the component for operation, mainte-

nance, power and replacement costs shall include, but not be limited to, all costs to the State incurred in purchasing water, which is competitive with alternative sources as determined by the State, for delivery as project water.

7. Subdivision (f) is added to Article 24 to read:

(f) The capital costs of project aqueduct power recovery plants shall be charged and allocated in accordance with this Article 24. The capital costs of off-aqueduct power facilities shall be charged and allocated in accordance with Article 25(d).

8. Subdivision (d) is added to Article 25 to read:

(d) Notwithstanding the provisions of subdivisions (a) and (b) of this article, or of Article 1(x), the costs of off-aqueduct power facilities shall be determined and allocated as follows:

(1) The off-aqueduct power costs shall include all annual costs the State incurs for any off-aqueduct power facility, which shall include, but not be limited to, power purchases, any annual principal and interest payments on funds borrowed by or advanced to the State, annual principal and interest on bonds issued by the State or other agency, or under revenue bond financing contracts, any requirements for coverage, deposits to reserves, and associated operation and maintenance costs of such facility, less any credits, interest earnings, or other monies received by the State in connection with such facility. In the event the State finances all or any part of an off-aqueduct power facility directly from funds other than bonds or borrowed funds, in lieu of such annual principal and interest payments, the repay-

ment of capital costs as to that part financed by such other funds shall be determined on the basis of the schedule that would have been required under Article 24.

(2) The annual costs of off-aqueduct power facilities as computed in (1) above shall initially be allocated among contractors in amounts which bear the same proportions to the total amount of such power costs that the total estimated electrical energy (kilowatt hours) required to pump through project transportation facilities the desired delivery amounts of annual entitlements for that year, as submitted pursuant to Article 12(a)(1) and as may be modified by the State pursuant to Article 12(a)(2), bears to the total estimated electrical energy (kilowatt hours) required to pump all such amounts for all contractors through project transportation facilities for that year, all as determined by the State.

(3) An interim adjustment in the allocation of the power costs calculated in accordance with (2) above, may be made in May of each year based on April revisions in approved schedules of deliveries of annual entitlement for such year. A further adjustment shall be made in the following year based on actual deliveries of annual entitlement; provided, however, in the event no deliveries are made through a pumping plant, the adjustments shall not be made for that year at that plant.

(4) To the extent the monies received or to be received by the State from all contractors for off-aqueduct power costs in any year are determined by the State to be less than the amount required to pay the off-aqueduct power costs in such year,

the State may allocate and charge that amount of off-aqueduct power costs to the District and other contractors in the same manner as costs under the capital cost component of the Transportation Charge are allocated and charged. After that amount has been so allocated, charged and collected, the State shall provide a reallocation of the amounts allocated pursuant to this paragraph (4), such reallocation to be based on the allocations made pursuant to (2) and (3) above for that year, or in the event no such allocation was made for that year, on the last previous allocation made pursuant to (2) and (3) above. Any such reallocation shall include appropriate interest at the project interest rate.

9. Subdivision (e) is added to Article 25 to read:

(e) The total minimum operation, maintenance, power and replacement component due that year from each contractor shall be the sum of the allocations made under the proportionate use of facilities method provided in subdivision (b) of this article and the allocations made pursuant to subdivision (d) of this article for each contractor.

10. Subdivision (b) of Article 32 is amended to read:

(b) Upon every amount of money required to be paid by the District to the State pursuant to this contract which remains unpaid after it becomes due and payable, interest shall accrue at an annual rate equal to that earned by the Pooled Money Investment Fund, as provided in Government Code Sections 16480, et seq. calculated monthly on the amount of such delinquent payment from and after the due date until it is paid, and the District hereby

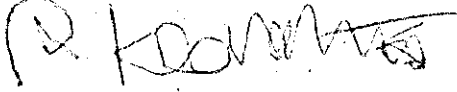

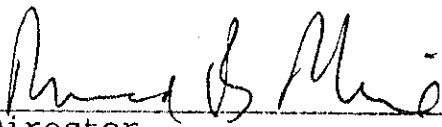

agrees to pay such interest: provided, that no interest shall be charged to or be paid by the District unless such delinquency continues for more than thirty (30) days.

IN WITNESS WHEREOF, the parties hereto have executed this contract amendment as of the date first above written.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

---

AMENDMENT NO. 15 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT

---

THIS CONTRACT is made this 14<sup>th</sup> day of May, 1987,  
pursuant to the provisions of the California Water Resources Development Bond  
Act, the State Central Valley Project Act, and other applicable laws of the  
State of California, between the State of California, acting by and through its  
Department of Water Resources, herein referred to as the "State", and Alameda  
County Flood Control and Water Conservation District, Zone 7, herein referred  
to as the "Agency".

WHEREAS, the State and the Agency have entered into and subsequently  
amended a water supply contract providing that the State will supply certain  
quantities of water to the Agency, and providing that the Agency shall make  
certain payments to the State, and setting forth the terms and conditions of  
such supply and such payment;

WHEREAS, the State and the Agency wish to provide financing for  
project facilities with water system revenue bonds and provide for repayment of  
water system revenue bonds;

WHEREAS, the State and the Agency wish to clarify the definition of  
the project interest rate without changing the interpretation of Article 1(w),  
except for the addition of item (7), and to specify that financing costs of  
water system facilities and East Branch Enlargement facilities shall not be  
included in calculating the project interest rate;

WHEREAS, Article 28 of such water supply contract provides that the State shall redetermine the annual amounts of the Transportation Charge in order that the charges to the Agency may accurately reflect increases or decreases from year to year in projected costs, outstanding reimbursable indebtedness of the State, annual entitlements, estimated deliveries, project interest rate, and all other factors which are determinative of such charges;

WHEREAS, Article 28 also provides that each such redetermination shall include an adjustment of the components of the Transportation Charge to be paid by the Agency for succeeding years which shall account for differences, if any, between projections used by the State in determining the amounts of such components for all preceding years and actual costs incurred by the State during such years, but does not specify the computational details or the method of payment of such adjustments; and

WHEREAS, the State is willing to amortize over the remaining repayment period of the contract, the "one-shot" adjustment applied to previous payments resulting from revisions in the project interest rate under conditions defined in this amendment.

NOW THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the Agency's water supply contract with the State:

1. Article 1(w) is amended to read:

(w) "Project interest rate" shall mean the weighted average interest rate on bonds, advances, or loans listed in this section to the extent the proceeds of any such bonds, advances, or loans are for construction of the State Water Facilities defined in Section 12934(d) of the Water Code, the additional project conservation facilities, and the supplemental conservation

facilities (except off-aqueduct power facilities; water system facilities; advances for delivery structures, measuring devices and excess capacity; and East Branch Enlargement Facilities). The project interest rate shall be calculated as a decimal fraction to five places by dividing (i) the total interest cost required to be paid or credited by the State during the life of the indebtedness or advance by (ii) the total of the products of the various principal amounts and the respective terms in years of all such amounts. The bonds, advances, or loans used in calculating the project interest rate shall be:

(1) General obligation bonds issued by the State under the Bond Act, except that any premium received on the sale of these bonds shall not be included in the calculation of the project interest rate,

(2) Revenue bonds issued by the State under the Central Valley Project Act after May 1, 1969,

(3) Bonds issued by the State under any other authority granted by the Legislature or the voters,

(4) Bonds issued by any agency, district, political subdivision, public corporation, or nonprofit corporation of this State,

(5) Funds advanced by any contractor without the actual incurring of bonded debt therefor, for which the net interest cost and terms shall be those which would have resulted if the contractor had sold bonds for the purpose of funding the advance, as determined by the State,

(6) Funds borrowed from the General Fund or other funds in the Treasury of the State of California, for which the total interest cost shall be computed at the interest rate earned over the period of such borrowing by

moneys in the Surplus Money Investment Fund of such Treasury invested in securities, and

(7) Any other financing capability available in the Treasury of the State of California at whatever interest rate and other financing costs are provided in the law authorizing such borrowing. However, the use of other financing from the State Treasury is intended to involve only short term borrowing at interest rates and other financing costs no greater than those charged to other State agencies during the same period until such time as the Department can sell bonds and reimburse the source of the short term borrowing from the proceeds of the bond sale.

1.5 Articles 1(z), 1(aa), 1(bb), 1(dd), 1(ee), and 1(ff) are reserved for future use and have no text as of the date of this amendment.

2. Article 1(cc) is added to read:

(cc) "Water system revenue bonds" shall mean revenue bonds or revenue bond anticipation notes issued by the State under the Central Valley Project Act after January 1, 1987 for water system facilities identified in Article 1(hh).

3. Article 1(gg) is added to read:

(gg) "East Branch Enlargement Facilities" shall mean all of the following:

(1) The facilities remaining to be constructed as part of the East Branch Enlargement construction;

(2) The work done pursuant to the letter agreement between the State and The Metropolitan Water District of Southern California dated November 29, 1966, which consisted of constructing the California Aqueduct between Cottonwood (now known as Alamo) Powerplant and Cedar Springs (now known as Silverwood) Reservoir so that, by future additions to the canal lining, siphons, and additional pumping units at Pearblossom Pumping Plant, the capacity could be increased by a then-estimated approximately 700 cubic feet per second;

(3) That portion of the enlargement of the Pearblossom Pumping Plant Forebay and Cofferdam construction which would not have been constructed but for the proposed East Branch Enlargement and which was done pursuant to the letter agreement between the State and The Metropolitan Water District of Southern California, dated January 19, 1984;

(4) That portion of the canal lining work between Alamo Powerplant and Pearblossom Pumping Plant done pursuant to the letter agreements between the State and The Metropolitan Water District of Southern California, dated July 2, 1984, and May 15, 1985, which increased the East Branch Aqueduct capacity beyond that set forth in Table B-2 as shown in State Bulletin 132-70;

(5) That portion of Reach 24 (Silverwood Lake) to be determined by reallocation of Reach 24 to reflect the additional use to be made of that reach as a result of the East Branch Enlargement operation; and

(6) That portion of Reach 25 (San Bernardino Tunnel) to be determined by an allocation of total delivery capacity of Reach 25 between the basic East Branch facilities and the East Branch Enlargement as a result of East Branch Enlargement operation.

4. Article 1 (hh) is added to read:

(hh) "Water System Facilities" shall mean the following facilities to the extent that they are financed with water system revenue bonds or to the extent that other financing of such facilities is reimbursed with proceeds from water system revenue bonds:

(1) The North Bay Aqueduct,

(2) The Coastal Branch Aqueduct,

(3) Delta Facilities, including Suisun Marsh facilities, to serve the purposes of water conservation in the Delta, water supply in the Delta, transfer of water across the Delta, and mitigation of the environmental effects of project facilities, and to the extent presently authorized as project purposes, recreation and fish and wildlife enhancement,

(4) Local projects as defined in Article 1(h)(2) designed to develop no more than 25,000 acre-feet of project yield from each project,

(5) Land acquisition for the Kern Fan Element of the Kern Water Bank,

(6) Additional pumps at the Banks Delta Pumping Plant,

(7) The transmission line from Midway to Wheeler Ridge Pumping Plant, and

(8) Repairs, additions, and betterments to conservation or transportation facilities existing as of January 1, 1987, and to all other facilities described in this subarticle (hh) except for item (5).

5. Article 22(j) of the Agency's water supply contract with the State is added as follows:

(j) Notwithstanding provisions of Article 22(a) through (i), the capital cost component and the minimum OMP&R component of the Delta Water Charge shall include an annual charge to recover the Agency's share of the conservation portion of the water system revenue bond financing costs. Charges to the Agency for these costs shall be calculated in accordance with provisions in Article 50 of this contract.

6. Article 24(g) of the Agency's water supply contract with the State is added as follows:

(g) Notwithstanding provisions of Article 24(a) through (d), the capital cost component of the Transportation charge shall include an annual charge to recover the Agency's share of the transportation portion of the water system revenue bond financing costs. Charges to the Agency for these costs shall be calculated in accordance with provisions in Article 50 of this contract.

6.5 Article 28 of the Agency's water supply contract with the State is amended to read as follows:

28. Transportation Charge--Redetermination

(a) Determinative Factors Subject to Retroactive Change

The State shall redetermine the values and amounts set forth in Tables B, C, D, E, F, and G of this contract in the year following the year in which the State commences construction of the project transportation

facilities and each year thereafter in order that the Transportation Charge to the Agency and the components thereof may accurately reflect the increases or decreases from year to year in projected costs, outstanding reimbursable indebtedness of the State incurred to construct the project transportation facilities described in Table I of this contract, annual entitlements, estimated deliveries, project interest rate, and all other factors which are determinative of such charges. In addition, each such redetermination shall include an adjustment of the components of the Transportation Charge to be paid by the Agency for succeeding years which shall account for the differences, if any, between those factors used by the State in determining the amounts of such components for all preceding years and the factors as then currently known by the State. Such adjustment shall be computed by the State and paid by the Agency or credited to the Agency's account in the manner described in (b) and (c) below.

(b) Adjustment: Transportation Charge--Capital Cost Component

Adjustments for prior underpayments or overpayments of the capital cost component of the Transportation Charge to the Agency, together with accrued interest charges or credits thereon computed at the then current project interest rate on the amount of the underpayment or overpayment and compounded annually for the number of years from the year the underpayment or overpayment occurred to and including the year following the redetermination, shall be paid in the year following the redetermination: Provided, That the Agency may elect to exercise the option whereby when the redetermined Transportation Charge for the following year, with adjustments, including adjustments of the operation, maintenance, power, and replacement components

provided for in subdivision (c) of this article, is more or less than the last estimate of the Charge provided pursuant to Article 27 for the corresponding year, without adjustments, an amount equal to the total of such difference shall be deducted from or added to the adjusted capital cost component for that year and paid or credited in accordance with the following schedule:

Percent that Transportation Charge differs from last estimate (+ or -)	Period in years, for amortizing the difference in indicated charge
for 10% or less	no amortization
more than 10%, but not more than 20%	2
more than 20%, but not more than 30%	3
more than 30%, but not more than 40%	4
more than 40%.	5

Such payments or credits shall be equal semi-annual amounts of principal and interest on or before the 1st day of January and the 1st day of July, with interest computed at the project interest rate and compounded annually, during varying amortization periods as set forth in the preceding schedule: Provided, that for the purpose of determining the above difference in the Transportation Charge, the variable operation, maintenance, power, and replacement component shall be computed on the basis of the same estimated project water deliveries as was assumed in computing pursuant to Article 26(c).

(c) Adjustment: Transportation Charge--Minimum and Variable Components

One-twelfth of the adjustments for prior underpayments or overpayments of the Agency's minimum and variable operation, power, and replacement components for each year shall be added or credited to the corresponding components to be paid in the corresponding month of the year

following the redetermination, together with accrued interest charges or credits thereon computed at the then current project interest rate on the amount of the underpayment or overpayment and compounded annually for the number of years from the year the underpayment or overpayment occurred to and including the year following the redetermination.

(d) Exercise of Option

The option provided for in subdivision (b) above shall be exercised in writing on or before the January 1 due date of the first payment of the capital cost component of the Transportation Charge for the year in which the option is to become effective.

Such option, once having been exercised, shall be applicable for all of the remaining years of the project repayment period.

(e) Notwithstanding the provisions of Article 28(b),

adjustments for prior overpayments and underpayments shall be repaid beginning in the year following the redetermination by application of a unit rate per acre-foot which, when paid for the projected portion of the Agency's annual entitlement will return to the State, during the project repayment period, together with interest thereon computed at the project interest rate and compounded annually, the full amount of the adjustments resulting from financing after January 1, 1987, from all bonds, advances, or loans listed in Article 1(w) except for Article 1(w)(3) and except for bonds issued by the State under the Central Valley Project Act after January 1, 1987 for facilities not listed among the water system facilities in Article 1(hh). Notwithstanding the immediately preceding exception, such amortization shall also apply to any adjustments in this component charge resulting from a change in the project

interest rate due to any refunding after January 1, 1986 of bonds issued under the Central Valley Project Act. However, amortization of adjustments resulting from items 1(w)(4) through (7) shall be limited to a period which would allow the Department to repay the debt service on a current basis until such time as bonds are issued to reimburse the source of such funding. In no event shall this amortization period be greater than the project repayment period.

(f) Adjustment: Water System Revenue Bond Financing Costs.

The use of water system revenue bonds for financing facilities listed in Article 1(hh) would result in adjustments for prior underpayments or overpayments of the capital cost component of the Transportation Charge to the Agency under the provisions of this article; however, in place of making such adjustments, charges to the Agency will be governed by Article 50.

7. Articles 46, 47, 48, and 49 are reserved for future use and have no text as of the date of this amendment.

8. Article 50 of the Agency's water supply contract with the State is added as follows:

50. Water System Revenue Bond Financing Costs.

(a) Charges to the Agency for water system revenue bond financing costs shall be governed by provisions of this article. Charges to all contractors for water system revenue bond financing costs shall return to the State an amount equal to the annual financing costs the State incurs in that year for water system revenue bonds (including water system revenue bond anticipation notes). Annual financing costs shall include, but not be limited

to, any annual principal and interest on water system revenue bonds plus any additional requirements for bond debt service coverage, deposits to reserves, and annual premiums for insurance or other security obtained pursuant to subdivision (f) of this article. The State shall provide credits to the contractors for excess reserve funds, excess debt service coverage, interest, and other earnings of the State in connection with repayment of such revenue bond financing costs, when and as permitted by the bond resolution. When such credits are determined by the State to be available, such credits shall be promptly provided to the contractors and shall be in proportion to the payments under this article from each contractor. Reserves, bond debt service coverage, interest, and other earnings may be used in the last year to retire the bonds.

(b) Annual charges to recover water system revenue bond financing costs shall consist of two elements.

(1) The first element shall be an annual charge to the Agency for repayment of capital costs of water system facilities as determined under Articles 22 and 24 of this contract with interest at the project interest rate. For conservation facilities, the charge shall be a part of the capital cost component of the Delta Water Charge in accordance with Article 22. For transportation facilities, the charge shall be a part of the capital cost component of the Transportation Charge in accordance with Article 24.

(2) The second element shall be the Agency's share of a Water System Revenue Bond Surcharge to be paid in lieu of a project interest rate adjustment. The total annual amount to be paid by all contractors under this element shall be the difference between the total annual charges under the first element and the annual financing costs of the water system revenue

bonds. The amount to be paid by each contractor shall be calculated annually as if the project interest rate were increased to the extent necessary to produce revenues from all contractors sufficient to pay such difference for that year. In making that calculation, adjustments in the Agency's Transportation capital cost component charges for prior overpayments and underpayments shall be determined as if amortized over the remaining years of the project repayment period.

(c) The Water System Revenue Bond Surcharge will be identified by component and charge in the Agency's invoice.

(d) Timing of Payments. Payments shall be made in accordance with Article 29(f) of this contract.

(e) Reduction in Charges. The Water System Revenue Bond Surcharge under Article 50(b)(2) shall cease for each series of water system revenue bonds when that series is fully repaid. However, the annual charge determined pursuant to Article 50(b)(1) shall continue to be collected for the time periods otherwise required under Articles 22 and 24.

After the Department has repaid the California Water Fund in full and after each series of Water System Revenue Bonds is repaid, the Department will reduce the charges to all contractors in an equitable manner in a total amount that equals the amount of the charges under Article 50(b)(1) that the Department determines is not needed for future financing of facilities of the System which, in whole or in part, will serve the purposes of the water supply contract with the Agency.

(f) To the extent economically feasible and justifiable, as determined by the State after consultation with contractors, the State shall

maintain insurance or other forms of security protecting bondholders and non-defaulting contractors against costs resulting from the failure of any contractor to make the payments required by this article.

(g) Before issuing each series of water system revenue bonds, the State shall consult with the contractors, prepare a plan for the State's future financing of water system facilities, and give the Agency an opportunity to comment on the plan. The plan shall include but not be limited to the size of any water system revenue bond issuances and the form of any necessary resolutions or supplements.

(h) Defaults. (1) If a contractor defaults partially or entirely on its payment obligations calculated under this article and sufficient insurance or other security protecting the non-defaulting contractors is not provided under Article 50(f), the State shall allocate a portion of the default to each non-defaulting contractor. The Agency's share of the default shall be equal to an amount determined by multiplying the total default amount to be charged to all non-defaulting contractors by the ratio that the Agency's maximum Table A entitlement bears to the maximum Table A entitlements of all non-defaulting contractors. However, such amount shall not exceed in any year 25 percent of the Water System Revenue Bond financing costs that are otherwise payable by the Agency in that year. The amount of default to be charged to non-defaulting contractors shall be reduced by any receipts from insurance protecting non-defaulting contractors and bond debt service coverage from a prior year and available for such purpose.

(2) If a contractor defaults partially or entirely on its payment obligations under this article, the State shall also pursuant to

Article 20, upon six months' notice to the defaulting contractor, suspend water deliveries under Article 20 to the defaulting contractor so long as the default continues. The suspension of water deliveries shall be proportional to the ratio of the default to the total water system revenue bond payments due from the defaulting contractor. However, the State may reduce, eliminate, or not commence suspension of deliveries pursuant to this subparagraph if it determines suspension in the amounts otherwise required is likely to impair the defaulting contractor's ability to avoid further defaults or that there would be insufficient water for human consumption, sanitation, and fire protection. The State may distribute the suspended water to the non-defaulting contractors on terms it determines to be equitable.

(3) During the period of default, credits otherwise due the defaulting contractor shall be applied to payments due from the defaulting contractor.

(4) Except as otherwise provided in Article 50(h)(3), the defaulting contractor shall repay the entire amount of the default to the State with interest compounded annually at the Surplus Money Investment Fund rate before water deliveries that had been suspended shall be fully resumed to that contractor. If the defaulting contractor makes a partial repayment of its default, the Department may provide a proportional restoration of suspended deliveries. The amount of the default to be repaid shall include any amounts previously received by the State from insurance proceeds, bond debt service coverage, or other reserves, and payments from other contractors pursuant to this subparagraph (h). The defaulting contractor shall not be entitled to any

make-up water deliveries as compensation for any water deliveries suspended during the period when the contractor was in default.

(5) At such time as the default amount is repaid by the defaulting contractor, the non-defaulting contractors shall receive credits in proportion to their contributions towards the amount of the default with interest collected by the State on the defaulted amount.

(6) In the event there is an increase in the amount a non-defaulting contractor contributes to reserves and/or bond debt service coverage, such increase shall be handled in the same manner as provided in Article 50(a).

(7) Action taken pursuant to this subarticle shall not deprive the State of or limit any remedy provided by this contract or by law for the recovery of money due or which may become due under this contract.

(i) Power of Termination.

(1) The Department and the Agency agree to negotiate in good faith the development of a means to provide adequate protection for the Department's cash flow into priorities one and two for revenues under Water Code Section 12937(b) with the goal of obtaining agreement by April 1, 1987. The Department and the Agency agree to continue negotiations beyond April 1, 1987 if necessary to meet their common goal of arriving at agreement.

(2) If such an agreement has not been reached by April 1, 1987, and if the Director of Water Resources determines that adequate progress has not been made toward such an agreement, the Director may give notice to the Agency and other contractors that he intends to exercise the power to terminate

provided in this subarticle 50(i). The Director's authority to give such a notice shall terminate on July 1, 1988.

(3) After six months from the date of issuing the notice of intent to terminate, but in no event later than January 1, 1989, the Director may terminate the authority of the Department to issue additional series of water system revenue bonds using the repayment provisions of Article 50. The Department shall promptly notify the Agency and other contractors that the Director has exercised the power of termination.

(4) No additional series of water system revenue bonds shall be issued under the provisions of this Article 50 after the Director has exercised the power to terminate, but Article 50 shall remain in effect as to any series of water system revenue bonds issued prior to the time the Director exercises the power to terminate.

(5) An exercise of the power to terminate provided in this subarticle 50(i) shall also rescind any changes made by this amendment in the schedule of payment of overpayment or underpayment of capital costs resulting from a change in the project interest rate and shall also rescind the addition of item (7) to Article 1(w). However, if the Department has borrowed any funds under Article 1(w)(7), Article 1(w)(7) shall remain in effect as to that and only that borrowing. Upon the exercising of the power to terminate, subarticles 28(e) and (f) shall be rescinded and Article 1(w) shall read as it previously read as shown on Attachment Number 1 to this amendment.

(6) At any time before January 1, 1989, so long as the Director has not already exercised the power of termination, the Director may

irrevocably waive his right to exercise the power of termination or may rescind any previously issued notice of intention to terminate.

(7) If the Director does not exercise the power of termination before January 1, 1989, this Subarticle 50(i) shall expire, and the remainder of this Article 50 shall remain in effect. Changes made by this amendment to other articles shall also remain in effect.

IN WITNESS WHEREOF, the parties have executed this contract on the date first above written.

Article 1(w) is amended to read:

(w) Project Interest Rate

"Project interest rate" shall mean the weighted average interest rate of (1) through (6) below computed by dividing (i) the total interest cost required to be paid or credited by the State during the life of the indebtedness or advance by (ii) the total of the products of the various principal amounts and the respective terms in years of all such amounts:

- (1) general obligation bonds issued by the State under the Bond Act,
- (2) revenue bonds issued by the State under the Central Valley Project Act after May 1, 1969,
- (3) bonds issued by the State under any other authority granted by the Legislature or the voters,
- (4) bonds issued by any agency, district, political subdivision, public corporation, or nonprofit corporation of this State,
- (5) funds advanced by any contractor without the actual incurring of bonded debt therefor, for which the net interest cost and terms shall be those which would have resulted if the contractor had sold bonds for the purpose of funding the advance, as determined by the State, and
- (6) funds borrowed from the General Fund or other funds in the Treasury of the State of California, for which the total interest cost shall be computed at the interest rate earned over the period of such borrowing by

moneys in the Pooled Money Investment Account of such Treasury invested in securities,

to the extent the proceeds of any such bonds, advances or loans are for construction of the State Water Facilities defined in Section 12934(d) of the Water Code, the additional project conservation facilities, and the supplemental conservation facilities, (except off-aqueduct power facilities and advances for delivery structures, measuring devices and excess capacity) and without regard to any premiums received on the sale of bonds under item (1) above. The "project interest rate" shall be computed as a decimal fraction to five places.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

---

AMENDMENT NO. 16 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

---

THIS AMENDMENT to the Water Supply Contract is made this  
20th day of March, 1991, pursuant to the provisions  
of the California Water Resources Development Bond Act, and other  
applicable laws of the State of California, between the State of  
California, acting by and through its Department of Water  
Resources, herein referred to as "State", and Alameda County  
Flood Control and Water Conservation District, Zone 7, herein  
referred to as the "Agency".

WHEREAS, the State and the Agency entered into a contract  
whereby the State will deliver and the Agency will purchase a  
supply of water to be made available from project facilities  
constructed by the State;

WHEREAS, a more efficient use of entitlement water may be  
achieved by deferral of its use from October, November and  
December of one calendar year into the first three months of the  
next year.

WHEREAS, the State and the Agency desire to amend the provisions of such contract related to the delivery and scheduling of entitlement water to allow, under certain conditions, the carry-over of a portion of the Agency's entitlement deliveries from a respective year into the first three months of the next calendar year.

WHEREAS, the carry-over of entitlement by the Agency is not intended to adversely impact current or future project operations.

WHEREAS, the State Water Project contractors and the Department are aware that the carry-over of entitlement water from one year into the next may increase or decrease the costs to other SWP contractors in either year. The tracking of those costs may be too complex and expensive and does not warrant special accounting procedures to be established; however, any significant identifiable cost shall be charged to those contractors causing such cost, as determined by the Department;

WHEREAS, the carry-over of entitlement water is not to affect the payment provisions of the contract.

NOW THEREFORE, it is mutually agreed that the following changes and additions are hereby made to the Agency's Water Supply Contract with the State:

1. Article 1(ii) is added to read:

"Carry-over Entitlement Water" shall mean water from a contractor's annual entitlement for a respective year which is made available for delivery by the State in the next year pursuant to Article 12(e).

2. Article 12(e) is added to read:

(e) Delivery of Carry-over Entitlement Water

Upon request of the Agency, the State shall make Carry-over Entitlement Water available for delivery to the Agency during the first three months of the next year, to the extent that such deliveries do not adversely affect current or future project operations, as determined by the State. The State's determination shall include, but not be limited to the operational constraints of project facilities, filling of project conservation storage, flood control releases and water quality restrictions.

Carry-over of entitlement water shall be limited to entitlement water that was included in the Agency's approved delivery schedule for October, November and December, but was not delivered due to:

- (1) scheduled or unscheduled outages of facilities within the Agency's service area; or
- (2) a delay in the planned application of a contractor's annual entitlement water for pre-irrigation; or
- (3) a delay in the planned spreading of the Agency's annual entitlement water for ground water storage.

After determining that the carry-over of entitlement water would not adversely affect project operations, the State shall notify the Agency of the amount of entitlement water to be carried over to the following January through March period. The notification shall include the proposed terms and

conditions consistent with this Article 12(e) that will ensure the delivery of the Carry-over Entitlement Water.

The Agency agrees to pay all significant identifiable costs associated with its Carry-over Entitlement Water, as determined by the State.

All scheduling and delivery of Carry-over Entitlement Water shall be carried out pursuant to the provisions of this contract.

The Agency agrees to forego the delivery of any Carry-over Entitlement Water that is lost because of project operations or is not delivered by March 31 of the next year.

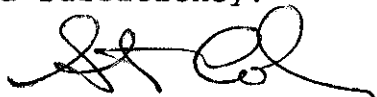

Any Carry-over Entitlement Water foregone by the Agency will become a part of the current year's total project supply.

WITNESS WHEREOF, the parties have executed this contract on the date first above written.

AMENDMENT NO. 17 TO WATER SUPPLY  
CONTRACT BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

THIS AMENDMENT to the Water Supply Contract is made  
this 11th day of APRIL, 1991, pursuant to the  
provisions of the California Water Resources Development Bond  
Act, the State Central Valley Project Act, and other applicable  
laws of the State of California, between the State of California,  
acting by and through its Department of Water Resources, herein  
referred to as the "State", and Alameda County Flood Control and  
Water Conservation District, Zone 7, herein referred to as the  
"Agency".

RECITALS:

WHEREAS, the State and the Agency entered into a  
contract whereby the State will deliver and the Agency will  
purchase a supply of water to be made available from project  
facilities constructed by the State;

WHEREAS, the State and the Agency included in such  
contract an article which entitles the Agency to obtain from the  
State deliveries of surplus water when available;

WHEREAS, the State and the Agency desire to amend the  
provisions of such contract related to the deliveries of surplus  
water; and

WHEREAS, beginning January 1, 1991 the Agency desires to be charged for the power used for pumping surplus water at the Melded Power Rate as provided herein for the remainder of the project repayment period.

WHEREAS, the parties to this Amendment, and those approving the Amendment, intend no impact upon their positions with respect to the interpretation of any existing contractual provisions.

AGREEMENT:

It is agreed that the following changes are hereby made to the Agency's water supply contract as follows:

1. Purpose and Scope. This Amendment is only intended to define the procedure for determining the charges for power used to pump surplus and unscheduled water. The scope of the Amendment is strictly confined to that purpose.

2. Article 21(d) of the Agency's water supply contract with the State is amended to read:

(d) Schedules. On or before October 1 of each year, concurrently with the schedule submitted pursuant to the provisions of Article 12, the Agency shall submit in writing to the State a preliminary water delivery schedule, indicating the desired amounts of surplus water for each month of the subsequent six-year period beginning January 1, of the next succeeding year. The last five years of this preliminary surplus water delivery schedule shall be used by the State for planning and operations studies.

3. Article 21(f) of the Agency's water supply contract with the State is amended to read:

(f) Power Costs.

(1) Beginning January 1, 1991, the Agency shall pay power charges for pumping surplus water as follows:

(A) If during a calendar month it is either not necessary to purchase power for pumping surplus water, or it is necessary to purchase power for pumping surplus water and the purchased power rate is less than or equal to the Melded Power Rate (defined as the average unit charge for pumping entitlement water during the calendar year for all power resources, including on-aqueduct power resources, off-aqueduct power resources, and any other power resources), then the monthly charges to the Agency for the Net Power (gross power used to pump the surplus water less power generated by the surplus water) used to pump surplus water to the Agency shall be determined using the Melded Power Rate.

(B) If during a calendar month it is necessary to purchase power for pumping surplus water and the purchased power rate is greater than the Melded Power Rate, the monthly charges to the Agency for the Net Power used to pump surplus water for delivery to the Agency shall be determined using a composite rate equal to the sum of:

(i) The monthly average purchased power rate per unit of power so purchased times the power purchased for pumping surplus water and that result divided by the Net Power; plus,

(ii) The Melded Power Rate per unit of power times a quantity which equals the Net Power used for pumping surplus water minus the power purchased for pumping surplus water and that result divided by the Net Power.

(C) In all cases, the power charges shall include the cost of any additional transmission service required for the delivery of surplus water to the Agency.

(2) By receiving surplus or unscheduled water under this Article 21(f), the Agency accepts the responsibility to indemnify, defend, and hold harmless the State, its officers, employees and agents from all liability, expenses, defense costs, attorney fees, claims, actions, liens, and lawsuits of whatever kind, arising out of or related to this article.

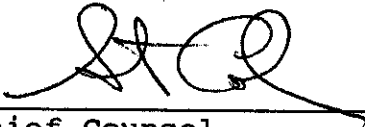

(3) Effective January 1, 1991, power charges for delivery of unscheduled water to the Agency shall be calculated in the same manner as provided in this Article 21(f).

4. This Amendment shall take effect on January 1, 1991, only if, by January 31, 1991 an Amendment substantially the same as this one is executed by contractors that together have maximum annual entitlements totaling at least 3,796,007 acre-feet. By February 15, 1991, the State will inform the Agency of whether sufficient contractors had executed the Amendment to cause the Amendment to take effect.

IN WITNESS WHEREOF, the parties hereto have executed  
this Amendment on the date first above written.

TITLE

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

AMENDMENT NO. 18 (THE MONTEREY AMENDMENT)  
TO WATER SUPPLY CONTRACT BETWEEN THE  
STATE OF CALIFORNIA DEPARTMENT OF  
WATER RESOURCES AND ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7

THIS AMENDMENT to the Water Supply Contract is made this  
13<sup>th</sup> day of December, 1995, pursuant to the  
provisions of the California Water Resources Development Bond Act,  
the Central Valley Project Act, and other applicable laws of the  
State of California, between the State of California, acting by and  
through its Department of Water Resources, herein referred to as the  
"State", and Alameda County Flood Control and Water Conservation  
District, Zone 7, herein referred to as the "District".

RECITALS:

WHEREAS, the State and the District have entered into and  
subsequently amended a water supply contract providing that the  
State will supply certain quantities of water to the District, and  
providing that the District shall make certain payments to the  
State, and setting forth the terms and conditions of such supply and  
such payment; and

WHEREAS, on December 1, 1994, representatives of the  
contractors and the State executed a document entitled "Monterey  
Agreement - Statement of Principles - By the State Water Contractors  
and the State of California Department of Water Resources For  
Potential Amendments To The State Water Supply Contracts" (the  
"Monterey Agreement"); and

1 WHEREAS, the contractors and the State have negotiated an  
2 amendment to the water supply contracts to implement provisions of  
3 the Monterey Agreement (the "Monterey Amendment"); and

4 WHEREAS, the State and the District desire to implement such  
5 provisions by incorporating this Monterey Amendment into the water  
6 supply contract;

7 NOW, THEREFORE, IT IS MUTUALLY AGREED that the following  
8 changes and additions are hereby made to the District's water supply  
9 contract with the State:

10  
11  
12 1. Article 1(d) is amended to read:

13 (d) Contractor

14 "Contractor" shall mean any entity that has executed, or is  
15 an assignee of, a contract of the type published in Department of  
16 Water Resources Bulletin No. 141 dated November 1965, with the  
17 State for a dependable supply of water made available by the System,  
18 except such water as is made available by the facilities specified  
19 in Section 12934(d)(6) of the Water Code.

20  
21 2. Article 1(k) is amended to read:

22 (k) Minimum Project Yield

23 "Minimum project yield" shall mean the dependable annual  
24 supply of project water to be made available, estimated to be  
25 4,185,000 acre-feet per year, said amount to be determined by the  
26 State on the basis of coordinated operation studies of initial  
27 project conservation facilities and additional project conservation  
28 facilities, which studies shall be based upon:

(1) The estimated relative proportion of deliveries for agricultural use to deliveries for municipal use for the year 1990, and the characteristic distributions of demands for these two uses throughout the year.

(2) Agreements now in effect or as hereafter amended or supplemented between the State and the United States and others regarding the diversion or utilization of waters of the Delta or streams tributary thereto.

3. Article 1(hh) is amended to read:

(hh) **Water System Facilities**

(hh) "Water System Facilities" shall mean the following facilities to the extent that they are financed with water system revenue bonds or to the extent that other financing of such facilities is reimbursed with proceeds from water system revenue bonds:

(1) The North Bay Aqueduct,

(2) The Coastal Branch Aqueduct,

(3) Delta Facilities, including Suisun Marsh facilities, to serve the purposes of water conservation in the Delta, water supply in the Delta, transfer of water across the Delta, and mitigation of the environmental effects of project facilities, and to the extent presently authorized as project purposes, recreation and fish and wildlife enhancement,

(4) Local projects as defined in Article 1(h)(2) designed to develop no more than 25,000 acre-feet of project yield from each project,

1 (5) Land acquisition prior to December 31, 1995, for  
2 the Kern Fan Element of the Kern Water Bank,

3 (6) Additional pumps at the Banks Delta Pumping Plant,

4 (7) The transmission line from Midway to Wheeler Ridge  
5 Pumping Plant,

6 (8) Repairs, additions, and betterments to conservation  
7 or transportation facilities existing as of January 1, 1987,  
8 and to all other facilities described in this subarticle (hh)  
9 except for item (5).

10 (9) A project facilities corporation yard, and

11 (10) A project facilities operation center.

12  
13 **4. Article 1(jj) is added to read:**

14 **(jj) Interruptible water**

15 "Interruptible water" shall mean project water available as  
16 determined by the State that is not needed for fulfilling  
17 contractors' annual entitlement deliveries as set forth in their  
18 water delivery schedules furnished pursuant to Article 12 or for  
19 meeting project operational requirements, including storage goals  
20 for the current or following years.

21  
22 **5. Article 1(kk) is added to read:**

23 **(kk) Nonproject water**

24 "Nonproject water" shall mean water made available for  
25 delivery to contractors that is not project water as defined in  
26 Article 1(j).

1           6.    Article 1(11) is added to read:

2           (11)   "Monterey Amendments" shall mean this amendment and  
3 substantially similar amendments to other contractors' water supply  
4 contracts that include, among other provisions, the addition of  
5 Articles 51 through 56.

6  
7           7.    Article 4 is amended to read:

8           4.    OPTION FOR CONTINUED SERVICE

9           By written notice to the State at least six (6) months prior  
10 to the expiration of the term of this contract, the District may  
11 elect to receive continued service after expiration of said term  
12 under the following conditions unless otherwise agreed to:

13           (1)   Service of water in annual amounts up to and  
14 including the District's maximum annual  
15 entitlement hereunder.

16           (2)   Service of water at no greater cost to the  
17 District than would have been the case had this  
18 contract continued in effect.

19           (3)   Service of water under the same physical  
20 conditions of service, including time, place,  
21 amount and rate of delivery, as are provided for  
22 hereunder.

23           (4)   Retention of the same chemical quality objective  
24 provision as is set forth herein.

25           (5)   Retention of the same options to utilize the  
26 project transportation facilities as are provided  
27 for in Articles 18 (c) and 55, to the extent such  
28 options are then applicable.

1 Other terms and conditions of the continued service shall be  
2 reasonable and equitable and shall be mutually agreed upon. In the  
3 event that said terms and conditions provide for continued service  
4 for a limited number of years only, the District shall have the same  
5 option to receive continued service here provided for upon the  
6 expiration of that and each succeeding period of continued service.  
7

8 **8. Article 7(a) is amended to read:**

9 **(a) Changes in Annual Entitlements**

10 The District may, at any time or times during the term of this  
11 contract, by timely written notice furnished to the State, request  
12 that project water be made available to it thereafter in annual  
13 amounts greater or less than the annual entitlements designated in  
14 Table A of this contract. Subject to approval by the State of any  
15 such request, the State's construction schedule shall be adjusted  
16 to the extent necessary to satisfy the request, and the requested  
17 increases or decreases in said annual entitlements shall be  
18 incorporated in said Table A by amendment thereof. Requests for  
19 changes in annual entitlements for more than one year shall be  
20 approved by the State: *Provided*, That no change shall be approved  
21 if in the judgment of the State it would impair the financial  
22 feasibility of project facilities.  
23

24 **9. The title of Article 12 is amended to read "Priorities,**  
25 **Amounts, Times and Rates of Deliveries".**  
26  
27  
28

1           10. Article 12(a)(2) is amended to read:

2           (2) Upon receipt of a preliminary schedule the State shall  
3 review it and, after consultation with the District, shall make such  
4 modifications in it as are necessary to insure the delivery of the  
5 annual quantity allocated to the District in accordance with  
6 Article 18 and to insure that the amounts, times, and rates of  
7 delivery to the District will be consistent with the State's overall  
8 delivery ability, considering the then current delivery schedules  
9 of all contractors. On or before December 1 of each year, the State  
10 shall determine and furnish to the District the water delivery  
11 schedule for the next succeeding year which shall show the amounts  
12 of water to be delivered to the District during each month of that  
13 year.

14  
15           11. Article 12(d) is deleted.

16  
17           12. Article 12(f) is added to read:

18           (f) **Priorities**

19           Each year water deliveries to the contractors shall be in  
20 accordance with the following priorities to the extent there are  
21 conflicts:

22           First, project water to meet scheduled deliveries of  
23 contractors' annual entitlements for that year.

24           Second, interruptible water to the extent contractors' annual  
25 entitlements for that year are not met by the first priority.

26           Third, project water to fulfill delivery requirements pursuant  
27 to Article 14(b).

1 Fourth, project water previously stored pursuant to Articles  
2 12(e) and 56.

3 Fifth, nonproject water to fulfill contractors' annual  
4 entitlements for that year not met by the first two priorities.

5 Sixth, additional interruptible water delivered to contractors  
6 in excess of their annual entitlements for that year.

7 Seventh, additional nonproject water delivered to contractors  
8 in excess of their annual entitlements for that year.

9  
10 **13. Article 14 is amended to read:**

11 **Curtailment of Delivery**

12 **(a) State May Curtail Deliveries**

13 The State may temporarily discontinue or reduce the delivery  
14 of project water to the District hereunder for the purposes of  
15 necessary investigation, inspection, maintenance, repair, or  
16 replacement of any of the project facilities necessary for the  
17 delivery of project water to the District, as well as due to outages  
18 in, or reductions in capability of, such facilities beyond the  
19 State's control or unuseability of project water due to an emergency  
20 affecting project facilities. The State shall notify the District  
21 as far in advance as possible of any such discontinuance or  
22 reduction, except in cases of emergency, in which case notice need  
23 not be given.

24 **(b) District May Receive Later Delivery of Water Not  
Delivered**

25 In the event of any discontinuance or reduction of delivery  
26 of project water pursuant to subdivision (a) of this article, the  
27 District may elect to receive the amount of annual entitlement which  
28 otherwise would have been delivered to it during such period under

1 the water delivery schedule for that year at other times during the  
2 year or the succeeding year to the extent that such water is then  
3 available and such election is consistent with the State's overall  
4 delivery ability, considering the then current delivery schedules  
5 of annual entitlement to all contractors.

6  
7 **14. Article 16(a) is amended to read:**

8 **(a) Limit on Total of all Maximum Annual Entitlements**

9 The District's maximum annual entitlement hereunder, together  
10 with the maximum annual entitlements of all other contractors, shall  
11 aggregate no more than the minimum project yield as defined herein  
12 and in no event more than 4,185,000 acre-feet of project water.

13  
14 **15. Article 18 is amended to read:**

15 **18. SHORTAGE IN WATER SUPPLY**

16 **(a) Shortages; Delivery Priorities**

17 In any year in which there may occur a shortage due to drought  
18 or any other cause whatsoever, in the supply of project water  
19 available for delivery to the contractors, with the result that such  
20 supply is less than the total of the annual entitlements of all  
21 contractors for that year, the State shall allocate the available  
22 supply in proportion to each contractor's annual entitlement as set  
23 forth in its Table A for that year and shall reduce the allocation  
24 of project water to each contractor using such water for  
25 agricultural purposes and to each contractor using such water for  
26 other purposes by the same percentage of their respective annual  
27 entitlements for that year: *Provided*, that the State may allocate  
28 on some other basis if such is required to meet minimum demands of

1 contractors for domestic supply, fire protection, or sanitation  
2 during the year. If a contractor is allocated more water than it  
3 requested, the excess water shall be reallocated among the other  
4 contractors in proportion to their annual entitlements as provided  
5 for above. The foregoing provisions of this subdivision shall be  
6 inoperative to the extent necessary to comply with subdivision (c)  
7 of this article and to the extent that a contractor's annual  
8 entitlement for the respective year reflects established rights  
9 under the area of origin statutes precluding a reduction in  
10 deliveries to such contractor.

11 (b) - Deleted

12 (c) **Permanent Shortage; Contracts for Areas-of-Origin**

13 In the event that the State, because of the establishment by  
14 a party of a prior right to water under the provisions of Sections  
15 11460 through 11463 of the Water Code, enters into a contract with  
16 such party for a dependable supply of project water, which contract  
17 will cause a permanent shortage in the supply of project water to  
18 be made available to the District hereunder:

19 (1) The State shall: (i) equitably redistribute the costs of  
20 all transportation facilities included in the System among all  
21 contractors for project water, taking into account the diminution  
22 of the supply to the District and other prior contractors in  
23 accordance with the terms of their contracts, and (ii) revise the  
24 District's annual entitlements and maximum annual entitlement, by  
25 amendment of Table A of this contract to correspond to the reduced  
26 supply of project water to be made available to the District:  
27 *Provided, That such redistribution of costs of transportation*  
28 *facilities shall not be made until there has been reasonable*

1 opportunity for the District to exercise the option provided for in  
2 (2) below, and for other prior contractors to exercise similar  
3 options.

4 (2) The District, at its option, shall have the right to use  
5 any of the project transportation facilities which by reason of such  
6 permanent shortage in the supply of project water to be made  
7 available to the District are not required for delivery of project  
8 water to the District, to transport water procured by it from any  
9 other source: *Provided*, That such use shall be within the limits  
10 of the capacities provided in the project transportation facilities  
11 for service to the District under this contract: *Provided further*,  
12 That, except to the extent such limitation in Section 12931 of the  
13 Water Code be changed, the District shall not use the project  
14 transportation facilities under this option to transport water the  
15 right to which was secured by the District through eminent domain  
16 unless such use be approved by the Legislature by concurrent  
17 resolution with a majority of the members elected to each house  
18 voting in favor thereof. This option shall terminate upon a  
19 redistribution of costs of transportation facilities by the State  
20 pursuant to (1) above. In the event that this option is exercised,  
21 the State shall take such fact into account in making such  
22 redistribution of costs, and shall offset such use as is made of the  
23 project transportation facilities pursuant thereto against any  
24 reduction in the District's payment obligation hereunder resulting  
25 from such redistribution of costs.

1  
2           (d)   **Reinstatement of Entitlements**

3           If after any revision of annual entitlements and maximum  
4 annual entitlements pursuant to subdivision (c) of this article,  
5 circumstances arise which, in the judgment of the State, justify a  
6 revision upward of the same, the State shall, with the consent of  
7 the affected contractor, reinstate proportionately the previously  
8 reduced entitlements of such contractor to the extent deemed  
9 justified, and shall equitably redistribute the costs of the project  
10 transportation facilities if inequities would otherwise occur as a  
11 result of such reinstatement of entitlements.

12           (e)   **Advance Notice of Delivery Reductions**

13           The State shall give the District written notice as far in  
14 advance as possible of any reduction in deliveries to it which is  
15 to be made under subdivision (a) of this article and, to the extent  
16 possible, shall give the District written notice five (5) years in  
17 advance of any reduction in its annual entitlements and maximum  
18 annual entitlement under subdivision (c) of this article. Reports  
19 submitted to the District pursuant to Article 16(c) may constitute  
20 such notices.

21           (f)   **No Liability for Shortages**

22           Neither the State nor any of its officers, agents, or  
23 employees shall be liable for any damage, direct or indirect,  
24 arising from shortages in the amount of water to be made available  
25 for delivery to the District under this contract caused by drought,  
26 operation of area of origin statutes, or any other cause beyond its  
27 control.

1 16. Old Article 21 "Sale of Surplus Water" is deleted and  
2 replaced by new Article 21 "Interruptible Water Service"  
3 to read:

4 21. Interruptible Water Service

5 (a) Allocation of Interruptible Water

6 Each year from water sources available to the project, the  
7 State shall make available and allocate interruptible water to  
8 contractors in accordance with the procedure in Article 18(a).  
9 Allocations of interruptible water in any one year may not be  
10 carried over for delivery in a subsequent year, nor shall the  
11 delivery of interruptible water in any year impact a contractor's  
12 approved deliveries of annual entitlement or the contractor's  
13 allocation of water for the next year. Deliveries of interruptible  
14 water in excess of a contractor's annual entitlement may be made if  
15 the deliveries do not adversely affect the State's delivery of  
16 annual entitlement to other contractors or adversely affect project  
17 operations. Any amounts of water owed to the District as of the  
18 date of this amendment pursuant to former Article 12(d), any  
19 contract provisions or letter agreements relating to wet weather  
20 water, and any Article 14(b) balances accumulated prior to 1995, are  
21 canceled. The State shall hereafter use its best efforts, in a  
22 manner that causes no adverse impacts upon other contractors or the  
23 project, to avoid adverse economic impacts due to a contractor's  
24 inability to take water during wet weather.

25 (b) Rates

26 For any interruptible water delivered pursuant to this  
27 article, contractors shall pay the State the same (including  
28 adjustments) for power resources (including on-aqueduct,

off-aqueduct, and any other power) incurred in the transportation of such water as if such interruptible water were entitlement water, as well as all incremental operation, maintenance, and replacement costs, and any other incremental costs, as determined by the State. The State shall not include any administrative or contract preparation charge. Incremental costs shall mean those nonpower costs which would not be incurred if interruptible water were not scheduled for or delivered to the contractor. Only those contractors not participating in the repayment of the capital costs of a reach shall be required to pay any use of facilities charge for the delivery of interruptible water through that reach.

(c) **Contracts**

To obtain a supply of interruptible water, a contractor shall execute a further contract with the State which shall be in conformity with this article and shall include at least provisions concerning the scheduling of deliveries of interruptible water and times and methods of payment.

**17. Article 22(j) is amended to read:**

(j) Notwithstanding provisions of Article 22(a) through (i), the capital cost component and the minimum OMP&R component of the Delta Water Charge shall include an annual charge to recover the District's share of the conservation portion of the water system revenue bond financing costs. Charges to the District for these costs shall be calculated in accordance with provisions in Article 50 of this contract. Charges for the conservation portion of the water system revenue bond financing costs shall not be affected by any reductions in payments pursuant to Article 51.

1           **18. The first paragraph of Article 24(b) is amended to read:**

2           (b) In the first step, the total amount of capital costs of  
3 each aqueduct reach to be returned to the State shall be allocated  
4 among all contractors entitled to delivery of project water from or  
5 through the reach by the proportionate use of facilities method of  
6 cost allocation and in accordance with (1) and (2) below. The  
7 measure of the proportionate use of each contractor of each reach  
8 shall be the average of the following two ratios: (i) the ratio of  
9 the contractor's maximum annual entitlement to be delivered from or  
10 through the reach to the total of the maximum annual entitlements  
11 of all contractors to be delivered from or through the reach from  
12 the year in which charges are to be paid through the end of the  
13 project repayment period and (ii) the ratio of the capacity provided  
14 in the reach for the transport and delivery of project water to the  
15 contractor to the total capacity provided in the reach for the  
16 transport and delivery of project water to all contractors served  
17 from or through the reach from the year in which charges are to be  
18 paid through the end of the project repayment period. Allocations  
19 of capital costs to the District pursuant hereto shall be on the  
20 basis of relevant values which will be set forth in Table B of this  
21 contract by the State as soon as designs and cost estimates are  
22 prepared by it subsequent to receipt of requests from the District  
23 as to the maximum monthly delivery capability to be provided in each  
24 aqueduct reach of the project transportation facilities for the  
25 transport and delivery of project water to the District, pursuant  
26 to Article 17(a): *Provided*, That these values shall be subject to  
27 redetermination by the State in accordance with Article 28: *Provided*  
28 *further*, That the principles and procedures set forth in this

1 subdivision shall be controlling as to allocations of capital costs  
2 to the District. Proportionate use of facilities factors for prior  
3 years shall not be adjusted by the State in response to changes or  
4 transfers of entitlement among contractors unless otherwise agreed  
5 by the State and the parties to the transfer and unless there is no  
6 impact on past charges or credits of other contractors.

7  
8 **19. Article 24(g) is amended to read:**

9 (g) Notwithstanding provisions of Article 24(a) through (d),  
10 the capital cost component of the Transportation Charge shall  
11 include an annual charge to recover the District's share of the  
12 transportation portion of the water system revenue bond financing  
13 costs. Charges to the District for these costs shall be calculated  
14 in accordance with the provisions of Article 50 of this contract.  
15 Charges for the transportation portion of the water system revenue  
16 bond financing costs shall not be affected by any reductions in  
17 payments pursuant to Article 51.

18  
19 **20. Article 25(d)(3) is amended to read:**

20 (3) An interim adjustment in the allocation of the power costs  
21 calculated in accordance with (2) above, may be made in May of each  
22 year based on April revisions in approved schedules of deliveries  
23 of project and nonproject water for contractors for such year. A  
24 further adjustment shall be made in the following year based on  
25 actual deliveries of project and nonproject water for contractors  
26 provided, however, in the event no deliveries are made through a  
27 pumping plant, the adjustments shall not be made for that year at  
28 that plant.

1           21. Article 50(j) is added to read:

2           (j) Amounts payable under this article shall not be affected  
3 by any reductions in payments pursuant to Article 51.

4  
5           22. Article 51 is added to read:

6           51. FINANCIAL ADJUSTMENTS

7           (a) General Operating Account

8           (1) The State shall maintain a General Operating Account to  
9 provide the moneys needed to pay obligations incurred by the State  
10 of the types described in Water Code sections 12937(b)(1) and (2)  
11 in the event of emergency or cash flow shortages.

12           (2) An initial deposit of \$15 million shall be made available  
13 from revenue bond reserves that are no longer required by revenue  
14 bond covenants and that would otherwise be credited to the  
15 contractors including the District. In 1998 or when the funds  
16 become available an additional \$7.7 million will be deposited in the  
17 General Operating Account from revenue bond reserves that are no  
18 longer required by revenue bond covenants and that would otherwise  
19 be credited to the contractors including the District, bringing the  
20 deposits to that account under this article to \$22.7 million.

21           (3) The balance in the General Operating Account will  
22 increase pursuant to subdivision (e)(3)(v) of this article to an  
23 amount determined by the State but not in excess of \$32 million.  
24 However, after the year 2001, the maximum amount of the fund may  
25 increase or decrease annually by not more than the same percentage  
26 as the increase or decrease in the charges, other than power charges  
27 for pumping water, to all the contractors for the previous year from  
28

the charges for the year before that for obligations under subdivisions (c)(2)(ii) and (iii) of this article.

**(b) State Water Facilities Capital Account**

(1) The State shall establish a State Water Facilities Capital Account to be funded from revenues available under Water Code section 12937(b)(4). Through procedures described in this article and as limited by this article, the State may consider as a revenue need under subdivision (c)(2)(v) of this article and may deposit in the State Water Facilities Capital Account the amounts necessary to pay capital costs of the State Water Facilities for which neither general obligation bond nor revenue bond proceeds are available, including but not limited to planning, reconnaissance and feasibility studies, the San Joaquin Valley Drainage Program and, through the year 2000, the CALFED Bay-Delta Program.

(2) The Director of the Department of Water Resources shall fully consult with the contractors and consider any advice given prior to depositing funds into this account for any purposes. Deposits into this account shall not exceed the amounts specified in subdivision (c)(2)(v) of this article plus any amounts determined pursuant to subdivision (e)(1)(iii) of this article.

(3) The State shall use revenue bonds or other sources of moneys rather than this account to finance the costs of construction of any major capital projects.

**(c) Calculation of Financial Needs**

(1) Each year the State shall calculate in accordance with the timing provisions of Articles 29 and 31 the amounts that would have been charged (but for this article) to each contractor as provided in other provisions of this contract.

1           (2) Each year the State shall also establish its revenue  
2 needs for the following year for the following purposes, subject to  
3 the following limitations:

4           (i) The amount required to be collected under the  
5 provisions of this contract, other than this article, with respect  
6 to all revenue bonds issued by the State for Project Facilities.

7           (ii) The amount required for payment of the reasonable  
8 costs of the annual maintenance and operation of the State Water  
9 Resources Development System and the replacement of any parts  
10 thereof as described in Water Code section 12937(b)(1). These costs  
11 shall not include operation and maintenance costs of any Federal  
12 Central Valley Project facilities constructed by the United States  
13 and acquired by the State of California after 1994, other than the  
14 State's share of the joint use facilities which include San Luis  
15 Reservoir, the San Luis Canal and related facilities.

16           (iii) The amount required for payment of the principal  
17 of and interest on the bonds issued pursuant to the Burns-Porter Act  
18 as described in Water Code section 12937(b)(2).

19           (iv) Any amount required for transfer to the California  
20 Water Fund in reimbursement as described in Water Code section  
21 12937(b)(3) for funds utilized from said fund for construction of  
22 the State Water Resources Development System.

23           (v) For the years 1998 and thereafter, the amount needed  
24 for deposits into the State Water Facilities Capital Account as  
25 provided in subdivision (b) of this article, but (A) not more than  
26 \$6 million per year for the years 1998, 1999 and 2000, and (B) not  
27 more than \$4.5 million per year for the years 2001 and thereafter.

28

(3) Subject to the provisions of subdivision (e) of this article, the State shall reduce the annual charges in the aggregate for all contractors by the amounts by which the hypothetical charges calculated pursuant to subdivision (c)(1) above exceed the revenue needs determined pursuant to subdivision (c)(2) above. The reductions under this article shall be apportioned among the contractors as provided in subdivisions (d), (e), (f) and (g) of this article. Reductions to contractors shall be used to reduce the payments due from the contractors on each January 1 and July 1; *Provided*, however, that to the extent required pursuant to subdivision (h) of this article, each Agricultural Contractor shall pay to the Agricultural Rate Management Trust Fund an amount equal to the reduction allocated to such Agricultural Contractor. Any default in payment to the trust fund shall be subject to the same remedies as any default in payment to the State under this contract.

(4) The State may submit a supplemental billing to the District for the year in an amount not to exceed the amount of the prior reductions for such year under this article if necessary to meet unanticipated costs for purposes identified in Water Code section 12937(b)(1) and (2) for which the State can issue billings under other provisions of this contract. Any supplemental billing made to the District for these purposes shall be in the same proportion to the total supplemental billings to all contractors for these purposes as the prior reduction in charges to the District in that year bears to the total reductions in charges to all contractors in that year and shall be treated as reducing the amount of the reduction made available for that year to the District by the amount of the supplemental bill to the District.

(5) The State may also submit a supplemental billing to the District for the year if necessary to meet unanticipated costs for revenue bond debt service and coverage for which the State can issue a statement of charges under provisions of this contract other than this article. The relative amounts of any supplemental billing made to the District and to other contractors for revenue bond purposes shall be governed by such other applicable provisions of this contract.

(6) Payment of any supplemental billing shall be due thirty days after the date of the invoice. Delinquency and interest on delinquent amounts due shall be governed by Article 32.

**(d) Apportionment of Reductions between Agricultural and Urban Contractors**

(1) Reductions available under this article are projected to begin to occur in 1997. The numbers and percentages in this subdivision reflect certain estimates of dollars and sharing of reductions. The actual reductions may vary slightly from the amounts described below. The State shall determine the availability of reductions for each year in accordance with this article.

(2) Reductions shall be phased in as follows:

(i) In 1997 reductions in the amount of \$14 million are projected to be available and shall be applied as follows: the first \$10 million of reductions shall be apportioned among the Agricultural Contractors, and the remaining reductions shall be apportioned among the Urban Contractors.

(ii) In 1998 reductions in the amount of \$17 million are projected to be available and shall be applied as follows: the first \$10 million of reductions shall be apportioned among the

1 Agricultural Contractors, and the remaining reductions shall be  
2 apportioned among the Urban Contractors..

3 (iii) In 1999 reductions in the amount of \$32 million  
4 are projected to be available and shall be applied as follows: the  
5 first \$10 million of reductions shall be apportioned among the  
6 Agricultural Contractors, and the remaining reductions shall be  
7 apportioned among the Urban Contractors.

8 (iv) In 2000 reductions in the amount of \$33 million are  
9 projected to be available and shall be applied as follows: the first  
10 \$10 million of reductions shall be apportioned among the  
11 Agricultural Contractors, and the remaining reductions shall be  
12 apportioned among the Urban Contractors.

13 (3)(i) In the event that the aggregate amount of reductions  
14 in any of the years 1997 through 2000 is less than the respective  
15 amount projected for such year in subdivision (d)(2) above, the  
16 shortfall shall be taken first from reductions that would have been  
17 provided to Urban Contractors. Only after all reductions to Urban  
18 Contractors have been eliminated in a given year shall the remaining  
19 shortfall be taken from reductions scheduled for Agricultural  
20 Contractors. Any projected reductions not made available due to  
21 such shortfalls in the years 1997 through 2000 shall be deferred  
22 with interest at the project interest rate to the earliest  
23 subsequent years when reductions in excess of those projected for  
24 those years are available. Such deferred reductions with interest  
25 at the project interest rate shall be applied to the charges of the  
26 contractors whose reductions have been deferred.

27 (ii) In the event that the aggregate amount of  
28 reductions available in any of the years 1997 through 2000 is

greater than the sum of (A) the respective amount projected for such year in subdivision (d)(2) above, plus (B) the amount of any shortfall with accrued interest at the project interest rate, remaining from any prior year to be applied, the excess shall be applied for the purposes and in the amounts per year described in subdivisions (e)(3)(iii), (iv), (v) and (vi) of this article, in that order.

(4) In 2001 and in each succeeding year reductions equal to or in excess of \$40.5 million are projected to be available and shall be applied as follows:

(i) If reductions are available in an amount that equals or exceeds \$40.5 million, \$10 million of reductions shall be apportioned among the Agricultural Contractors, and \$30.5 million of reductions shall be apportioned among the Urban Contractors. If reductions are available in an amount greater than \$40.5 million, the excess shall be applied as provided in subdivision (e)(3) of this article, subject however to subdivision (e)(1).

(ii) If reductions are available in an amount less than \$40.5 million in any of these years, the reductions shall be divided on a 24.7% - 75.3% basis between the Agricultural Contractors and the Urban Contractors respectively. Any such reductions not made due to shortages shall be applied without interest in the next year in which reductions in an amount in excess of \$40.5 million are available pursuant to subdivision (e)(3) of this article with any remainder that is not available carried over without interest to be applied in the earliest subsequent years when reductions in excess of \$40.5 million are available.

(5) Annual charges to a contractor shall only be reduced prospectively from and after the date it executes the Monterey Amendment to this contract. Apportionments of reductions shall be calculated on the assumption that all contractors have executed such amendment.

**(e) Review of Financial Requirements**

(1) In 2001 and every fifth year thereafter the Director of the Department of Water Resources, in full consultation with the contractors, will review the financial requirements of the State Water Resources Development System and determine the following:

(i) The amount of revenues that are needed for State Water Resources Development System purposes in addition to those needed for the purposes specified in subdivisions (c)(2)(i), (ii), (iii), and (iv) of this article;

(ii) If the aggregate amount that would have been charged to all contractors in any year but for this article exceeds the sum of (A) the amount of revenues needed for the purposes specified in subdivisions (c)(2)(i), (ii), (iii) and (iv), plus (B) \$40.5 million, plus (C) the amount determined pursuant to subdivision (c)(2)(v) of this article, the amount of such excess.

(iii) The amount of the excess determined in subdivision (e)(1)(ii) above that should be collected by the State for additional State Water Resources Development System purposes and the amount of such excess that should be used for further annual charge reductions.

(2) After making the determinations required above, the State may collect the revenues for additional State Water Resources

1 Development System purposes in the amount determined pursuant to  
2 subdivision (e)(1)(iii) above.

3 (3) If and to the extent that as a result of such  
4 determinations, the aggregate amount to be charged to contractors  
5 is to be reduced by more than \$40.5 million per year, the following  
6 priorities and limitations shall apply with respect to the  
7 application of such additional reductions:

8 (i) First, reductions shall be allocated to make up  
9 shortfalls in reductions from those projected for the years 1997  
10 through 2000 with interest at the project interest rate pursuant to  
11 subdivision (d)(3)(i).

12 (ii) Second, reductions shall be allocated to make up  
13 shortfalls in reductions from those projected for the years  
14 beginning with 2001 without interest pursuant to subdivision  
15 (d)(4)(ii).

16 (iii) Third, additional reductions in the amount of \$2  
17 million per year shall be apportioned among the Urban Contractors  
18 until a total of \$19.3 million in such additional reductions have  
19 been so applied.

20 (iv) Fourth, reductions up to an additional \$2 million  
21 per year shall be allocated to make up any shortfalls in the annual  
22 reductions provided for in subdivision (e)(3)(iii).

23 (v) Fifth, \$2 million per year shall be charged and  
24 collected by the State and deposited in the General Operating  
25 Account to bring the account ultimately up to an amount determined  
26 by the State but not in excess of \$32 million with adjustments as  
27 provided in subdivision (a) of this article. Any amount in the  
28

1 account in excess of this requirement shall be returned to general  
2 project revenues.

3 (vi) Sixth, remaining amounts if any shall be used for  
4 reductions divided on a 24.7% - 75.3% basis between the Agricultural  
5 Contractors and the Urban Contractors respectively.

6 (f) **Apportionment of Reductions among Urban Contractors.**  
7 Reductions in annual charges apportioned to Urban Contractors under  
8 subdivisions (d) and (e) of this article shall be further allocated  
9 among Urban Contractors pursuant to this subdivision. The amount  
10 of reduction of annual charges for each Urban Contractor shall be  
11 based on each Urban Contractor's proportionate share of total  
12 allocated capital costs as calculated below, for both project  
13 conservation and project transportation facilities, repaid by all  
14 Urban Contractors over the project repayment period.

15 (1) The conservation capital cost component of the reduction  
16 allocation shall be apportioned on the basis of maximum annual  
17 entitlement. Each Urban Contractor's proportionate share shall be  
18 the same as the percentage of that contractor's maximum annual  
19 entitlement to the total of all Urban Contractors' maximum annual  
20 entitlements.

21 (2) The transportation capital cost component of the  
22 reduction allocation shall be apportioned on the basis of  
23 transportation capital cost component repayment obligations,  
24 including interest over the project repayment period. Each Urban  
25 Contractor's proportionate share shall be the same as the percentage  
26 that the contractor's total transportation capital cost component  
27 repayment obligation is of the total of all Urban Contractors'  
28 transportation capital cost component repayment obligations.

(i) Recalculations shall be made annually through the year 1999. Beginning in the year 2000 recalculations shall be made every five years unless an Urban Contractor requests a recalculation for an interim year and does so by a request in writing delivered to the Department by January 1 of the year in which the recalculation is to take place.

(ii) The transportation capital cost component repayment obligations, for purposes of this Article 51(f), shall be based in the year of recalculation on the then most recent Department of Water Resources Bulletin 132, Table B-15, "Capital Cost Component of Transportation Charge for Each Contractor," or its equivalent, excluding any costs or entitlement associated with transfers of entitlement from Agricultural Contractors pursuant to Article 53.

(3) To reflect the relative proportion of the conservation capital cost component and the transportation capital cost component to the total of all capital cost repayment obligations, the two cost components shall be weighted as follows:

(i) The conservation capital cost component shall be weighted with a thirty percent (30%) factor. The weighting shall be accomplished by multiplying each Urban Contractor's percentage of maximum annual entitlements as calculated in subdivision (f)(1) of this article by thirty percent (30%).

(ii) The transportation capital cost component shall be weighted with a seventy percent (70%) factor. The weighting shall be accomplished by multiplying each Urban Contractor's percentage of transportation capital cost component repayment obligations as

1 calculated in subdivision (f)(2) of this article by seventy percent  
2 (70%).

3 (iii) A total, weighted capital cost percentage shall  
4 be calculated for each Urban Contractor by adding the weighted  
5 conservation capital cost component percentage to their weighted  
6 transportation capital cost component percentage.

7 (4) The total amount of the annual charges to be reduced to  
8 Urban Contractors in each year shall be allocated among them by  
9 multiplying the total amount of annual charges to be reduced to the  
10 Urban Contractors by the total, weighted capital cost percentages  
11 for each such contractor. If the amount of the reduction to an  
12 Urban Contractor is in excess of that contractor's payment  
13 obligation to the Department for that year, such excess shall be  
14 reallocated among the other Urban Contractors.

15 (5) In the case of a permanent transfer of urban entitlement,  
16 the proportionate share of annual charge reductions associated with  
17 that entitlement shall be transferred with the entitlement to the  
18 buying contractor. In the case of an entitlement transfer by either  
19 Santa Barbara County Flood Control and Water Conservation District  
20 or San Luis Obispo County Flood Control and Water Conservation  
21 District, the reductions in annual charges to that agency shall be  
22 allocated (a) on the basis of that entitlement being retained by  
23 that agency which bears Coastal Branch Phase II transportation  
24 costs, (b) on the basis of that entitlement being retained by that  
25 agency which does not bear Coastal Branch Phase II transportation  
26 costs, and (c) on the basis of the balance of that agency's  
27 entitlement which also does not bear Coastal Branch Phase II  
28 transportation costs.

1           (g)   **Apportionment    of   Reductions   Among   Agricultural**  
2                   **Contractors**

3           (1) Reductions in annual charges apportioned to Agricultural  
4 Contractors under subdivisions (d) and (e) of this article shall be  
5 allocated among the Agricultural Contractors pursuant to this  
6 subdivision. The amount of reduction of annual charges for each  
7 Agricultural Contractor for the years 1997 through 2001 shall be  
8 based on each Agricultural Contractor's estimated proportionate  
9 share of the total project costs, excluding the variable operation,  
10 maintenance, power and replacement components of the Delta Water  
11 Charge and the Transportation Charge and also excluding off-aqueduct  
12 power charges, to be paid by all Agricultural Contractors for the  
13 years 1997 through 2035, calculated without taking into account this  
14 article. For purposes of these calculations, Kern County Water  
15 Agency's and Dudley Ridge Water District's estimated project costs  
16 shall not include any costs associated with the 45,000 acre-feet of  
17 annual entitlement being relinquished by those contractors pursuant  
18 to subdivision (i) of Article 53. Also, for purposes of these  
19 calculations, an Agricultural Contractor's estimated project costs  
20 shall not be reduced by the transfer of any of the 130,000 acre-feet  
21 of annual entitlements provided for in subdivisions (a) through (i)  
22 of Article 53. The proportionate shares for 1997 through 2001  
23 shall be calculated as follows:

24           (i) Each Agricultural Contractor's statement of charges  
25 received on July 1, 1994, shall be the initial basis for calculating  
26 the proportionate shares for the five years 1997 through 2001.

27           (ii) Each Agricultural Contractor's estimated capital  
28 and minimum components of the Delta Water Charge and the

1 Transportation Charge (excluding off-aqueduct power charges) and  
2 Water Revenue Bond Surcharge shall be totaled for the years 1997  
3 through 2035.

4 (iii) Kern County Water Agency and Dudley Ridge Water  
5 District totaled costs shall be reduced for the 45,000 acre-feet of  
6 annual entitlement being relinquished by them.

7 (iv) Any reductions in an Agricultural Contractor's  
8 totaled costs resulting from the transfer of any of the 130,000  
9 acre-feet of annual entitlement shall be re-added to that  
10 contractor's costs.

11 (v) Each Agricultural Contractor's proportionate share  
12 shall be computed by dividing that contractor's total costs by the  
13 total costs for all Agricultural Contractors determined pursuant to  
14 subparagraphs (ii), (iii) and (iv) above.

15 (2) The reductions in annual charges, for 1997 through 2001,  
16 shall be calculated using the method described in subdivision (g) (1)  
17 of this article.

18 (3) The allocation shall be recalculated using the same  
19 method described in subdivision (g) (1) of this article every five  
20 years beginning in 2002, if any Agricultural Contractor requests  
21 such a recalculation. Any recalculation shall be based on project  
22 cost data beginning with the year that the recalculation is to  
23 become effective through 2035.

24 (h) **Agricultural Rate Management Trust Fund**

25 (1) **Establishment.** Through a trust agreement executed  
26 contemporaneously with this amendment, the State and the  
27 Agricultural Contractors that sign the Monterey Amendments shall  
28

1 establish the Agricultural Rate Management Trust Fund with a  
2 mutually agreed independent trustee.

3       (2) **Separate Accounts.** The trustee shall maintain within the  
4 trust fund a separate account for each Agricultural Contractor that  
5 signs the trust agreement to hold deposits made pursuant to this  
6 article.

7       (3) **Deposits.** Each Agricultural Contractor that signs the  
8 trust agreement shall deposit into such contractor's account within  
9 the trust fund, at the same time as payments would otherwise be  
10 required by this contract to be made to the State, an amount equal  
11 to the amount by which such contractor's charges under this contract  
12 have been reduced by reason of this article, until the balance in  
13 such contractor's account within the trust fund is the same  
14 percentage of \$150,000,000 as such contractor's percentage share of  
15 reductions made available to all Agricultural Contractors as  
16 specified in subdivision (g) of this article. In 2002 and every  
17 fifth year thereafter, the Agricultural Contractors will review the  
18 maximum accumulation in the trust fund (the "Cap") and determine  
19 whether the cap should be adjusted. However, the Cap shall not be  
20 reduced below an aggregate of \$150,000,000 for all Agricultural  
21 Contractor accounts.

22       (4) **Trust Fund Disbursements.**

23       (i) In any year in which the State's allocation of water  
24 to an Agricultural Contractor by April 15th of that year is less  
25 than one-hundred percent (100%) of the contractor's requested annual  
26 entitlement for that year, the trustee shall, to the extent there  
27 are funds in that contractor's account, distribute to the State from  
28 such account for the benefit of that contractor an amount equal to

1 the percentage of the total of that contractor's statement of  
2 charges for that year, as redetermined by the State on or about May  
3 15th of that year, for (a) the Delta Water Charge; (b) the capital  
4 cost and minimum operation, maintenance, power and replacement  
5 components of the Transportation Charge (including off-aqueduct  
6 power charges); and (c) the water system revenue bond surcharge,  
7 that is equal to the percentage of that contractor's annual  
8 entitlement for that year that was not allocated to it by the State  
9 by April 15th of that year.

10 (ii) In addition to the provisions of subdivision  
11 (h)(4)(i) of this article, if on April 15 of any year any of the  
12 irrigable land within the Tulare Lake Basin Water Storage District  
13 (Tulare) is flooded, and Tulare in writing requests the trustee to  
14 do so, the trustee shall, to the extent there are funds in Tulare's  
15 account, distribute to the State from such account for the benefit  
16 of Tulare an amount equal to the percentage of the total of Tulare's  
17 statement of charges for that year, as redetermined by the State on  
18 or about May 15th of that year, for (a) the Delta Water Charge; (b)  
19 the capital cost and minimum components of the Transportation Charge  
20 (including off-aqueduct power charges); and (c) the water system  
21 revenue bond surcharge, that is equal to the percentage of the  
22 irrigable land within Tulare that is flooded on April 15.

23 (iii) Each Agricultural Contractor shall remain  
24 obligated to make payments to the State as required by other  
25 articles in this contract. Any amount to be disbursed pursuant to  
26 subdivisions (h)(4)(i) and (h)(4)(ii) shall be paid by the trustee  
27 to the State on July 1 of the year involved and shall be credited  
28 by the State toward any amounts owed by such respective Agricultural

1 Contractor to the State as of that date. However, an Agricultural  
2 Contractor may direct the trustee to make the disbursement to that  
3 Agricultural Contractor which shall in turn make the payment to the  
4 State as required by other provisions of this contract. If the  
5 amount to be disbursed exceeds the amount owed to the State by such  
6 contractor as of July 1, the excess shall be disbursed by the  
7 Trustee to the State at the time of and in payment of future  
8 obligations owed to the State by such contractor. Alternatively,  
9 upon the request of such contractor, all or part of the excess shall  
10 be paid by the trustee to that contractor in reimbursement of prior  
11 payments by the contractor to the State for that year.

12 (5) **Payment of Supplemental Bills.** In any year in which a  
13 supplemental bill has been submitted to an Agricultural Contractor  
14 pursuant to subdivision (c)(4) of this article, such supplemental  
15 bill shall be treated as reducing by an equal amount the obligation  
16 of such contractor for that year to make payments into the  
17 Agricultural Rate Management Trust Fund. To the extent that such  
18 contractor has already made payments to the trust fund in an amount  
19 in excess of such contractor's reduced trust fund payment  
20 obligation, such contractor may request the trustee to use the  
21 excess from the trust fund to pay the supplemental bill.

22 (6) **Discharge of Payment Obligation.** Each payment to the  
23 State by the trust fund shall discharge and satisfy the Agricultural  
24 Contractor's obligation to pay the amount of such payment to the  
25 State. No reimbursement of the trust fund by the Agricultural  
26 Contractor for such payments shall be required. However, each  
27 Agricultural Contractor shall continue to make deposits to the trust  
28 fund matching the amount of each year's reductions as provided in

subdivision (d) of this article so long as the amount in that contractor's account is less than its share of the Cap.

(7) **Distribution of Funds in Excess of the Cap.** Whenever accumulated funds (including interest) in an Agricultural Contractor's account in the trust fund exceed that contractor's share of the Cap, or the estimated remaining payments the contractor is required to make to the State prior to the end of the project repayment period, that contractor may direct the trustee to pay such excess to the contractor.

(8) **Termination of Trust Fund.** At the end of the project repayment period, the Agricultural Rate Management Trust Fund shall be terminated and any balances remaining in the accounts for each of the Agricultural Contractors shall be disbursed to the respective Agricultural Contractors.

(i) **Definitions.** For the purposes of this article, the following definitions will apply:

(1) "Agricultural Contractor" shall mean the following agencies as they now exist or in any reorganized form:

(i) County of Kings,

(ii) Dudley Ridge Water District,

(iii) Empire West Side Irrigation District,

(iv) Kern County Water Agency for 993,300 acre-feet of its entitlement,

(v) Oak Flat Water District,

(vi) Tulare Lake Basin Water Storage District.

(2) "Urban Contractor" shall mean every other agency having a long term water supply contract with the State as they exist as of the date of this amendment or in any reorganized form as well as

1 Kern County Water Agency for 119,600 acre-feet of its entitlement.  
2 (j) Except as provided in subdivisions (c)(4) and (c)(5),  
3 this article shall not be interpreted to result in any greater State  
4 authority to charge the contractors than exists under provisions of  
5 this contract other than this article.

6  
7 23. Article 52 is added to read:

8 52. KERN WATER BANK

9 (a) The State shall convey to the Kern County Water Agency  
10 (KCWA) in accordance with the terms set forth in the agreement  
11 between the State of California Department of Water Resources and  
12 Kern County Water Agency entitled "Agreement for the Exchange of the  
13 Kern Fan Element of the Kern Water Bank" (the Kern Water Bank  
14 Contract); the real and personal property described therein.

15 (b) Subject to the approval of KCWA, other contractors may  
16 be provided access to and use of the property conveyed to KCWA by  
17 the Kern Water Bank Contract for water storage and recovery. Fifty  
18 percent (50%) of any project water remaining in storage on December  
19 31, 1995, from the 1990 Berrenda Mesa Demonstration Program and the  
20 La Hacienda Water Purchase Program shall be transferred to KCWA  
21 pursuant to the Kern Water Bank Contract. The remaining fifty  
22 percent (50%) of any such water (approximately 42,828.5 acre-feet)  
23 shall remain as project water and the State's recovery of such  
24 project water shall be pursuant to the provisions of a separate  
25 recovery contract. Any other Kern Water Bank demonstration program  
26 water shall remain as project water and the State's recovery of such  
27 water shall be pursuant to the provisions of the respective  
28 contracts for implementation of such demonstration programs.

1           24. Article 53 is added to read:

2           53. PERMANENT TRANSFERS AND REDUCTIONS OF ENTITLEMENT

3           (a) Article 41 provides that no assignment or transfer of  
4 a contract or any part thereof, rights thereunder or interest  
5 therein by a contractor shall be valid unless and until it is  
6 approved by the State and made subject to such reasonable terms and  
7 conditions as the State may impose. In accordance with State policy  
8 to assist water transfers, the State and the County of Kings, Dudley  
9 Ridge Water District (DRWD), Empire West Side Irrigation District,  
10 Kern County Water Agency (KCWA), Oak Flat Water District and Tulare  
11 Lake Basin Water Storage District (for the purposes of this article  
12 the "Agricultural Contractors") shall, subject to the conditions set  
13 forth in this article, expeditiously execute any necessary documents  
14 and approve all contracts between willing buyers and willing sellers  
15 until permanent transfers totaling 130,000 acre-feet of annual  
16 entitlements of the Agricultural Contractors and, to the extent  
17 provided in such contracts, rights in project transportation  
18 facilities related to such annual entitlement have been made to  
19 other contractors (the "Urban Contractors") or noncontractors in  
20 accordance with the provisions of this article. Such approval  
21 requirement shall apply to all contracts executed prior to January  
22 1, 2011. KCWA shall be responsible for approval of such transfers  
23 for any portion of the 130,000 acre-feet not previously made  
24 available under this article by the other Agricultural Contractors.  
25 A contract between a willing buyer and a willing seller shall mean  
26 a contract between (1) a buyer which is an Urban Contractor or, to  
27 the extent provided in subdivision (e) of this article, a  
28 noncontractor and (2) a seller which is an Agricultural Contractor

1 or a public entity which obtains project water from an Agricultural  
2 Contractor.

3 (b) The State shall not be obligated to approve any transfer  
4 of annual entitlements if in its judgment the transfer would impair  
5 the security of the State's bondholders and the State may impose  
6 conditions on any transfer as necessary to make the delivery of the  
7 water operationally feasible and to assure that the transportation  
8 costs associated with the transferred entitlement are fully repaid.  
9 Transfers not approved by the State shall not be considered as part  
10 of the 130,000 acre-feet of annual entitlements provided for in this  
11 article.

12 (c) KCWA member units shall have 90 days to exercise a right  
13 of first refusal to purchase any annual entitlements being offered  
14 for sale to Urban Contractors by another KCWA member unit pursuant  
15 to this article, other than those annual entitlements made available  
16 to Urban Contractors by subdivision (d) of this article, by agreeing  
17 to pay the same price offered by the buyer. Any such sales to KCWA  
18 member units exercising such right of first refusal shall not be  
19 considered a part of the 130,000 acre-feet of annual entitlements  
20 provided for in this article.

21 (d) Any permanent transfers of annual entitlements by  
22 Agricultural Contractors to noncontractors, including transfers to  
23 KCWA urban member units or to KCWA's Improvement District Number 4,  
24 other than transfers pursuant to subdivision (c) of this article,  
25 will be considered a part of the 130,000 acre-feet of annual  
26 entitlements provided for in this article if the Urban Contractors  
27 have been given a right of first refusal to purchase such annual  
28

entitlements as well as transportation rights in accordance with the following terms and procedure:

(1) The Agricultural Contractor shall provide the State a copy of a bona fide contract or Proposed Contract (the "Proposed Contract") and the State shall, within five working days of receipt, provide copies of such Proposed Contract to all Urban Contractors together with a Notice of Proposed Contract stating the date on or before which a Notice of Intent to Exercise a Right of First Refusal (NOI) must be delivered to both the State and the seller, which date shall be 90 days from the date the State mails the Notice of Proposed Contract.

(2) The Proposed Contract shall provide for the transfer of rights in project transportation facilities sufficient to deliver to the seller's service area in any one month eleven percent (11%) of the annual entitlement being transferred or such greater amount as the seller determines to sell; *Provided*, however, that sellers shall not be obligated to sell any transportation rights in the Coastal Aqueduct.

(3) To exercise the right of first refusal, an Urban Contractor shall deliver to the State and the seller its NOI within the time period stated in the Notice of Proposed Contract and shall proceed in good faith to try to complete the transfer to the Urban Contractor. If two or more Urban Contractors deliver NOI's to the State, the amount of annual entitlement and transportation rights being sold shall be allocated among those Urban Contractors that are prepared to perform the purchase by the Performance Date provided for herein in proportion to their maximum annual entitlements, or in another manner acceptable to the Urban Contractors delivering the

1 NOIs. An offer by an Urban Contractor in its NOI to purchase less  
2 than the entire annual entitlement and transportation right being  
3 transferred shall not be deemed to be an effective exercise of the  
4 right of first refusal unless other Urban Contractors submit NOIs  
5 to purchase the remainder of the annual entitlement and  
6 transportation right or the noncontractor buyer agrees to purchase  
7 the remainder at the same unit price and on the same terms and  
8 conditions provided for in the Proposed Contract. The Performance  
9 Date shall be the date upon which the Urban Contractor is prepared  
10 to perform the purchase, which date shall be the later of: (1) 180  
11 days after the delivery of the NOI or (2) the date set forth in the  
12 Proposed Contract for the noncontractor buyer to perform the  
13 purchase.

14 The Performance Date shall be extended at the request of the  
15 Urban Contractor if a temporary restraining order or preliminary  
16 injunction is in effect as a result of a lawsuit challenging the  
17 execution of the contract on the basis of noncompliance with the  
18 California Environmental Quality Act. Such extensions shall  
19 continue until five days after the temporary restraining order or  
20 injunction expires or until the Urban Contractor requests it be  
21 discontinued, whichever occurs first. The Urban Contractor shall  
22 be liable for any damages suffered by the seller as a result of such  
23 extensions of the Performance Date.

24 (4) If the seller and the noncontractor buyer under the  
25 Proposed Contract make any substantive changes in the Proposed  
26 Contract, such changes shall constitute a new Proposed Contract that  
27 cannot be performed without compliance with all of the procedures  
28 set forth in this article.

1           (5) If an Urban Contractor issuing a NOI fails to complete  
2 its exercise of the Right of First Refusal by the Performance Date,  
3 the seller shall be free to sell its entitlement in substantial  
4 conformance with the terms and conditions set forth in the Proposed  
5 Contract . An Urban Contractor issuing a NOI may assign its rights  
6 to exercise a right of first refusal to another Urban Contractor and  
7 the assignee shall have the same rights as the assignor to complete  
8 the purchase by the Performance Date.

9           (6) In exercising the Right of First Refusal, an Urban  
10 Contractor, at its option, may either agree to perform the Proposed  
11 Contract in its entirety, including all of its terms and conditions,  
12 or agree to pay the price offered under the Proposed Contract for  
13 the annual entitlement and transportation rights without condition  
14 and without being entitled to enforce or being subject to any other  
15 provisions of the Proposed Contract.

16           (e) As used in this article, "price" shall mean the dollar  
17 amount of consideration provided for in the Proposed Contract.

18           (f) Upon the effective date of any such transfer, the seller  
19 shall be relieved of and the buyer shall become liable to the State  
20 for all prospective Delta Water Charges, the related Transportation  
21 Charges and any other charges for the annual entitlements and  
22 associated transportation rights transferred unless the seller and  
23 buyer provide otherwise in the contract for the transfer and the  
24 State approves such other provisions. However, the contractor  
25 making the sale shall remain obligated to the State to make the  
26 payments if the buyer defaults on its payments to the State related  
27 to the water transferred and is not a party to a long term water  
28 supply contract of the type contained in Department of Water

Resources Bulletin Number 141. If the contractor making the sale is required to make any payments to the State as a result of the buyer's default, the entitlement transferred to the defaulting buyer shall, if provided for in the Proposed Contract, revert back to the contractor making the sale. The buyer may also be liable for any charges imposed pursuant to subdivision (g) of this article.

(g) A contractor which is a buyer of annual entitlement pursuant to this article may receive deliveries using any portion of the capacity previously provided by the State in each reach of the project transportation facilities for such contractor that is necessary for transporting the entitlement purchased by it on the same basis as any other entitlement provided for in its Table A in effect prior to the date of the Monterey Amendment. Such contractor may also use any transportation rights transferred to it by a seller in the same manner as the seller was entitled to use them and any unused capacity in any of the reaches specified in this paragraph so long as project operations and/or priority of service of water to other contractors participating in repayment of capital costs in such reaches is not adversely affected. The State shall not be responsible for any resulting adverse impacts upon its ability to provide such contractor peaking capacity. The capital cost and minimum, operation, maintenance, power and replacement components of the Transportation Charge allocated to a buying contractor needing transportation capacity in excess of the capacity factors on which its charges are based in any reach shall be determined prospectively based upon the increase in the buying contractor's annual entitlement resulting from the purchase, and service of water to fulfill annual entitlement to other contractors shall not be

1 impaired. The capital cost and minimum operation, maintenance,  
2 power and replacement components of the Transportation Charges shall  
3 then be reallocated among the other entities participating in  
4 repayment of costs of that reach. For the purposes of this  
5 determination, all payments received by the State from the seller  
6 relating to the annual entitlement sold shall be deemed to have been  
7 received from the buying contractor. Any increased Transportation  
8 minimum operation, maintenance, power and replacement component  
9 charges allocated to the buying contractor pursuant to this  
10 subdivision (g) shall begin January 1 of the year following the  
11 effective date of the transfer.

12 (h) Individual contractors may transfer entitlements among  
13 themselves in amounts in addition to those otherwise provided for  
14 in this article. The State shall expeditiously execute any  
15 necessary documents and approve all contracts involving permanent  
16 sales of entitlements among contractors, including permanent sales  
17 among Urban Contractors. Such sales shall be subject to the  
18 provisions of subdivisions (b), (f) and (g) of this article;  
19 *Provided, however, that for a buying contractor needing*  
20 *transportation capacity in excess of the capacity factors on which*  
21 *its charges are based in any reach, reallocation of the*  
22 *Transportation capital cost component charges for transfers other*  
23 *than (i) the 130,000 acre-feet provided for in this article and (ii)*  
24 *the approximate 33,000 acre-feet of transfers proposed from*  
25 *contractors located in Santa Barbara or San Luis Obispo counties,*  
26 *shall be determined both prospectively and retroactively.*

27 (i) On January 1 following the year in which such Monterey  
28 Amendments take effect and continuing every year thereafter until

the end of the project repayment period: (i) Kern County Water Agency's (KCWA) annual entitlement for agricultural use as currently designated in Table A-1 of its contract shall be decreased by 40,670 acre-feet; (ii) Dudley Ridge Water District's (DRWD) annual entitlement as currently designated in Table A of its contract shall be decreased by 4,330 acre-feet; and (iii) the State's prospective charges (including any adjustments for past costs) for the 45,000 acre-feet of annual entitlements to be relinquished by KCWA and DRWD thereafter shall be deemed to be costs of project conservation facilities and included in the Delta Water Charge for all contractors in accordance with the provisions of Article 22. If by November 20, 1995 and each October 1 thereafter until the Monterey Amendments of both KCWA and DRWD take effect, KCWA and DRWD at their option notify the State in writing that they will relinquish up to their shares of 45,000 acre-feet of annual entitlements for the following calendar year beginning before the Monterey Amendments take effect, the State, when and if the Monterey Amendments take effect, shall adjust the charges retroactively for the acre-feet relinquished by KCWA and DRWD to January 1 of each year for which water was relinquished. The delivery points for the 45,000 acre-feet of annual entitlement to be relinquished shall be identified for the State by KCWA and DRWD to enable the State to calculate the transportation costs for the 45,000 acre-feet to be included in the Delta Water Charge.

1           25. Article 54 is added to read:

2           54. Usage of Lakes Castaic and Perris

3           (a) The State shall permit the contractors participating in  
4 repayment of the capital costs of Castaic Lake (Reach 30) and Lake  
5 Perris (Reach 28J) to withdraw water from their respective service  
6 connections in amounts in excess of deliveries approved pursuant to  
7 other provisions of the state water contracts. Each such contractor  
8 shall be permitted to withdraw up to a Maximum Allocation from the  
9 reach in which it is participating. The contractors participating  
10 in repayment of Castaic Lake may withdraw a collective Maximum  
11 Allocation up to 160,000 acre-feet pursuant to this article, which  
12 shall be apportioned among them pursuant to the respective  
13 proportionate use factors from the Department of Water Resources'  
14 Bulletin 132-94, Table B-1 upon which capital cost repayment  
15 obligations are based, as follows:

16  
17                           Castaic Lake

18   Participating	Proportionate Use	Maximum
19   Contractor	Factor	Allocation
		(Acre Feet)
20   The	0.96212388	153,940
21   Metropolitan		
22   Water District		
23   of Southern		
24   California		
25   Ventura County	0.00860328	1,376
26   Flood Control		
27   and Water		
28   Conservation		
District		
Castaic Lake	0.02927284	4,684
Water Agency		
Total	1.00000000	160,000

1       The Metropolitan Water District of Southern California, as  
2 the only contractor participating in repayment of Lake Perris,  
3 shall be allocated a Maximum Allocation at Lake Perris of 65,000  
4 acre-feet based upon a proportionate use factor of 1.00000000.

5       The Maximum Allocation totals of 160,000 acre-feet and  
6 65,000 acre-feet shall not be subject to adjustment. The  
7 individual contractor's Maximum Allocations shall be adjusted  
8 only as agreed to among the contractors desiring to adjust their  
9 Maximum Allocations. Adjustments between the contractors shall  
10 be subject to approval of the State which approval shall be given  
11 unless there are adverse impacts upon another contractor  
12 participating in the reach which are unacceptable to such  
13 contractor. The participating contractors will, in consultation  
14 with the State, cooperate with each other in an effort to promote  
15 efficient utilization of Castaic Lake, and to minimize any  
16 adverse impacts to each other, through coordination of deliveries  
17 pursuant to other provisions of the State Water Contract as well  
18 as withdrawals of allocations pursuant to this article.

19       (b) The State shall operate Castaic and Perris Reservoirs  
20 as transportation facilities in a manner consistent with this  
21 article. A contractor desiring to withdraw a portion or all of  
22 its Maximum Allocation shall furnish the State with a proposed  
23 delivery schedule. The proposed schedule may be submitted as  
24 part of the preliminary water delivery schedule submitted  
25 pursuant to Article 12(a)(1). Upon receipt of a schedule the  
26 State shall promptly review it to ensure that the amounts, times  
27 and rates of delivery will be consistent with the State's ability  
28 to operate the reach. The contractor may modify its proposed

1 delivery schedule at any time, and the modified schedule shall be  
2 subject to review in the same manner. If necessary, the State  
3 may modify the schedule after consultation with the contractor  
4 and other contractors participating in repayment of that reach  
5 but may not change the total quantity of water to be withdrawn.  
6 As part of the consultation, the State shall advise a contractor  
7 if it determines a withdrawal will adversely impact the rate of  
8 delivery provided for the contractor in this contract. The State  
9 shall not be responsible for any such impacts.

10 (c) A contractor may withdraw all or a portion of its  
11 Maximum Allocation. It shall restore any withdrawn portion of  
12 such allocation by furnishing an equivalent amount of replacement  
13 water to the reservoir from which the water was withdrawn within  
14 five years from the year in which the withdrawal takes place. The  
15 unused portion of the allocation, in addition to any replacement  
16 water furnished to the reservoir, shall remain available for  
17 subsequent withdrawal. The State shall keep an accounting of the  
18 contractor's storage withdrawals and replacements. In any year,  
19 the State shall permit a contractor to withdraw an amount  
20 equivalent to the contractor's Maximum Allocation minus remaining  
21 replacement water requirements due to previous withdrawals. If  
22 the contractor fails to schedule and replace the withdrawn water  
23 within the five-year return period, the State shall provide the  
24 replacement water from water scheduled for delivery to the  
25 contractor in the sixth year or as soon as possible thereafter.  
26 The total amount of scheduled annual entitlement which a  
27 contractor can use in any one year for restoring its Maximum  
28 Allocation and storing water in surface storage facilities

outside of its service area pursuant to Article 56 shall be the sum of the maximum amount the contractor can add to storage that year pursuant to Article 56 and the amount of acre-feet shown in column 2 of the following table, depending on the State's final water supply allocation percentage as shown in column 1.

1. Final Water Supply Allocation Percentage	2. Maximum Acre-Feet of Scheduled Entitlement for Restoring Maximum Allocation*
50% or less	100,000
51%	98,000
52%	96,000
53%	94,000
54%	92,000
55%	90,000
56%	88,000
57%	86,000
58%	84,000
59%	82,000
60%	80,000
61%	78,000
62%	76,000
63%	74,000
64%	72,000
65%	70,000
66%	68,000
67%	66,000
68%	64,000
69%	62,000
70%	60,000
71%	58,000
72%	56,000
73%	54,000
74%	52,000
75 to 99%	50,000
100%	no limit

\* Excludes the maximum amount that can be added to storage in a year pursuant to Article 56, which may be used in addition to the amounts in this table to restore Maximum Allocation.

1       A contractor may use any of this total amount for  
2 replacement water but cannot use any more than that provided for  
3 in Article 56 to add to storage in project surface conservation  
4 facilities and in nonproject surface storage facilities. There  
5 shall be no limit under this article on the amount of scheduled  
6 annual entitlement a contractor can use to restore its Maximum  
7 Allocation in a year when its percentage of annual water supply  
8 allocation is one-hundred percent (100%), nor shall there be any  
9 limit under this article on the amount of interruptible water,  
10 nonproject water or water obtained through an exchange which a  
11 contractor can use to restore its Maximum Allocation.

12       (d) For any replacement water furnished to reservoir  
13 storage pursuant to this article, the responsible contractor  
14 shall pay the State charges for the conservation, if any, and  
15 transportation of such replacement water as are associated with  
16 the type of replacement water that is furnished, as if such water  
17 were delivered to the turnout at the reservoir to which the  
18 replacement water is furnished. Adjustments from estimated to  
19 actual costs shall be subject to provisions applicable to the  
20 type of replacement water. The State shall not charge  
21 contractors for water withdrawn pursuant to this article.

22       (e) The State shall operate capacity in Castaic and Perris  
23 Reservoirs, not required for purposes of Maximum Allocation  
24 deliveries, in compliance with the requirement of Article 17(b)  
25 of The Metropolitan Water District of Southern California's water  
26 supply contract with the State to maintain an amount of water  
27 reasonably sufficient to meet emergency requirements of the  
28 contractors participating in repayment of that reach. A

1 contractor receiving water pursuant to this article accepts that  
2 the State shall not be liable for any damage, direct or indirect,  
3 arising from shortages in the amount of water to be made  
4 available from that reservoir to meet the contractor's actual  
5 emergency requirements as a result of prior storage withdrawals  
6 by that contractor pursuant to this article. Nothing in this  
7 article shall permit or require the State to adjust allocations  
8 or deliveries under Article 18.

9 (f) To the extent a contractor, during a calendar year,  
10 uses all or a portion of its Maximum Allocation, the State may,  
11 to the extent necessary to service project purposes, reduce that  
12 contractor's requested peaking service. Such reduction in  
13 peaking service shall only occur to the extent such usage of  
14 Maximum Allocation causes the State to be unable to provide all  
15 peaking service requested. This paragraph shall not apply to the  
16 extent the contractor requested usage of Maximum Allocation as  
17 part of the preliminary water delivery schedule submitted  
18 pursuant to Article 12(a)(1).

19 (g) The State may reduce water stored in Castaic Lake and  
20 Lake Perris to the extent necessary for maintenance and to  
21 respond to emergencies resulting from failure of project  
22 transportation facilities or of other supply importation  
23 facilities serving the State project service area. The State  
24 shall promptly replace water within the Maximum Allocation as  
25 soon as the need for the reduction terminates.

26  
27  
28

1        26. Article 55 is added to read:

2        55. Transportation of Nonproject Water

3        (a) Subject to the delivery priorities in Article 12(f),  
4 contractors shall have the right to receive services from any of  
5 the project transportation facilities to transport water procured  
6 by them from nonproject sources for delivery to their service  
7 areas and to interim storage outside their service areas for  
8 later transport and delivery to their service areas: *Provided,*  
9 that except to the extent such limitation in Section 12931 of the  
10 Water Code be changed, a contractor shall not use the project  
11 transportation facilities under this option to transport water  
12 the right to which was secured by the contractor through eminent  
13 domain unless such use be approved by the Legislature by  
14 concurrent resolution with the majority of the members elected to  
15 each house voting in favor thereof.

16        (b) For any nonproject water delivered pursuant to this  
17 article, contractors shall pay the State the same (including  
18 adjustments) for power resources (including on-aqueduct,  
19 off-aqueduct, and any other power) incurred in the conservation  
20 and transportation of such water as if such nonproject water were  
21 entitlement water, as well as all incremental operation,  
22 maintenance, and replacement costs, and any other incremental  
23 costs, which may include an administrative or contract  
24 preparation charge, all as determined by the State. Incremental  
25 costs shall mean those nonpower costs which would not be incurred  
26 if nonproject water were not scheduled for or delivered to  
27 contractors. Only those contractors not participating in the  
28 repayment of a reach shall be required to pay a use of facilities

1 charge for the delivery of nonproject water from or through that  
2 reach. Costs for transporting water placed into interim storage  
3 shall be paid in the same manner provided for in subdivision  
4 (c) (6) of Article 56.

5 (c) The amounts, times and rates of delivery of nonproject  
6 water shall be provided for pursuant to a water delivery schedule  
7 to be issued in the same manner as provided for in Article 12.  
8 The costs specified in this article shall be paid for at the same  
9 time the corresponding project water costs are paid.

10  
11 **27. Article 56 is added to read:**

12 **56. Use, Storage and Sale of Project Water Outside of**  
13 **Service Area and Storage of Water in Project Surface**  
**Conservation Facilities**

14 **(a) State Consent to Use of Project Water Outside of**  
15 **Service Area**

16 Notwithstanding the provisions of Article 15(a), the State  
17 hereby consents to the District storing project water outside its  
18 service area for later use within its service area in accordance  
19 with the provisions of subdivision (c) of this article and to the  
20 District selling project water for use outside its service area  
21 in accordance with the provisions of subdivision (d) of this  
22 article.

23 **(b) Groundwater Storage Programs**

24 The District shall cooperate with other contractors in the  
25 development and establishment of groundwater storage programs.

26 **(c) Storage of Project Water Outside of Service Area**

27 (1) A contractor may elect to store project water outside  
28 its service area for later use within its service area, up to the

1 limits and in accordance with the provisions provided for in this  
2 subdivision (c) and any applicable water right laws, by setting  
3 forth on the preliminary water delivery schedule submitted to the  
4 State on or before October 1 of each year pursuant to Article  
5 12(a) the quantity of project water it wishes to store in the  
6 next succeeding year. There shall be no limit on the amount of  
7 project water a contractor can store outside its service area  
8 during any year in a then existing and operational groundwater  
9 storage program. The amount of project water a contractor can  
10 add to storage in project surface conservation facilities and in  
11 nonproject surface storage facilities located outside the  
12 contractor's service area each year shall be limited to the  
13 lesser of the percent of the contractor's Table A annual  
14 entitlement shown in column 2 or the acre-feet shown in column 3  
15 of the following table, depending on the State's final water  
16 supply allocation percentage as shown in column 1. However,  
17 there shall be no limit to storage in nonproject facilities in a  
18 year in which the State's final water supply allocation  
19 percentage is one hundred percent. These limits shall not apply  
20 to water stored pursuant to Article 12(e).

21

73%	48%	192,000
74%	49%	196,000
75% or more	50%	200,000

1           (2) Storage capacity in project surface conservation  
2 facilities at any time in excess of that needed for project  
3 operations shall be made available to requesting contractors for  
4 storage of project and nonproject water. If such storage  
5 requests exceed the available storage capacity, the available  
6 capacity shall be allocated among contractors requesting storage  
7 in proportion to their annual entitlements designated in their  
8 Table A's for that year. A contractor may store water in excess  
9 of its allocated share of capacity as long as capacity is  
10 available for such storage.

11           (3) If the State determines that a reallocation of excess  
12 storage capacity is needed as a result of project operations or  
13 because of the exercise of a contractor's storage right, the  
14 available capacity shall be reallocated among contractors  
15 requesting storage in proportion to their annual entitlements  
16 designated in their Table A's for that year. If such  
17 reallocation results in the need to displace water from the  
18 storage balance for any contractor or noncontractor, the water to  
19 be displaced shall be displaced in the following order of  
20 priority:

21           First, water, if any, stored for noncontractors.

22           Second, water stored for a contractor that previously was in  
23 excess of that contractor's allocation of storage capacity.

24           Third, water stored for a contractor that previously was  
25 within that contractor's allocated storage capacity.

26           The State shall give as much notice as feasible of a  
27 potential displacement.  
28

(4) Any contractor electing to store project water outside its service area pursuant to this subdivision may not sell project water under the provisions of subdivision (d) of this article during the year in which it elected to store project water. This limitation shall not apply to replacement water furnished to Castaic and Perris Reservoirs pursuant to Article 54, nor to the storage of water introduced into a groundwater basin outside a contractor's service area if recovery is intended to occur within that contractor's service area.

(5) The restrictions on storage of project water outside a contractor's service area provided for in this subdivision (c), shall not apply to storage in any project offstream storage facilities constructed south of the Delta after the date of this amendment.

(6) For any project water stored outside its service area pursuant to this subdivision (c), a contractor shall pay the State the same (including adjustments) for power resources (including on-aqueduct, off-aqueduct, and any other power) incurred in the transportation of such water as the contractor pays for the transportation of annual entitlement to the reach of the project transportation facility from which the water is delivered to storage. If annual entitlement is stored, the Delta Water Charge shall be charged only in the year of delivery to interim storage. For any stored water returned to a project transportation facility for final delivery to its service area, the contractor shall pay the State the same for power resources (including on-aqueduct, off-aqueduct, and any other power) incurred in the transportation of such water calculated from the

1 point of return to the aqueduct to the turn-out in the  
2 contractor's service area. In addition, the contractor shall pay  
3 all incremental operation, maintenance, and replacement costs,  
4 and any other incremental costs, as determined by the State,  
5 which shall not include any administrative or contract  
6 preparation charge. Incremental costs shall mean those nonpower  
7 costs which would not be incurred if such water were scheduled  
8 for or delivered to the contractor's service area instead of to  
9 interim storage outside the service area. Only those contractors  
10 not participating in the repayment of a reach shall be required  
11 to pay a use of facilities charge for use of a reach for the  
12 delivery of water to, or return of water from, interim storage.

13 (7) A contractor electing to store project water in a  
14 nonproject facility within the service area of another contractor  
15 shall execute a contract with that other contractor prior to  
16 storing such water which shall be in conformity with this article  
17 and will include at least provisions concerning the point of  
18 delivery and the time and method for transporting such water.

19 (d) **Sale of Project Water For Use Outside Service Area**

20 (1) If in any year a contractor has been allocated annual  
21 entitlement that it will not use within its service area, the  
22 contractor has not elected to store project water in accordance  
23 with the provisions of subdivision (c) of this article during  
24 that year, and the contractor has not elected to carry over  
25 entitlement water from the prior year pursuant to the provisions  
26 of Article 12(e), the contractor may sell such annual  
27 entitlement for use outside its service area in accordance with  
28 the following provisions.

1           (2) Each year the State shall establish an annual  
2 entitlement water pool (the Pool) for contractors wishing to sell  
3 or buy project water pursuant to the provisions of this  
4 subdivision. The Pool shall constitute the exclusive means of  
5 selling portions of annual entitlements not desired by  
6 contractors that year. Contractors willing to sell to or buy  
7 water from the Pool shall notify the State in writing of their  
8 desire to do so indicating the quantity to be sold or purchased.  
9 Contractors shall have the first priority to purchase all water  
10 placed in the Pool. The State may purchase any water remaining  
11 in the Pool not purchased by contractors at the same price  
12 available to contractors and use such water for the purpose of  
13 providing additional carryover storage for contractors: *Provided,*  
14 that the State shall consult with the contractors prior to making  
15 any such purchases.

16           (3) Each year, the price per acre-foot to be paid by the  
17 State to contractors selling water placed in the Pool on or  
18 before February 15 that is purchased by a contractor requesting  
19 such purchase by March 1 or by the State on March 1 shall be  
20 equal to fifty percent (50%) of the Delta water rate as of that  
21 date. The price per acre-foot to be paid to the State for the  
22 purchase of water from the Pool by a contractor placing a request  
23 for such purchase on or before March 1 shall be equal to fifty  
24 percent (50%) of the Delta water rate as of that date. Any water  
25 placed in the Pool on or before February 15 that is not purchased  
26 by contractors or the State by March 1 may be withdrawn from the  
27 Pool by the selling contractor.

28

(4) Each year the price per acre-foot to be paid by the State to contractors selling water remaining in the Pool or placed in the Pool after February 15, but on or before March 15 that is purchased by a contractor requesting such purchase by April 1 or by the State on April 1 shall be equal to twenty-five percent (25%) of the Delta water rate as of that date. The price per acre-foot to be paid to the State for the purchase of water from the Pool by a contractor placing a request for such purchase between March 2 and April 1 shall be equal to twenty-five percent (25%) of the Delta water rate as of the later date. Any water placed in the Pool on or before March 15 that is not purchased by a contractor or the State by April 1 may be withdrawn from the Pool by the selling contractor.

(5) If there are more requests from contractors to purchase water from the Pool than the amount in the Pool, the water in the Pool shall be allocated among those contractors requesting such water in proportion to their annual entitlements for that year up to the amount of their requests. If requests to purchase water from the Pool total less than the amount of water in the Pool, the sale of Pool water shall be allocated among the contractors selling such water in proportion to their respective amounts of water in the Pool.

(6) Any water remaining in the Pool after April 1 that is not withdrawn by the selling contractor shall be offered by the State to contractors and noncontractors and sold to the highest bidder: *Provided*, that if the highest bidder is a noncontractor, all contractors shall be allowed fifteen days to exercise a right of first refusal to purchase such water at the price offered by

1 the noncontractor. The price to be paid to the selling  
2 contractor shall be the amount paid by the buyer exclusive of the  
3 amount to be paid by the buyer to the State pursuant to  
4 subdivision (d) (7) of this article.

5 (7) For any water delivered from the Pool to contractors,  
6 the buyer shall pay the State the same for power resources  
7 (including on-aqueduct, off-aqueduct, and any other power)  
8 incurred in the transportation of such water as if such water  
9 were entitlement water, as well as all incremental operation,  
10 maintenance, and replacement costs, and any other incremental  
11 costs, as determined by the State, which shall not include any  
12 administrative or contract preparation charge. Incremental costs  
13 shall mean those nonpower costs which would not be incurred if  
14 such water were not scheduled for or delivered to the buyer.  
15 Only those buyers not participating in the repayment of a reach  
16 shall be required to pay any use of facilities charge for the  
17 delivery of such water from or through the reach. Adjustments  
18 from estimated to actual costs shall be computed by the State  
19 pursuant to these provisions and shall be paid by the buyer or  
20 credited to the buyer at the times and interest rates described  
21 in Article 28(c).

22 (e) **Continuance of Article 12(e) Carry-over Provisions**

23 The provisions of this article are in addition to the  
24 provisions of Article 12(e), and nothing in this article shall be  
25 construed to modify or amend the provisions of Article 12(e).  
26 Any contractor electing to sell project water during any year in  
27 accordance with the provisions of subdivision (d) of this  
28 article, shall not be precluded from using the provisions of

Article 12(e) for carrying over water from the last three months of that year into the first three months of the succeeding year.

(f) **Bona Fide Exchanges Permitted**

Nothing in this article shall be deemed to prevent the District from entering into bona fide exchanges of project water for use outside the District's service area with other parties for project water or nonproject water if the State consents to the use of the project water outside the District's service area. Also, nothing in this article shall be deemed to prevent the District from continuing those exchange or sale arrangements entered into prior to September 1, 1995, which had previously received any required State approvals. A "bona fide exchange" shall mean an exchange of water involving a contractor and another party where the primary consideration for one party furnishing water to another is the return of a substantially similar amount of water, after giving due consideration to the timing or other nonfinancial conditions of the return. Reasonable payment for costs incurred in effectuating the exchange and reasonable deductions from water delivered, based on expected storage or transportation losses may be made. A "bona fide exchange" shall not include a transfer of water from one contractor to another party involving a significant payment unrelated to costs incurred in effectuating the exchange. The State, in consultation with the contractors, shall have authority to determine whether transfers of water constitute "bona fide exchanges" within the meaning of this paragraph and not disguised sales.

1           (g)   **Other Transfers**

2           Nothing in this article shall be deemed to modify or amend  
3 the provisions of Article 15(a), or Article 41, except as  
4 expressly provided for in subdivisions (c) and (d) of this  
5 article.

6  
7           **28.** All balances of wet weather and Article 12(d) water  
8 otherwise available to any contractor executing the Monterey  
9 Amendment shall be eliminated as of the effective date of such  
10 amendment and no new balances for such water shall be  
11 established.

12  
13           **29.   Effective Dates and Phase-in.**

14           (a) No Monterey Amendment to any contractor's water supply  
15 contract shall take effect unless and until both of the following  
16 have occurred (1) the Monterey Amendments to both the Kern County  
17 Water Agency's and The Metropolitan Water District of Southern  
18 California's contracts have been executed and no legal challenge  
19 has been filed within sixty days of such execution or, if filed,  
20 a final judgment of a court of competent jurisdiction has been  
21 entered sustaining or validating said amendments; and (2) the  
22 State has conveyed the property which constitutes the Kern Fan  
23 Element of the Kern Water Bank to Kern County Water Agency  
24 pursuant to the Kern Water Bank Contact provided for in Article  
25 52 either on or before October 1, 1996 or, if the conveyance on  
26 such date has been prevented by an interim court order, within  
27 ninety days after such court order has become ineffective so long  
28 as said ninety days expires not later than January 1, 2000. The

1 October 1, 1996 date and the January 1, 2000 date may be extended  
2 by unanimous agreement of the State, Kern County Water Agency and  
3 The Metropolitan Water District of Southern California.

4 (b) The State shall administer the water supply contracts  
5 of any contractors that do not execute the Monterey Amendment so  
6 that such contractors are not affected adversely or to the extent  
7 feasible beneficially by the Monterey Amendments of other  
8 contractors' water supply contracts.

9 (c) If a court of competent jurisdiction issues a final  
10 judgment or order determining that any part of a contractor's  
11 Monterey Amendment is invalid or unenforceable, all provisions of  
12 that amendment shall be of no force or effect as to such  
13 contractor, except as provided in subdivisions (e) and (f) of  
14 this paragraph.

15 (d) If any part of the Monterey Amendment of the Kern  
16 County Water Agency's or The Metropolitan Water District of  
17 Southern California's contracts or if the conveyance of the Kern  
18 Fan Element of the Kern Water Bank to the Kern County Water  
19 Agency provided for in Article 52 is determined by a court of  
20 competent jurisdiction in a final judgment or order to be invalid  
21 or unenforceable, the Monterey Amendments of all contractors and  
22 the Kern Water Bank Contract shall be of no force and effect  
23 except as provided in subdivisions (e) and (f) of this paragraph.

24 (e) Notwithstanding subdivisions (c), (d) and (f) of this  
25 paragraph, if any part of the Monterey Amendment of the Kern  
26 County Water Agency's or The Metropolitan Water District of  
27 Southern California's contract is determined by a court of  
28 competent jurisdiction in a final judgment or order to be invalid

1 or unenforceable, and if Articles 52 and 53 (i) have been  
2 implemented (i.e., the property which constitutes the Kern Fan  
3 Element of the Kern Water Bank has been conveyed by the State and  
4 the 45,000 acre-feet of annual entitlements have been  
5 relinquished to the State), the implementation of the  
6 relinquishment shall not be reversed unless the implementation of  
7 the conveyance is also reversed, and conversely, implementation  
8 of the conveyance shall not be reversed unless implementation of  
9 the relinquishment is also reversed. Nothing in this subdivision  
10 shall affect any party's right to seek additional damages,  
11 compensation or any other remedy available at law or in equity.

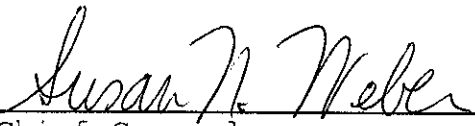

12 (f) The total invalidity or unenforceability of one  
13 contractor's Monterey Amendment as provided for in subdivision  
14 (c) of this paragraph or of all contractor's Monterey Amendments  
15 as provided for in subdivision (d) of this paragraph or of the  
16 Kern Water Bank Contract as provided for in subdivision (d) of  
17 this paragraph may be avoided only if such invalidity or  
18 unenforceability is explicitly waived in writing signed by the  
19 State, Kern County Water Agency and The Metropolitan Water  
20  
21  
22  
23  
24  
25  
26  
27  
28

1 District of Southern California. In cases arising under  
2 subdivision (c) or (d), the affected contractor whose Monterey  
3 Amendment has been determined to be partially invalid or  
4 unenforceable must first request the waiver.

5  
6 IN WITNESS WHEREOF, the parties hereto have executed this  
7 Amendment on the date first above written.

AMENDMENT NO. 19 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

THIS AMENDMENT to the Water Supply Contract is made this 21<sup>st</sup> day of  
December, 1999, pursuant to the provisions of the California Water Resources  
Development Bond Act, the Central Valley Project Act, and other applicable laws of the State  
of California, between the State of California, acting by and through its Department of Water  
Resources, herein referred to as the "State," and Alameda County Flood Control and Water  
Conservation District, Zone 7, herein referred to as "District."

RECITALS:

WHEREAS, the State and the District have entered into and subsequently amended a  
Water Supply Contract (the "Water Supply Contract") providing that the State will supply  
certain quantities of water to the District, and providing that the District shall make certain  
payments to the State, and setting forth the terms and conditions of such supply and such  
payment; and

BWG 11/22/99

WHEREAS, the contractors and the State have amended Water Supply Contracts to implement provisions of the Monterey Agreement (the "Monterey Amendment"); and

WHEREAS, among other things, Article 53 of the Water Supply Contract provides for the permanent transfer of up to 130,000 acre-feet of agricultural entitlement water to urban agencies, and

WHEREAS, the State and District wish to set forth their agreement as to such matters as (i) the 7,000 acre-feet per year increase in the District's annual entitlement, (ii) the transfer of related transportation repayment obligations, (iii) the delivery priority for the purchased entitlement, and (iv) the revision of proportionate use of facilities factors set forth in the Water Supply Contract; and

WHEREAS, the State and Kern County Water Agency ("KCWA") are, simultaneously with the execution and delivery of this Amendment, entering into Amendment No. 30 to KCWA's Water Supply Contract between KCWA and the State in order to reflect (i) the transfer of annual entitlement described herein, (ii) the transfer of related transportation repayment obligations, and (iii) the revision of proportionate use of facilities factors; and

WHEREAS, this Amendment is permitted by the terms of the District's Water Supply Contract, and except as amended herein, the provisions of the Water Supply Contract will remain in full force and effect;

NOW, THEREFORE, IT IS MUTUALLY AGREED that the following changes are hereby made to the District's Water Supply Contract with the State:

1. Article 53(j) is added to read:

- (j) In accordance with Article 53(a) the District is increasing its Table A entitlement amount beginning in 2000 and each year thereafter by 7,000 acre-feet by purchasing from Kern County Water Agency 7,000 acre-feet of the 130,000 acre-feet made available to Urban Contractors. As a result of this purchase, Table A as designated in Article 6 is amended and attached as Exhibit A. The District is also purchasing 7,000 acre-feet of additional delivery capability on the South Bay Aqueduct. The following apply to these purchases:
- (1) The District's delivery capability for transportation of entitlement water to the District's service area shall increase by 7,000 acre-feet annually.
  - (2) Increases to the District's Delta Water Charge, Transportation Charge and Water System Revenue Bond Surcharge resulting from the increase in the District's annual entitlements and maximum annual entitlement shall commence on January 1, 2000, and be identified by the State and included in the annual Statement of Charges to the District.
  - (3) Recognizing that the District will not be using Reach 31A of the Coastal Branch of the California Aqueduct for delivery of any of the 7,000 acre-feet of annual entitlement purchased from KCWA, effective January 1, 2000, KCWA is relieved of and the District is liable to the State for all prospective

Transportation Charges and the related Water System Revenue Bond  
Surcharge payments for Reach 31A for the applicable portion of the  
7,000 acre-feet of annual entitlement purchased from KCWA.

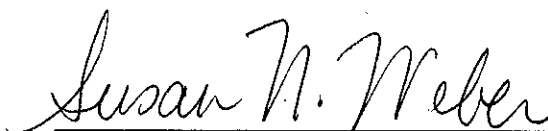

- (4) All future adjustments in charges and credits of past costs associated with the 7,000 acre-feet of annual entitlement (or applicable portion thereof) and the related delivery capability in Reaches 1 through 10A of the California Aqueduct and Reach 31A of the Coastal Branch shall be attributable to the District as if the District's annual entitlement and the related delivery capability had been increased by the 7,000 acre-feet of annual entitlement purchased from KCWA in years prior to January 1, 2000.
- (5) Exhibit B tables attached hereto show entitlement amounts and rounded-off cubic feet per second (cfs) values. Actual values will be used by the State in implementing the terms of this Amendment.
- (6) The District agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to any and all actions implementing this Amendment and associated agreements.

AMENDMENT NO. 19  
REVISION TO TABLE A  
Alameda County Flood Control and  
Water Conservation District, Zone 7

2. Article 12(c), which defines the limits on the instantaneous rate of flow to the District based on peaking factors, is modified to delete "Ninety-two (92)" and replace it with "Ninety-seven (97)."

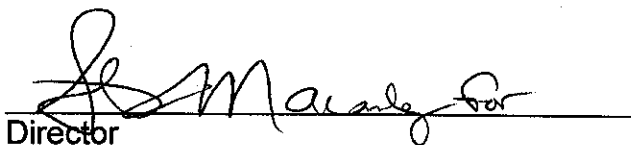

IN WITNESS WHEREOF, the parties hereto have executed this Amendment on the date first above written.

Approved as to legal form  
and sufficiency

• Future Contractor	39,174 AF	10,996 AF			26,710 AF remaining	7,497 AF remaining
Reach 6	29,000	53	7,000	16	36,000	69
Reach 7	0	0	7,000	14	7,000	14
California Aqueduct						
Reach 1 <sup>4</sup>	46,000	69	7,000	3	53,000	72

#### ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, ZONE 7'S ALLOCATED CAPACITY FOR EACH REACH OF CALIFORNIA AQUEDUCT

The transportation rights after the transfer are estimated to be as follows:

California Aqueduct <sup>1</sup>	Existing Annual Entitlement (AF) (1)	Existing Capacity (cfs) (2)	Acquired Annual Entitlement (AF) (3)	Capacity Acquired from Kern County Water Agency <sup>5</sup> (cfs) (4)	Total Annual Entitlement (AF) (5)	Total Capacity (cfs) (6)
Reach 1 <sup>4</sup>	46,000	69	7,000	20	53,000	89
Reach 2A	0	0	7,000	20	7,000	20
Reach 2B	0	0	7,000	20	7,000	20
Reach 3	0	0	7,000	20	7,000	20
Reach 4	0	0	7,000	20	7,000	20
Reach 5	0	0	7,000	20	7,000	20
Reach 6	0	0	7,000	20	7,000	20
Reach 7	0	0	7,000	20	7,000	20
Reach 8C	0	0	7,000	20	7,000	20
Reach 8D	0	0	7,000	20	7,000	20
Reach 9	0	0	2,257	7 <sup>6</sup>	2,257	7
Reach 10A	0	0	2,257	7 <sup>6</sup>	2,257	7
Coastal Aqueduct						
Reach 31A <sup>7</sup>	0	0	0	0	0	0

1. These numbers apply to the reaches as set forth in Bulletin 132-97, Appendix B, Figure 4, "Repayment Reaches and Descriptions."
2. Capacity acquired from Future Contractor is sufficient to deliver up to 7,000 acre-feet annually, based on procedures developed in 1967.
3. Reach 5 capacity is based on Lake Del Valle storage in acre-feet.
4. Zone 7's total transportation capacity in Reach 1 is 92 cfs; 69 cfs from existing entitlement, 20 cfs purchased from KCWA and 3 cfs purchased from Future Contractor. The total volume for delivery of Zone 7's water is 60,000 acre-feet; 46 TAF existing, 7 TAF from KCWA purchase, and 7 TAF from Future Contractor share.
5. From the Delta to Kern County Water Agency's service area.
6. The Department will allocate cost of 7 cfs capacity and 2,257 acre-feet in Reach 9 and 10A to Zone 7 for repayment purposes and the right to use the 7 c of transportation capacity as described in Article 53 of Zone 7's long-term Water Supply Contract.
7. The Department will allocate cost of 13 cfs capacity and 4,743 acre-feet in Reach 31A to Zone 7 for repayment purposes only as described in Article 53 of Zone 7's long-term Water Supply Contract.

THIS AMENDMENT to the Water Supply Contract is made this 29<sup>th</sup> day of December, 1999, pursuant to the provisions of the California Water Resources Development Bond Act, the Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State," and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as "Agency."

**RECITALS:**

- A. The State and the Agency have entered into and subsequently amended a long-term Water Supply Contract, herein referred to as the "contract," providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment.
- B. The contractors and the State have amended the contract to implement provisions of the Monterey Agreement.

- C. The Agency has entered into an agreement with the Lost Hills Water District, which is a member unit of the Kern County Water Agency, herein referred to as KCWA, for the permanent transfer of 15,000 acre feet of State Water Project annual entitlement held by KCWA.
- D. Both the State and KCWA need to approve the Agency's agreement with Lost Hills Water District before the permanent transfer of entitlements becomes effective.
- E. The State and Agency wish to set forth their agreement as to such matters as (i) the 15,000 acre-feet per year increase in the Agency's annual entitlement, (ii) the transfer of related transportation repayment obligations from KCWA to the Agency, (iii) the delivery priority for the permanently transferred entitlement, and (iv) the revision of proportionate use of facilities factors set forth in the contract.
- F. The State and KCWA are simultaneously with the execution and delivery of this Amendment, entering into Amendment No. 31 to KCWA's long-term Water Supply Contract with the State in order to reflect (i) the transfer of annual entitlement described herein; (ii) the transfer of related transportation repayment obligations, and (iii) the revision of proportionate use of facilities factors.
- G. Construction of the South Bay Aqueduct and Lake Del Valle was initiated prior to completion of the State's long-term water supply contracting program and was designed and constructed for a greater maximum annual entitlement than was ultimately contracted for in 1962.

- H. The proportionate use factors of the South Bay Aqueduct and Lake Del Valle were calculated to permit the three South Bay Aqueduct contractors to avoid paying the transportation charges associated with the uncontracted capacity.
- I. Prior to 2000, transportation charges to the South Bay Aqueduct contractors have excluded costs attributable to delivery of 22,000 acre feet of annual entitlement which is referred to as the "Future Contractor Share."
- J. It was the intent of the State and the Agency that costs attributable to the Future Contractor Share would be allocated to the entity contracting for such entitlements, and a portion of the reimbursable costs of the South Bay Aqueduct were assigned to the future contractor by the State's cost allocation procedures adopted initially in "Proposed Modified Procedures for Calculating Proportionate Use of South Bay Aqueduct Reaches" (DWR 1967).
- K. Under Amendment 19 to the Agency's contract, the Agency acquired 7,000 acre feet of the 22,000 acre feet Future Contractor Share and agreed to undertake the repayment obligations associated with that 7,000 acre feet.
- L. The Agency wishes to purchase 15,000 acre feet of annual entitlement and undertake the repayment obligations associated with such entitlement, including repayment obligations for the remaining portion of the Future Contractor Share in the South Bay Aqueduct, but the Agency expressly declines to assert any right to use storage capacity in Lake Del Valle in excess of use based on current entitlement (that is, based on the

Agency's entitlement prior to this Amendment), due to the need for further investigation on the impacts such use might cause to reservoir levels.

- M. The State wishes to assure that the unpaid past costs of the Future Contractor Share are paid and that a responsible entity undertake the obligation to pay future costs.
- N. The Agency as the entity contracting for additional entitlements is willing to undertake the obligation to pay the Future Contractor Share costs.
- O. The costs attributable to the delivery capability and storage capacity in the South Bay Aqueduct and Lake Del Valle associated with the 15,000 acre-feet will not be paid as a transportation charge but as an "in lieu" charge in recognition of the historical intent of the State and the contractors in permitting the delayed payment, as well as the Agency's above-described decision not to use Lake Del Valle for storage associated with the 15,000 acre-feet of entitlement acquired by this Amendment without first undertaking further investigation of the impact of such use.
- P. The "in lieu" payment is in the nature of a settlement of a contractual dispute and does not in any way provide a right to use, or otherwise guarantee any use of Lake Del Valle or any other portion of the State Water Project, except as otherwise permitted.
- Q. The estimated costs attributable to the Future Contractor Share of the South Bay Aqueduct and Lake Del Valle are shown in Exhibit A.
- R. The State is willing to approve the permanent transfer of entitlement and permit payment of the Future Contractor Share costs, and the cessation of payments of those costs, in accordance with the terms of this Amendment.

NOW, THEREFORE, it is mutually agreed that the following changes are hereby made to the contract:

1. Article 12(c) is revised to read as follows:

In no event shall the State be obligated to deliver water to the Agency through all delivery structures at a total combined instantaneous rate of flow exceeding one hundred twenty-four (124) cubic feet per second, except as this rate of flow may be revised by amendment of this article after submission to the State of the Agency's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

2. Article 53(l) is added to read:

(l)(1) In accordance with Article 53(a) and the terms and conditions of this Amendment, the Agency is increasing its Table A annual entitlements by 15,000 acre-feet beginning in year 2000 and each succeeding year thereafter for the term of the contract by purchasing from Kern County Water Agency 15,000 acre feet of the 130,000 acre-feet made available to Urban Contractors under Article 53(a). As a result of this purchase, Table A as designated in Article 6 is amended as follows:

**TABLE A**

ANNUAL ENTITLEMENTS  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7  
(Acre-feet)

<u>Year</u>	
1	(1968) 6,900
2	(1969) 8,200
3	(1970) 10,000
4	(1971) 11,200
5	(1972) 12,400
6	(1973) 13,600
7	(1974) 14,800
8	(1975) 16,000
9	(1976) 17,200
10	(1977) 18,400
11	(1978) 19,600
12	(1979) 20,800
13	(1980) 22,000
14	(1981) 23,000
15	(1982) 24,000
16	(1983) 25,000
17	(1984) 26,000
18	(1985) 27,000
19	(1986) 28,000
20	(1987) 29,000
21	(1988) 30,000
22	(1989) 31,000
23	(1990) 32,000
24	(1991) 34,000

27	(1994) 40,000
28	(1995) 42,000
29	(1996) 44,000
30	(1997) 46,000
31	(1998) 46,000
32	(1999) 46,000
33	(2000) 53,000
33	(2000) 68,000
And each succeeding	
year thereafter, for the	
term of this contract:	
	53,000
	68,000

(l)(2) Except as limited by subdivision (3) of Article 53(l) of this Amendment, the Agency's delivery capability for transportation of project water to the Agency's service area shall increase by 15,000 acre-feet annually, and increases to the Agency's Delta Water Charge, Transportation Charge and Water System Revenue Bond Surcharge resulting from the increase in the Agency's annual entitlements and maximum annual entitlement shall commence on January 1, 2000, and be identified by the State and included in the annual Statement of Charges to the Agency.

(l)(3) For the 15,000 acre feet of entitlement acquired by this Amendment, the Agency is opting to forego use of the reservoir storage capacity in Lake Del Valle (Reach SB5) for the present. The State concurs in such decision due to the need for further investigation on lake level impacts. The Agency agrees to pay annually an "In Lieu" fee to the State in an amount equal to the annual payments for retroactive and future Transportation capital cost component charges, at the project interest rate, and future Transportation operation, maintenance, power and replacement charges for the South Bay Aqueduct and Lake Del Valle, calculated pursuant to Article 24. Exhibit A shows estimated payments for retroactive and future Transportation capital cost component charges for the South Bay Aqueduct and Lake Del Valle beginning in the year 2000 and continuing to 2035. The In Lieu fee shall be included in the Agency's annual statement of charges and paid by the Agency in the same manner and subject to the same terms and conditions as other charges under this contract. The In Lieu payment does not in any way establish a right to use, or otherwise guarantee any use of, Lake Del Valle.

(l)(4) In 2005 and thereafter, in its sole discretion, the Agency may opt to cease paying the In Lieu fee thereby reducing the Agency's delivery capability and storage capability associated with the 15,000 acre-feet of entitlement in the South Bay Aqueduct and Lake Del Valle by sending to the State a *Notice of Intent to Cease In Lieu Payment* and referencing this Amendment 20, at least six months prior to ceasing payments. The State agrees not to contract with any other entity for use of the South Bay Aqueduct and Lake Del Valle associated with the Future Contractor Share, prior to the receipt of the Agency's *Notice of Intent to Cease In Lieu Payments*, without the Agency's prior written consent. If the Agency sends the *Notice of Intent*, the In Lieu fees paid are not refundable and shall not be used to offset the Agency's other obligations, except as provided in subdivision 5 of this Article 53(l), or except if the Agency wishes to resume such payments, and enters into a separate written contract with the State to do so, and the State, in its sole discretion, determines that In Lieu payments made under this Amendment 20 should be applied to payment obligations in such future contract.

(l)(5) The State confirms its commitment to attempt to utilize the remaining portion of the Future Contractor Share for water supply purposes to the extent permitted by law and confirms that to date the Agency alone has expressed an interest in taking over the repayment obligation for the remaining portion of the Future Contractor Share. The State agrees to cooperate with the Agency in investigations related to expanding use of Lake Del Valle for water supply purposes. The State agrees, if legally and

operationally feasible, to permit Agency to assume repayment obligations for the remaining portion of the Future Contractor Share by including it in Agency's Table B if requested by the Agency and if In Lieu payments have been made without cessation, in which case In Lieu payments made shall be credited to the Agency against the repayment obligation.

(l)(6) If the Agency ceases to make the In Lieu payments at any time, including under the circumstances described in subdivision 4 of this Article 53(l), the remaining provisions of this Amendment 20 shall continue in full force and effect, and the 15,000 acre feet of entitlement associated with the In Lieu payments acquired pursuant to this Amendment not be affected, except that the Department shall revise the instantaneous flow rate in Article 12(c) and change the delivery priority under Article 12(f), in its then current form.

(l)(7) Any over and under adjustments to payments made by KCWA for 1999 and prior years attributable to the 15,000 acre-feet of entitlement (or applicable portion thereof) and the related delivery capacity in Reaches 1 through 10A of the California Aqueduct shall be paid by or credited to KCWA, including refunds or credits of Off-Aqueduct and Water System Revenue Bond reserves. Any over and under adjustments to payments made by the Agency for 2000 and future years attributable to the 15,000 acre-feet of entitlement shall be paid by or credited to the Agency.

(l)(8) For cost allocation and repayment purposes, Exhibit B attached hereto shows entitlement amounts and capacity amounts for each aqueduct reach in which the Agency participates. These redetermined values shall be

used to derive the proportionate use of facilities factors as set forth in Table B as designated in Article 24(b). The capacity amounts shown in Exhibit B are estimated values. Actual values will be used by the State in implementing the terms of this Amendment and in redetermination of Table B of this contract under Article 28.

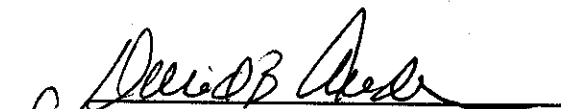

3. This Amendment is contingent upon the effectiveness of Water Supply Contract Amendment No. 31, between the State and KCWA. If either amendment ceases to be effective, the State may identify the date on which the contract amendments shall be deemed inoperative, for the purpose of assuring timely repayment of contract obligations and orderly administration of the long-term water supply contracts.
4. The Agency agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to this Amendment and associated agreements.
5. The State has entered into this Amendment to resolve a contractual dispute with the Agency. The Amendment is designed to address the unique historical situation described (in part) in the recitals. The State does not intend this Amendment to establish a policy precedent of any kind.

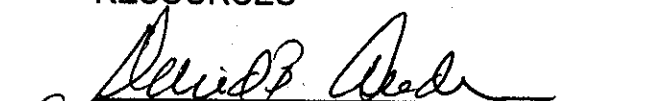

6. This Amendment is permitted by the terms of the contract, and except as amended herein, the provisions of the contract will remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment on the date first above written.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

---

632 51431  
ACFC & WCF  
JG. 1A

AMENDMENT NO. 21 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

---

THIS AMENDMENT to the Water Supply Contract is made this 8<sup>TH</sup> day  
of DECEMBER, 2000, pursuant to the provisions of the California Water  
Resources Development Bond Act, the Central Valley Project Act, and other applicable laws  
of the State of California, between the State of California, acting by and through its  
Department of Water Resources, herein referred to as the "State," and Alameda County  
Flood Control and Water Conservation District, Zone 7, herein referred to as "Agency."

RECITALS:

- A. The State and the Agency have entered into and subsequently amended a long-term Water Supply Contract, herein referred to as the "Contract," providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment.
- B. The contract was amended to add the Monterey Amendment; the Monterey Amendment and the Environmental Impact Report for the Monterey Agreement were challenged in a lawsuit and addressed by the Court of Appeal in *Planning and Conservation League, et al. v. Department of Water Resources and Central Coast*

*Water Agency*, (2000) 83 Cal. App. 4<sup>th</sup> 892; and petitions for review of the Court of Appeal's decision are now pending before the Supreme Court.

- C. The Agency has entered into an agreement with Belridge Water Storage District, a KCWA member unit, for the permanent transfer of 10,000 acre-feet of State Water Project annual entitlement held by KCWA.
- D. The State and Agency wish to set forth their agreement as to such matters as (i) the 10,000 acre-feet per year increase in the Agency's annual entitlement, (ii) the transfer of related transportation repayment obligations from KCWA to the Agency, (iii) the delivery priority for the permanently transferred entitlement, and (iv) the revision of proportionate use of facilities factors set forth in the contract.
- E. The State and KCWA are simultaneously with the execution and delivery of this Amendment, entering into Amendment No. 32 to KCWA's long-term Water Supply Contract with the State in order to reflect (i) the transfer of annual entitlement described herein; (ii) the transfer of related transportation repayment obligations, and (iii) the revision of proportionate use of facilities factors.
- F. The Agency wishes to acquire an additional 10,000 acre-feet of annual entitlement and undertake the repayment obligations associated with such entitlement.
- G. The State is willing to approve the permanent transfer of entitlement in accordance with the terms of this Amendment.
- H. An environmental impact report was prepared in compliance with the California Environmental Quality Act and certified on July 21, 1999. No significant impacts on the environment will result from this transfer.

- I. This transfer is in furtherance of the state policy in favor of water transfers (Water Code Section 475) and will provide the Agency a supplement to its current water supply to meet projected demand in the immediate near term.

NOW, THEREFORE, IT IS MUTUALLY AGREED that the following changes are hereby made to the contract:

1. Article 12(c) is revised to read as follows:

In no event shall the State be obligated to deliver water to the Agency through all delivery structures at a total combined instantaneous rate of flow exceeding one hundred thirty-eight (138) cubic-feet-per-second, except as this rate of flow may be revised by amendment of this article after submission to the State of the Agency's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

2. Article 53(m) is added to read:

(m)(1) In accordance with Article 53(a) and the terms and conditions of this Amendment, the Agency is increasing its Table A annual entitlements by 10,000 acre-feet beginning in year 2001 and each succeeding year thereafter for the term of the contract by purchasing from Kern County Water Agency 10,000 acre-feet of the 130,000 acre-feet made available to Urban Contractors under Article 53(a). As a result of this purchase, Table A as designated in Article 6 is amended as follows:

**TABLE A**

19	(1986) 28,000
20	(1987) 29,000
21	(1988) 30,000
22	(1989) 31,000
23	(1990) 32,000
24	(1991) 34,000
25	(1992) 36,000
26	(1993) 38,000
27	(1994) 40,000
28	(1995) 42,000
29	(1996) 44,000
30	(1997) 46,000
31	(1998) 46,000
32	(1999) 46,000
33	(2000) 68,000
<del>34</del>	<del>(2001)</del> 68,000
34	(2001) 78,000

And each succeeding year thereafter, for the term of this contract:	68,000 78,000
---	------------------

(m)(2) Increases to the Agency's Delta Water Charge, Transportation Charge and Water System Revenue Bond Surcharge resulting from the increase in the Agency's annual entitlements and maximum annual entitlement shall commence on January 1, 2001, and be identified by the State and included in the annual Statement of Charges to the Agency. Deliveries of the 10,000 acre-feet added by this amendment are subject to Article 53(g), including the requirement that service of water to fulfill annual entitlement to other contractors shall not be impaired.

(m)(3) Any over and under adjustments to payments made by KCWA for 1999 and prior years attributable to the 10,000 acre-feet of entitlement (or applicable portion thereof) and the related delivery capacity in Reaches 1 through 10A of the California Aqueduct shall be paid by or credited to KCWA, including refunds or credits of Off-Aqueduct and Water System Revenue Bond reserves. Any over and under adjustments to payments made by the Agency for 2000 and future years attributable to the 10,000 acre-feet of entitlement shall be paid by or credited to the Agency.

(m)(4) For cost allocation and repayment purposes, Exhibit A attached hereto shows entitlement amounts and capacity amounts for each aqueduct reach in which the Agency participates. These redetermined values shall be used to derive the proportionate use of facilities factors as set forth in Table B as designated in Article 24(b). The capacity amounts shown in Exhibit A are estimated values. Actual values will be used by the State in implementing the terms of this Amendment and in redetermination of Table B of this contract under Article 28.

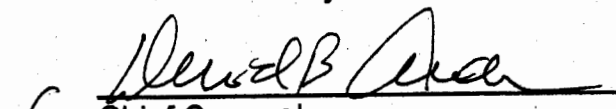

3. This Amendment is contingent upon the effectiveness of Water Supply Contract Amendment No. 32, between the State and KCWA. If either amendment ceases to be effective for any reason, including but not limited to any court order or

judgement entered in *Planning and Conservation League v. DWR & CCWA*, Agency agrees that the State may in its discretion and consistent with the law then in effect as determined by the State, after meeting and conferring with Agency, identify the date on which the contract amendments shall be deemed inoperative, for the purpose of assuring timely repayment of contract obligations and orderly administration of the long-term water supply contracts.

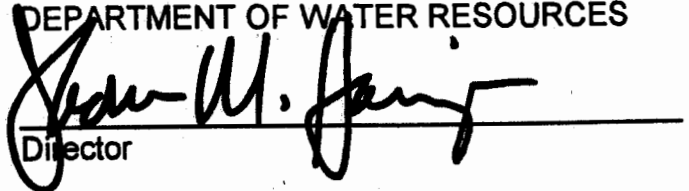

4. The Agency agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to this Amendment and associated agreements.
5. This Amendment is permitted by the terms of the contract, and except as amended herein, the provisions of the contract will remain in full force and effect, including but not limited to the special provisions relating to Lake Del Valle contained in Amendment 20.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment on the date first above written.

DEPARTMENT OF WATER RESOURCES

---

AMENDMENT NO. 22 TO THE WATER SUPPLY CONTRACT  
BETWEEN  
THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

This Amendment is made this 28<sup>th</sup> day of May, 2003,

pursuant to the provisions of the California Water Resources Development Bond Act, the Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, hereinafter referred to as the "State," and Alameda County Flood Control and Water Conservation District, Zone 7, hereinafter referred to as the "District."

RECITALS

- A. The State and the District entered into and subsequently amended a water supply contract (the "contract") providing that the State shall supply certain quantities of water to the District and providing that the District shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payments.
- B. On December 1, 1994, the State and representatives of certain State Water Project contractors executed a document entitled "Monterey Agreement – Statement of Principles – By The State Water Contractors And The State Of

California Department Of Water Resources For Potential Amendments To The State Water Supply Contracts" (the "Monterey Agreement").

- C. The State, the Central Coast Water Authority ("CCWA") and those contractors intending to be subject to the Monterey Agreement subsequently negotiated an amendment to their contracts to implement provisions of the Monterey Agreement, and such amendment was named the "Monterey Amendment."
- D. In October 1995, an environmental impact report ("EIR") for the Monterey Amendment was completed and certified by CCWA as the lead agency, and thereafter the District and the State executed the Monterey Amendment.
- E. The EIR certified by the CCWA was challenged by several parties (the "Plaintiffs") in the Sacramento County Superior Court and thereafter in the Third District Court of Appeal, resulting in a decision in Planning and Conservation League, et al. v. Department of Water Resources, 83 Cal.App.4<sup>th</sup> 892 (2000), which case is hereinafter referred to as "PCL v. DWR."
- F. In its decision, the Court of Appeal held that (i) the Department of Water Resources ("DWR"), not CCWA, had the statutory duty to serve as lead agency, (ii) the trial court erred by finding CCWA's EIR sufficient despite its failure to discuss implementation of Article 18, subdivision (b) of the State Water Project contracts, as a no-project alternative, (iii) said errors mandate preparation of a

new EIR under the direction of DWR, and (iv) the trial court erroneously dismissed the challenge to DWR's transfer of title to certain lands to Kern County Water Agency (the "Validation Cause of Action") and execution of amended State Water Project contracts for failure to name and serve indispensable parties. The Court of Appeal remanded the case to the trial court, ordering it to take the following five actions: (1) vacate the trial court's grant of the motion for summary adjudication of the Validation Cause of Action; (2) issue a writ of mandate vacating the certification of the EIR; (3) determine the amount of attorney fees to be awarded Plaintiffs; (4) consider such orders it deems appropriate under Public Resources Code Section 21168.9(a) consistent with the views expressed in the Appellate Court's opinion; and (5) retain jurisdiction over the action until DWR, as lead agency, certifies an environmental impact report in accordance with CEQA standards and procedures, and the Superior Court determines that such environmental impact report meets the substantive requirements of CEQA.

- G. The State, the contractors, and the Plaintiffs in PCL v. DWR reached an agreement to settle PCL v. DWR, as documented by that certain Settlement Agreement dated MAY 05 2003, 2003 (the "Settlement Agreement"), and in such Settlement Agreement have agreed that the contracts should be amended, for clarification purposes, to delete terms such as "annual entitlement" and "maximum annual entitlement" so that the public, and particularly land use planning agencies, will better understand the contracts.

- H. Pursuant to the Settlement Agreement, the State and the District desire to so amend the District's contract, with the understanding and intent that the amendments herein with respect to subsections (o), (p), and (q) of Article 1, subsection (c) of Article 6, and subsection (a) of Article 16, and to Table A of the District's contract are solely for clarification purposes and that such amendments are not intended to and do not in any way change the rights, obligations or limitations on liability of the State or the District established by or set forth in the contract.
- I. Pursuant to the Settlement Agreement, the State, the contractors and the Plaintiffs in PCL v. DWR also agreed that the contracts should be amended to include a new Article 58 addressing the determination of dependable annual supply of State Water Project water to be made available by existing Project facilities, and the State and District desire to so amend the District's contract.

NOW THEREFORE, IT IS MUTUALLY AGREED, as follows:

1. Article 1(p) is amended to read:

(p) Annual Table A Amount

"Annual Table A Amount" shall mean the amount of project water set forth in Table A of this contract that the State, pursuant to the obligations of this contract and applicable law, makes available for delivery to the District at the delivery structures provided for the District. The term Annual Table A Amount shall not be interpreted to mean that in each year the State will be able to make that

quantity of project water available to the District. The Annual Table A Amounts and the terms of this contract reflect an expectation that under certain conditions the District will receive its full Annual Table A Amount; but that under other conditions only a lesser amount, allocated in accordance with this contract, may be made available to the District. This recognition that full Annual Table A Amounts will not be deliverable under all conditions does not change the obligations of the State under this contract, including but not limited to, the obligations to make all reasonable efforts to complete the project facilities, to perfect and protect water rights, and to allocate among contractors the supply available in any year, as set forth in Articles 6(c), 6(d), 16(b) and 18, in the manner and subject to the terms and conditions of those articles and this contract. Where the term "annual entitlement" appears elsewhere in this contract, it shall mean "Annual Table A Amount." The State agrees that in future amendments to this and other contractor's contracts, in lieu of the term "annual entitlement," the term "Annual Table A Amount" will be used and will have the same meaning as "annual entitlement" wherever that term is used.

2. Article 1(q) is amended to read:

(q) Maximum Annual Table A Amount

"Maximum annual entitlement" shall mean the maximum annual amounts set forth in Table A of this contract, and where the term "maximum annual entitlement" appears elsewhere in this contract it shall mean "Maximum Annual Table A Amounts."

3. Article 1(o) is amended to read:

o) Minimum Project Yield

"Minimum project yield" shall mean the dependable annual supply of project water to be made available assuming completion of the initial project conservation facilities and additional project conservation facilities. The project's capability of providing the minimum project yield shall be determined by the State on the basis of coordinated operations studies of initial project conservation facilities and additional project conservation facilities, which studies shall be based upon factors including but not limited to: (1) the estimated relative proportion of deliveries for agricultural use to deliveries for municipal use assuming Maximum Annual Table A Amounts for all contractors and the characteristic distributions of demands for these two uses throughout the year; and (2) agreements now in effect or as hereafter amended or supplemented between the State and the United States and others regarding the division of utilization of waters of the Delta or streams tributary thereto.

4. Article 6(c) is amended to read:

(c) District's Annual Table A Amounts

Service of Bureau water to the District pursuant to subdivision (b) of this article shall cease in the year preceding the year of initial project water delivery to the District, except as provided in subparagraph (3) of that subdivision. Commencing with the year of initial project water delivery to the District, the State each year shall make

project water available for delivery to the District the amounts of project water designated in Table A of this contract for the respective years of delivery: Provided, That if the District receives service of Bureau water during the year of initial project water delivery to the District pursuant to subparagraph (3) of subdivision (b) of this article, the amount of project water made available for delivery to the District in said year shall be only that portion of the amount of water designated in Table A for said year which is not determined by the State to be Bureau water pursuant to said subparagraph (3). The amount of water designated in Table A for the year of delivery corresponding to the year of initial project water delivery to the District, less any portion thereof which is determined by the State to be Bureau water pursuant to subparagraph (3) of subdivision (b) of this article, and the amount of water designated in Table A for all succeeding years are referred to in this contract as the District's Annual Table A Amounts and shall be subject to change as provided in Article 7(a).

TABLE A

ANNUAL AMOUNTS OF WATER TO BE  
MADE AVAILABLE FOR DELIVERY TO  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

<u>Year</u>	<u>Total Annual Amount In Acre-Feet</u>
1968	6,900
1969	8,200
1970	10,000
1971	11,200
1972	12,400
1973	13,600
1974	14,800
1975	16,000
1976	17,200
1977	18,400
1978	19,600
1979	20,800
1980	22,000
1981	23,000
1982	24,000
1983	25,000
1984	26,000
1985	27,000
1986	28,000
1987	29,000
1988	30,000
1989	31,000
1990	32,000
1991	34,000
1992	36,000
1993	38,000
1994	40,000
1995	42,000
1996	44,000
1997	46,000
1998	46,000
1999	46,000
2000	68,000
2001	78,000
and each succeeding year thereafter, for the term of this contract:	78,000

5. Article 16(a) is amended to read:

(a) Limit on Total of all Maximum Annual Table A Amounts

The District's Maximum Annual Table A Amount hereunder, together with the maximum Table A amounts of all other contractors, shall aggregate no more than 4,185,000 acre-feet of project water.

6. Article 57 is intentionally left blank for future use.

7. Article 58 is added to read:

58. Determination of Dependable Annual Supply of Project Water to be Made Available by Existing Project Facilities.

In order to provide current information regarding the delivery capability of existing project conservation facilities, commencing in 2003 and every two years thereafter the State shall prepare and mail a report to all contractors, and all California city, county, and regional planning departments and agencies within the contractors' project service areas. This report will set forth, under a range of hydrologic conditions, estimates of overall delivery capability of the existing project facilities and of supply availability to each contractor in accordance with other provisions of the contractors' contracts. The range of hydrologic conditions shall include the delivery capability in the driest year of record, the average over the historic extended dry cycle and the average over the long-term. The biennial report will also include, for each of the ten years immediately preceding the

report, the total amount of project water delivered to all contractors and the amount of project water delivered to each contractor.

8. Add the following language at the bottom of Table A:

In any year, the amounts designated in this Table A shall not be interpreted to mean that the State is able to deliver those amounts in all years. Article 58 describes the State's process for providing current information for project delivery capability.

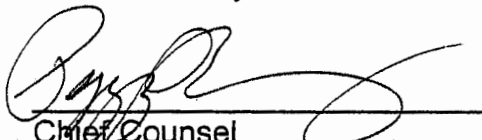

9. Except for Article 58, the changes made by this amendment are solely for clarification purposes, and are not intended to nor do they in any way change the rights, obligations or limitations on liability of the State or the District established by or set forth in the contract, and this amendment shall be interpreted in accordance with this intent.

10. At the time of execution of this Agreement and thereafter, the effectiveness of this Amendment is dependent upon the effectiveness of the District's Monterey Amendment (all provisions therein) and the Kern Fan Element Transaction.

AMENDMENT NO. 23 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

---

SWPAO #03001

THIS AMENDMENT to the Water Supply Contract is made this 1<sup>st</sup> day of August, 2003, pursuant to the provisions of the California Water Resources Development Bond Act, the Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State," and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as "Agency" and collectively herein referred to as "Parties."

RECITALS:

- A. The Parties have entered into and subsequently amended a long-term Water Supply Contract, providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment.
- B. The Agency has entered into an agreement with the Tulare Lake Basin Water Storage District, herein referred to as "Tulare," for the permanent transfer of 400 acre-feet of State Water Project Table A amounts held by Tulare. "Table A amounts" shall mean the amount of project water set forth in Table A of the Agency's Water Supply

Contract, which the State makes available for delivery to the Agency at the delivery structures provided for the Agency.

- C. The Parties wish to set forth their agreement as to such matters as (i) the 400 acre-feet per year increase in the Agency's annual Table A amounts, (ii) the transfer of related transportation repayment obligations from Tulare to the Agency, (iii) the delivery priority for the permanently transferred Table A amounts, and (iv) the revision of proportionate use of facilities factors set forth in the contract.
- D. The State and Tulare are simultaneously with the execution and delivery of this Amendment, entering into Amendment No. 29 to Tulare's long-term Water Supply Contract with the State in order to reflect (i) the transfer of annual Table A amounts described herein; (ii) the transfer of related transportation repayment obligations, and (iii) the revision of proportionate use of facilities factors.
- E. The Agency wishes to acquire an additional 400 acre-feet of Table A amounts and undertake the repayment obligations associated with such Table A amounts.
- F. The State is willing to approve the permanent transfer of Table A amounts in accordance with the terms of this Amendment.
- G. An Initial Study and Negative Declaration was prepared by the Agency in compliance with the California Environmental Quality Act and certified on November 20, 2002. It concluded that no significant impacts on the environment will result from this transfer. The Director of the Department of Water Resources, acting as a responsible agency, has reviewed and considered the Initial Study and Negative Declaration prepared by the Agency prior to approving this agreement.

- H. This transfer is in furtherance of the state policy in favor of water transfers (Water Code Section 475) and will provide the Agency a supplement to its current water supply to meet projected demand in the immediate near term.
- I. The Agency previously acquired 10,000 acre-feet of Table A amounts pursuant to Amendment No. 21. It is noted that the instantaneous rate of flow for delivery of all Table A amounts to the Agency in Amendment No. 21 was incorrectly stated to be 138 cubic feet per second after the acquisition. The corrected instantaneous rate of flow should have been 149 cubic feet per second. This corrected value, based on 6,000 acre-feet of Table A put to agriculture use, is used as the baseline for adding additional Table A capacity acquired pursuant to this Amendment.
- J. In Section 1 of Amendment No. 19, Section 2 of Amendment No. 20, and Section 2 of Amendment No. 21, Article 53(j), 53(l) and 53(m) were numbered incorrectly. To be consistent with the other Water Supply Contracts, Article 53(j), 53(l), and 53(m) should be renumbered to Article 47(d), 47(e) and 47(f), respectively.
- K. The capacity values in Exhibit A to this agreement include revisions that reflect Table A amounts permanently transferred to the Agency pursuant to Amendment Nos. 19 and 20.

NOW, THEREFORE, the Parties agree:

- 1. Article 12(c) is revised to read as follows:  
  
In no event shall the State be obligated to deliver water to the Agency through all delivery structures at a total combined instantaneous rate of flow exceeding one hundred fifty (150) cubic feet per second, except as this rate of flow may be revised by

amendment of this article after submission to the State of the Agency's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

2. Articles 53(j), (l), and (m) are renumbered to Articles 47(d), (e), and (f).
3. Article 47(g) is added to read:

In accordance with Article 41 and the terms and conditions of this Amendment, the Agency is increasing its annual Table A amounts by 400 acre-feet beginning in year 2003 and each succeeding year thereafter for the term of the Water Supply Contract by purchasing from Tulare 400 acre-feet of its Table A amounts. As a result of this purchase, Table A as designated in Article 6 is amended as follows:

**TABLE A**

**ANNUAL AMOUNTS  
ALAMEDA COUNTY FLOOD CONTROL AND WATER  
CONSERVATION DISTRICT, ZONE 7**

<u>Year</u>	<u>(acre-feet)</u>
1 (1968)	6,900
2 (1969)	8,200
3 (1970)	10,000
4 (1971)	11,200
5 (1972)	12,400
6 (1973)	13,600
7 (1974)	14,800
8 (1975)	16,000
9 (1976)	17,200
10 (1977)	18,400
11 (1978)	19,600
12 (1979)	20,800
13 (1980)	22,000
14 (1981)	23,000
15 (1982)	24,000
16 (1983)	25,000
17 (1984)	26,000
18 (1985)	27,000
19 (1986)	28,000
20 (1987)	29,000
21 (1988)	30,000
22 (1989)	31,000
23 (1990)	32,000
24 (1991)	34,000
25 (1992)	36,000
26 (1993)	38,000
27 (1994)	40,000
28 (1995)	42,000
29 (1996)	44,000
30 (1997)	46,000
31 (1998)	46,000
32 (1999)	46,000
33 (2000)	68,000
34 (2001)	78,000
35 (2002)	78,000
<del>36 (2003)</del>	<del>78,000</del>
36 (2003)	78,400

And each succeeding year  
thereafter, for the term of  
this contract:

**78,400**

4. Increases to the Agency's Delta Water Charge, Transportation Charge and Water System Revenue Bond Surcharge resulting from the increase in the Agency's annual Table A amounts and maximum Table A shall commence on January 1, 2003, and be identified by the State and included in future annual Statements of Charges to the Agency. Deliveries of the 400 acre-feet added by this Amendment are subject to Article 53, including the requirement that service of water to fulfill annual Table A amounts to other contractors shall not be impaired.
5. Any over and under adjustments to payments made by Tulare for 2002 and prior years attributable to the 400 acre-feet of Table A amounts (or applicable portion thereof) and the related delivery capacity in Reaches 1 through 8D of the California Aqueduct shall be paid by or credited to Tulare, including refunds or credits of Off-Aqueduct and Water System Revenue Bond reserves. Any over and under adjustments to payments made by the Agency for 2003 and future years attributable to the 400 acre-feet of Table A amounts shall be paid by or credited to the Agency.
6. Transportation capital cost component charges attributable to South Bay Aqueduct reaches shall be redetermined and allocated to the Agency retroactively and prospectively.
7. For cost allocation and repayment purposes, Exhibit A attached hereto shows Table A amounts and capacity amounts for each aqueduct reach in which the Agency participates. These redetermined values shall be used to derive the proportionate use of facilities factors as set forth in Table B as designated in Article 24(b). The capacity amounts shown in Exhibit A are estimated values. Actual values will be used by the

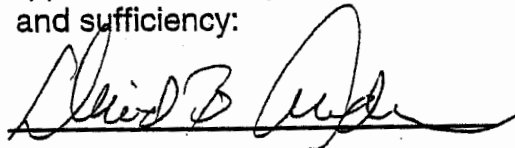

State in implementing the terms of this Amendment and in redetermination of Table B of this contract under Article 28.

8. The Water Supply Contract was amended to add the Monterey Amendment. The Monterey Amendment and the Environmental Impact Report for the Monterey Agreement were challenged in a lawsuit and addressed by the Court of Appeal in *Planning and Conservation League, et al. v. Department of Water Resources and Central Coast Water Agency*, (2000) 83 Cal. App. 4<sup>th</sup> 892. The Agency acknowledges that this transfer is not conditioned on the Monterey Amendment being in effect. The Agency further acknowledges that the allocation of water is different under pre-Monterey conditions, and that the availability of water associated with the permanent water transfer would, in certain years, be materially different if the State allocated available water supply based on pre-Monterey conditions. Recognizing the foregoing, the State shall treat and allocate the water associated with the transfer of this 400 acre-feet of annual Table A amounts in the same manner as the Agency's other annual Table A amounts.
9. This Amendment is contingent upon the effectiveness of Water Supply Contract Amendment No. 29 between the State and Tulare. If either amendment ceases to be effective for any reason, the Agency agrees that the State may, at its discretion and consistent with the law then in effect as determined by the State, and after meeting and conferring with the Agency, identify the date on which this Amendment shall be deemed inoperative, for the purpose of assuring timely repayment of contract obligations and orderly administration of the long-term Water Supply Contracts.
10. This Amendment shall not be used as a precedent.

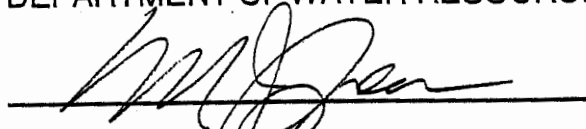

11. The Agency agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to this Amendment and associated agreements.
12. Except as amended herein, the provisions of the Water Supply Contract, including but not limited to Articles 12(b), 12(c), and 18(f), will remain in full force and effect.
13. The Agency agrees not to assert any rights based on the special contract provision in Article 45(e) of Tulare's Water Supply Contract, which is entitled "Adjustment of Annual Entitlements."

IN WITNESS WHEREOF, the parties hereto have executed this Amendment on the  
date first written above.

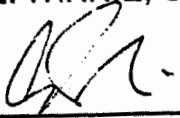

Approved as to legal form

a) Does not include capacity for outages and losses.

b) These numbers apply to the reaches as set forth in Bulletin 132, Figure B-4, "Repayment Reaches and Descriptions."

c) Flow capacity is based on 11% monthly peaking for all Table A water. For Article 12(c) flow capacity, 6000 acre-feet is classified as agricultural water at 18% monthly peaking.

STATE OF CALIFORNIA  
THE RESOURCES AGENCY  
DEPARTMENT OF WATER RESOURCES

---

AMENDMENT NO. 24 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

---

THIS AMENDMENT to the Water Supply Contract is made this 7<sup>th</sup> day of NOVEMBER, 2003, pursuant to the provisions of the California Water Resources Development Bond Act, the Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as the "State," and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as "Agency" and collectively herein referred to as "Parties."

**RECITALS:**

- A. The Parties have entered into and subsequently amended a long-term Water Supply Contract, providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment.
- B. The Parties entered into a letter agreement on January 10, 2001, which provided for the financing for the State to complete a feasibility study to improve and enlarge the South Bay Aqueduct. As a result of that study, the Parties desire to enlarge the South

service area. The Parties entered into a letter agreement on January 10, 2001, in which the State agreed to go ahead with the study and Agency agreed to fund all costs for the enlargement portion of the study.

- C. As a result of the feasibility study, the Agency requested the State to pursue the potential enlargement of the South Bay Aqueduct from Bethany Reservoir through the Alameda Canal at its terminus, Del Valle Check 7, a project herein referred to as the "South Bay Aqueduct Enlargement."
- D. In the past two years, the State has carried out several rehabilitation contracts on the South Bay Aqueduct. As a part of that effort, and due to a unique opportunity related to an extended outage on the South Bay Aqueduct, the State, at Agency's request, replaced and relined portions of the Altamont Pipeline to increase capacity and accommodate future enlargement of the Aqueduct. The Agency agreed to cover all costs associated with the Altamont Pipeline work in two letter agreements dated May 11, 2001, and July 9, 2001.
- E. To date, the Agency has advanced to the State \$ 10,039,000. Of this amount, approximately \$1,289,000 is for preliminary expenses for the South Bay Aqueduct Enlargement, and approximately \$8,750,000 is for construction costs associated with the Altamont Pipeline work. The Parties do not intend the State to reimburse the Agency, through the issuance of bonds or otherwise, for the funds the Agency contributed for the construction costs associated with the Altamont pipeline work. However, the State may issue bonds to reimburse the Agency for the funds provided for preliminary expenses for the South Bay Aqueduct Enlargement, if both Parties agree.

- F. The Parties wish to set forth their agreement regarding the Agency's responsibility for the repayment of all financing costs for the development and potential construction of the South Bay Aqueduct Enlargement.
- G. The Parties also wish to set forth their agreement that the financing costs of the South Bay Aqueduct Enlargement shall not be included in the calculation of the Project Interest Rate.
- H. Execution of this Amendment is not a project under the California Environmental Quality Act because arranging funding for capital projects necessary to maintain service within existing service areas is not a project under CEQA. See Public Resources Code section 21080(b)(8); and CEQA Guidelines sections 15273(a)(4) and 15378(b)(4).
- I. The Parties acknowledge that the certification of an Environmental Impact Report in compliance with the California Environmental Quality Act is required prior to approval of the project and commencement of construction activities.

NOW, THEREFORE, the Parties agree:

1. Article 1(w) is amended to read as follows:

(w) "Project Interest Rate" shall mean the weighted average interest rate on bonds, advances, or loans listed in this section to the extent the proceeds of any such bonds, advances, or loans are for construction of State Water Facilities defined in Section 12934(d) of the Water Code, the additional project conservation facilities, and the supplemental conservation facilities (except off-aqueduct power facilities; water system facilities; advances for delivery structures, measuring devices and excess capacity; East Branch Enlargement

Facilities; and *South Bay Aqueduct Enlargement*). The project interest rate shall be calculated as a decimal fraction to five places by dividing (i) the total interest cost required to be paid or credited by the State during the life of the indebtedness or advance by (ii) the total of the products of the various principal amounts and respective terms in years of such amounts. The bonds, advances, or loans used in calculating the project interest rate shall be:

- (1) General Obligation bonds issued by the State under the Bond Act, except that any premium received on the sale of these bonds shall not be included in the calculation of the project interest rate,
- (2) Revenue bonds issued by the State under the Central Valley Project Act after May 1, 1969,
- (3) Bonds issued by the State under any other authority granted by the Legislature or the voters,
- (4) Bonds issued by any agency, district, political subdivision, public corporation, or nonprofit corporation of this State,
- (5) Funds advanced by any contractor without the actual incurring of bonded debt therefor, for which the net interest cost and terms shall be those which would have resulted if the contractor had sold bonds for the purpose of funding the advance, as determined by the State,
- (6) Funds borrowed from the General Fund or other funds in the Treasury of the State of California, for which the total interest cost shall be computed at the interest rate earned over the period of such borrowing by

moneys in the Surplus Money Investment Account of such Treasury  
invested in securities, and

(7) Any other financing capability available in the Treasury of  
the State of California at whatever interest rate and other financing costs  
are provided in the law authorizing such borrowing. However, the use of  
other financing from the State Treasury is intended to involve only short  
term borrowing at interest rates and other financing costs no greater than  
those charged to other State agencies during the same period, until such  
time as the Department can sell bonds and reimburse the source of the  
short term borrowing from the proceeds of the bond sale.

2. Article 24(h) is added to read:

(h) Notwithstanding the provisions of Article 24(a) through 24(d), capital  
costs associated with South Bay Aqueduct Enlargement as defined in Article 49(a)  
shall be collected under the South Bay Aqueduct Enlargement Transportation  
Charge, as set forth in Article 49(e).

3. Article 49 is added to read:

49. ENLARGEMENT OF THE SOUTH BAY AQUEDUCT

(a) South Bay Aqueduct Enlargement

"South Bay Aqueduct Enlargement" shall mean those additions or  
improvements made to the South Bay Aqueduct (including the Altamont  
pipeline work) to increase the South Bay Aqueduct capacity from Bethany

Reservoir through the Alameda Canal at its terminus, Del Valle Check 7, beyond that set forth in Tables B-1 and B-2 as shown in State Bulletin 132-91.

(b) Contingent upon compliance with other laws

Construction of the South Bay Aqueduct Enlargement is contingent upon certification of an Environmental Impact Report, approval of the project by both the State and Agency, obtaining all necessary third party approvals and permits, and compliance with all other applicable laws.

(c) Agency to pay all costs

Agency agrees to pay all costs incurred by the State for development and construction of the South Bay Aqueduct Enlargement, whether or not the project is approved by the parties and constructed by the State. These costs may include, but are not limited to, costs for planning, design, land acquisition, fabrication, construction, CEQA analysis, obtaining third party approvals and permits, and compliance with all other applicable laws.

(d) South Bay Aqueduct Enlargement Transportation Charge

The payments to be made by the Agency shall include an annual charge under the designation "South Bay Aqueduct Enlargement Transportation Charge." The South Bay Aqueduct Enlargement Transportation Charge shall consist of a capital cost component; and a minimum operation, maintenance, power and replacement component, as defined and determined in Article 49(e) and Article 49(f).

(e) South Bay Aqueduct Enlargement Transportation Charge - Capital  
Cost Component

(1) Method of Computation

The capital cost component of the South Bay Aqueduct Enlargement Transportation Charge shall be sufficient to return to the State an amount equal to all capital costs and any financing costs the State incurs for the South Bay Aqueduct Enlargement, regardless of whether construction of the South Bay Aqueduct Enlargement is approved by the Parties.

(2) Payment of Capital Costs by Agency

(i) The Agency may elect to pay a portion of or all of the capital costs of the South Bay Aqueduct Enlargement by furnishing funds to the State either in advance of the State incurring the capital costs, or in advance of the State issuing bonds (including short-term financing) to finance such capital costs. The Agency may elect in writing to use this option by June 15 of each year (or later with the consent of the State) as to any portion of the South Bay Aqueduct Enlargement not yet financed by the State.

(ii) For any year in which the Agency elects this option, the State shall, on or before July 1, furnish the Agency with a written statement of estimated amounts of funds needed by the State in the succeeding year and of the calendar dates by

which the State will need the funds. During each succeeding year the State shall, on the first of each month, notify the Agency of funds needed within the succeeding month. The Agency shall pay to the State the requested funds within fifteen calendar days of receipt of notification. The Agency may elect to advance funds to the State on an accelerated schedule acceptable to the State. Unless otherwise agreed to by the Agency and the State, interest earned on any funds advanced pursuant to this paragraph shall be credited to reduce payments due from the Agency under this contract. To the extent practicable, interest earned shall be at the Surplus Money Investment Fund rate. The Agency may terminate its use of this option for a given year with the agreement of the State.

(iii) If, and to the extent the Agency elects to advance funds prior to the issuance of bonds, Article 49(e)(3) and Article 49(e)(4) shall not apply to any portion of capital costs advanced prior to the issuance of bonds.

(3) State Revenue Bond Financing Costs

If the Agency does not advance all of the capital costs of the South Bay Aqueduct Enlargement and the State issues revenue bonds or other debt instruments to finance all or a portion of such capital costs, the portion of such capital costs not advanced

pursuant to Subparagraph (2) shall be recovered through a revenue bond charge each year to the Agency that shall return to the State an amount equal to the annual financing costs the State incurs in that year (or any prior year to the extent not previously recovered) for that portion of the South Bay Aqueduct Enlargement constructed in whole or in part with funds from revenue bonds. Annual financing costs shall include, but not be limited to, the following items to the extent not provided for from revenue bond proceeds: bond marketing expenses, premiums for bond insurance or other credit enhancement, annual revenue bond principal and interest, and any additional requirements for bond debt service coverage and deposits to reserves. The State shall provide credits to the Agency for excess reserve funds, excess debt service coverage, interest, and other earnings of the State in connection with repayment of such revenue bond financing costs, when and as permitted by the bond resolution. When such credits are determined by the State to be available, such credits shall be provided to the Agency. Reserves, bond debt service coverage, interest, and other earnings may be used in the last year to retire the bonds.

(4) State Non-Revenue Bond Financing Costs

The State may use any of its available funds other than revenue bonds to finance all or a portion of the capital costs of the South Bay Aqueduct Enlargement. Until revenue bonds or other

debt instruments are issued, the Agency shall pay interest at the Surplus Money Investment Fund rate on whatever funds are used for temporary financing.

(f) South Bay Aqueduct Enlargement Transportation Charge –

Minimum Operation, Maintenance, Power, and Replacement Component

(1) The minimum operation, maintenance, power, and replacement component of the South Bay Aqueduct Enlargement Transportation Charge shall return to the State those minimum operation, maintenance, power, and replacement costs which in the judgment of the State are incurred solely because of construction, operation and maintenance of the South Bay Aqueduct Enlargement facilities.

(2) Notwithstanding the provisions of Subdivision (f)(1) of this article, or of Article 1(x), the costs of off-aqueduct power facilities associated with deliveries of water through the enlarged South Bay Aqueduct shall be included in the determinations and allocations pursuant to Article 25(d). There shall be no separate off-aqueduct power facilities determination and allocation for South Bay Aqueduct Enlargement.

(g) South Bay Aqueduct Enlargement Variable Operation, Maintenance, Power, and Replacement Costs

The variable operation, maintenance, power, and replacement costs associated with deliveries of water through South

Bay Aqueduct Enlargement facilities shall be included in the determinations and allocations pursuant to Article 26. There shall be no separate variable operation, maintenance, power, and replacement component of the South Bay Aqueduct Enlargement Transportation Charge.

(h) Redetermination of Charges

(1) Adjustment: South Bay Aqueduct Enlargement  
Transportation

Charge – Capital Cost Component

Adjustments for prior underpayments or overpayments of the capital component of the South Bay Aqueduct Enlargement Transportation Charge to the Agency, together with the accrued interest charges or credits thereon computed at the then current Surplus Money Investment Fund rate on the amount of the underpayment or overpayment and compounded annually for the number of years from the year the underpayment or overpayment occurred to and including the year following the redetermination, shall be paid in the year following the redetermination.

(2) Adjustment: South Bay Aqueduct Enlargement  
Transportation Charge – Minimum Operation, Maintenance, Power,  
and Replacement Component

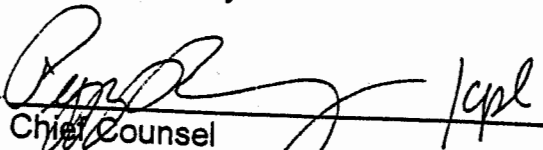

One-twelfth of the adjustments for prior underpayments or overpayments of the Agency's minimum operation, maintenance,

power, and replacement component of the South Bay Aqueduct Enlargement Transportation Charge for each year shall be added or credited and paid in the corresponding month of the year following the redetermination, together with the accrued interest charges or credits thereon computed at the then current Surplus Money Investment Fund rate on the amount of the underpayment or overpayment and compounded annually for the number of years from the year the underpayment or overpayment occurred to and including the year following the redetermination.

4. The Agency agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to this Amendment and associated agreements.
5. This amendment does not constitute the Parties approval to construct the South Bay Aqueduct Enlargement. Approval to construct the project is contingent upon certification of an Environmental Impact Report. This Amendment provides for the financing of capital costs, including preliminary costs prior to final project approval and all project capital costs after project approval.
6. This Amendment is permitted by the terms of the contract, and except as amended herein, the provisions of the contract will remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment on the  
date first written above.

---

AMENDMENT NO. 25 TO WATER SUPPLY CONTRACT  
BETWEEN THE STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES  
AND  
ALAMEDA COUNTY FLOOD CONTROL AND  
WATER CONSERVATION DISTRICT, ZONE 7

---

THIS AMENDMENT to the Water Supply Contract is made this 31<sup>ST</sup> day of October, 2003, pursuant to the provisions of the California Water Resources Development Bond Act, the Central Valley Project Act, and other applicable laws of the State of California, between the State of California, acting by and through its Department of Water Resources, herein referred to as "State," and Alameda County Flood Control and Water Conservation District, Zone 7, herein referred to as "Agency," and collectively herein referred to as "Parties."

RECITALS:

- A. The Parties have entered into and subsequently amended a long-term Water Supply Contract, herein referred to as the "Contract," providing that the State will supply certain quantities of water to the Agency, and providing that the Agency shall make certain payments to the State, and setting forth the terms and conditions of such supply and such payment.
- B. The Agency has entered into an agreement with Belridge Water Storage District, a member unit of Kern County Water Agency, herein referred to as "KCWA," for the permanent transfer of 2,219 acre-feet of State Water Project Table A amounts held

by KCWA. "Table A amounts" shall mean the amount of project water set forth in Table A of the Agency's Water Supply Contract, which the State makes available for delivery to the Agency at the delivery structures provided for the Agency.

- C. The Parties wish to set forth their agreement as to such matters as (i) the 2,219 acre-feet per year increase in the Agency's annual Table A amounts, (ii) the transfer of related transportation repayment obligations from KCWA to the Agency, (iii) the delivery priority for the permanently transferred Table A amounts, and (iv) the revision of proportionate use of facilities factors set forth in the Contract.
- D. The State and KCWA are simultaneously with the execution and delivery of this Amendment, entering into Amendment No. 36 to KCWA's long-term Water Supply Contract with the State in order to reflect (i) the transfer of annual Table A amounts described herein, (ii) the transfer of related transportation repayment obligations, and (iii) the revision of proportionate use of facilities factors.
- E. The Agency wishes to acquire an additional 2,219 acre-feet of Table A amounts and undertake the repayment obligations associated with such Table A amounts.
- F. The State is willing to approve the permanent transfer of Table A amounts in accordance with the terms of this Amendment.
- G. An Initial Study and Negative Declaration was prepared by the Agency in compliance with the California Environmental Quality Act and certified on November 20, 2002. It concluded that no significant impacts on the environment will result from this transfer. The Director of the Department of Water Resources, acting as a responsible agency, has reviewed and considered the Initial Study and Negative Declaration prepared by the Agency prior to approving this agreement.

- H. This transfer is in furtherance of the state policy in favor of water transfers (Water Code Section 475) and will provide the Agency a supplement to its current water supply to meet projected demand in the immediate near term.
- I. The State has further concluded that this transfer is operationally feasible, will not impair the security of its bondholders, and provides for full repayment of transportation costs.

NOW, THEREFORE, the Parties agree:

- 1. Article 12(c) is revised to read as follows:

In no event shall the State be obligated to deliver water to the Agency through all delivery structures at a total combined instantaneous rate of flow exceeding one hundred fifty four (154) cubic feet per second, except as this rate of flow may be revised by amendment of this article after submission to the State of the Agency's requests with respect to maximum flow capacities to be provided in said delivery structures, pursuant to Article 10.

- 2. Article 47(h) is added to read:

In accordance with Article 41 and the terms and conditions of this Amendment, the Agency is increasing its annual Table A amounts by 2,219 acre-feet beginning in year 2004 and each succeeding year thereafter for the term of the Water Supply Contract by purchasing from KCWA 2,219 acre-feet of its Table A amounts. As a result of this purchase, Table A as designated in Article 6 is amended as follows:

**TABLE A**  
**ANNUAL AMOUNTS**  
**ALAMEDA COUNTY FLOOD CONTROL AND WATER**  
**CONSERVATION DISTRICT, ZONE 7**

<u>Year</u>	<u>(acre-feet)</u>
1 (1968)	6,900
2 (1969)	8,200
3 (1970)	10,000
4 (1971)	11,200
5 (1972)	12,400
6 (1973)	13,600
7 (1974)	14,800
8 (1975)	16,000
9 (1976)	17,200
10 (1977)	18,400
11 (1978)	19,600
12 (1979)	20,800
13 (1980)	22,000
14 (1981)	23,000
15 (1982)	24,000
16 (1983)	25,000
17 (1984)	26,000
18 (1985)	27,000
19 (1986)	28,000
20 (1987)	29,000
21 (1988)	30,000
22 (1989)	31,000
23 (1990)	32,000
24 (1991)	34,000
25 (1992)	36,000
26 (1993)	38,000
27 (1994)	40,000
28 (1995)	42,000
29 (1996)	44,000
30 (1997)	46,000
31 (1998)	46,000
32 (1999)	46,000
33 (2000)	68,000
34 (2001)	78,000
35 (2002)	78,000
36 (2003)	78,400
<del>37 (2004)</del>	<del>78,400</del>
<b>37 (2004)</b>	<b>80,619</b>

And each succeeding year  
thereafter, for the term of  
this contract: **80,619**

3. Increases to the Agency's Delta Water Charge, Transportation Charge and Water System Revenue Bond Surcharge resulting from the increase in the Agency's annual Table A amounts and maximum Table A shall commence on January 1, 2004, and be identified by the State and included in a revised Statement of Charges for the year 2004 and in future annual Statement of Charges to the Agency. Deliveries of the 2,219 acre-feet added by this amendment are subject to Article 53(g), including the requirement that service of water to fulfill annual Table A amounts to other contractors shall not be impaired.
4. Any over and under adjustments to payments made by KCWA for 2003 and prior years attributable to the 2,219 acre-feet of Table A amounts (or applicable portion thereof) and the related delivery capacity in Reaches 1 through 11B of the California Aqueduct shall be paid by or credited to KCWA, including refunds or credits of Off-Aqueduct and Water System Revenue Bond reserves. Any over and under adjustments to payments made by the Agency for 2004 and future years attributable to the 2,219 acre-feet of Table A amounts shall be paid by or credited to the Agency.
5. Transportation capital cost component charges attributable to South Bay Aqueduct reaches shall be redetermined and allocated to the Agency retroactively and prospectively.
6. For cost allocation and repayment purposes, Exhibit A attached hereto shows Table A amounts and capacity amounts for each aqueduct reach in which the Agency participates. These redetermined values shall be used to derive the proportionate use of facilities factors as set forth in Table B as designated in Article 24(b). The capacity

amounts shown in Exhibit A are estimated values. Actual values will be used by the State in implementing the terms of this Amendment and in redetermination of Table B of this contract under Article 28.

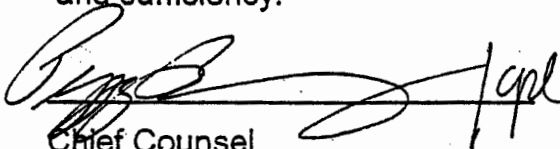

7. This Amendment is contingent upon the effectiveness of Water Supply Contract Amendment No. 36 between the State and KCWA. If either amendment ceases to be effective for any reason, the Agency agrees that the State may, in its discretion and consistent with the law then in effect as determined by the State, and after meeting and conferring with the Agency, identify the date on which this contract Amendment shall be deemed inoperative, for the purpose of assuring timely repayment of contract obligations and orderly administration of the long-term Water Supply Contracts.
8. DWR agrees to consider the applicability of Article 53(a) to this transfer on or before January 1, 2011.
9. The Agency agrees to indemnify, defend, and hold harmless the State and any of its officers, agents, or employees from any liability, expenses, defense costs, attorney fees, claims, actions, liens and lawsuits of any kind arising from or related to this Amendment and associated agreements.

10. This Amendment is permitted by the terms of the contract, and except as amended herein, the provisions of the contract will remain in full force and effect.

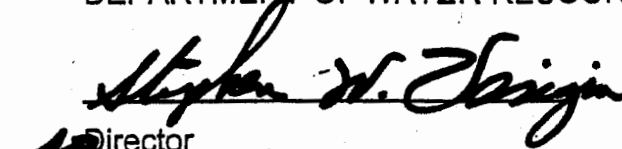

11. This amendment shall not be used as precedent.

IN WITNESS WHEREOF, the Parties hereto have executed this Amendment on the date first written above.

Approved as to legal form  
and sufficiency:

  
Chief Counsel  
Department of Water Resources

STATE OF CALIFORNIA  
DEPARTMENT OF WATER RESOURCES

  
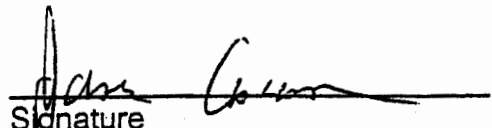

Director

ALAMEDA COUNTY FLOOD CONTROL  
AND WATER CONSERVATION DISTRICT,  
ZONE 7

Approved as to Form:

Richard E. Winnie,  
County Counsel

By:   
Deputy

  
Signature  
President, Board of Directors  
Title  
9/17/03  
Date

**EXHIBIT A**  
**ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, ZONE 7**  
**ANNUAL TABLE A AMOUNTS AND CAPACITY VALUES FOR EACH REACH a)**  
**FOR COST ALLOCATION AND REPAYMENT ONLY**

The values related to this transfer are estimated to be as follows:

Repayment Reach b)	Before Transfer		Table A Transferred from KCWA (AF)	Flow Capacity Transferred from KCWA (cfs)	Additional Flow Capacity Required (cfs)	After Transfer	
	Table A Capacity	Flow Capacity				Total Table A Capacity	Total Flow Capacity
	(AF)	(cfs)				(AF)	(cfs)
California Aqueduct							
Reach 1	100,400	145	2,219	c) 4	0	102,619	149
Reach 2A	32,400	66	2,219	4	0	34,619	70
Reach 2B	32,400	66	2,219	4	0	34,619	70
Reach 3	32,400	66	2,219	4	0	34,619	70
Reach 4	32,400	66	2,219	4	0	34,619	70
Reach 5	32,400	66	2,219	4	0	34,619	70
Reach 6	32,400	66	2,219	4	0	34,619	70
Reach 7	32,400	66	2,219	4	0	34,619	70
Reach 8C	32,400	66	2,219	4	0	34,619	70
Reach 8D	32,400	66	2,219	4	0	34,619	70
Reach 9	27,257	52	2,219	4	0	29,476	56
Reach 10A	27,257	52	2,219	4	0	29,476	56
Reach 11B	10,000	18	2,219	4	0	12,219	22
South Bay Aqueduct							
Reach 1	78,400	93	2,219	0	d) 3	80,619	96
Reach 2	78,400	93	2,219	0	3	80,619	96
Reach 4	61,400	70	2,219	0	3	63,619	73
Reach 5	(see Del Valle Reservoir Storage below)						
Reach 6	66,574	118	2,219	0	3	68,793	121
Reach 7	24,364	44	0	0	0	24,364	44
Reach 8	0	0	0	0	0	0	0
Reach 9	0	0	0	0	0	0	0
Reach 5	Del Valle Reservoir Storage						
	Before Transfer		Table A Capacity Transferred	Del Valle Storage Transferred		After Transfer e)	
	Table A Capacity	Del Valle Storage				Table A Capacity	Del Valle Storage
	(AF)	(AF)	(AF)	(AF)		(AF)	(AF)
Zone 7	68,174	15,079	0	0		68,174	15,079

a) Does not include capacity for outages and losses.

b) These numbers apply to the reaches as set forth in Bulletin 132, Figure B-4, "Repayment Reaches and Descriptions."

c) Transferred flow capacity is based on 11% monthly peaking. For Article 12(c) flow capacity, 6000 acre-feet is classified as agricultural water at 18% monthly peaking.

d) Additional flow capacity required is based on 8.333% peaking (constant flow).

e) No Del Valle Reservoir storage increase due to this transfer. Table reflects storage from previous amendment.
